ELLIS & ARMSTRONG.

Simpson's Cattle Spike.

CHAPTER IV.

THE manner of using the Spike is by sprinkling a tea-spoonful or a table-spoonful (according to the size or class of animal) over or into the common food, such as hay, straw, roots, crushed corn, &c. (see directions on packet labels). The cost is not more than is incurred by using pepper and salt in soup, or with other food for ourselves. The effect is much the same, viz:—It gives an agreeable relish to coarse food, it warms and nourishes the stomachs, secures digestion, creates health, gives a strong constitution, rapid growth and vigor to the frame, and vastly increases the size, weight, and quality of the animals, thus giving stamina and coarseness to horses, rapid growth to calves, lambs, and young pigs, and great results in weight of carcass, in fattening animals, and large yield of rich Milk and Butter from Cows, &c.

The reader is kindly invited to procure a small quantity and fairly test the merits on some of his own Horses, Cattle, Sheep or Pigs, when he will be delighted to find himself in possession of a cheap and ready method for producing almost magical results on his animals, and be very pleased to recommend to his neighbors and friends.

A full supply of this valuable Spike just received and for sale wholesale and retail by
