## LAKE SUPERIOR.

Lake Superior is 1,000 feet deep, 601 feet of the body being above sea level, and 407 below it. The bottom of this great lake is about 375 feet deeper than the channels giving admittance to New York harbor. Lake Erie's greatest depth is 210 feet.

## GOLD MONEY.

The earliest trace of the use of gold as money is to be found in the pictures of the ancient Egyptians weighing in scales heaps of rings of gold and silver. There is no actual record, however, that these rings were what may be termed coins with a fixed value.

When ink has been spilled, the first thing to do is to remove as much of the liquid as possible with a damp cloth; then dip a clean rag into some skimmed milk and sponge the stain. The cloth and milk must be clean for each application. A little bicarbonate of ammonia will remove any grease which the milk may make.

## THE MAYFLOWER.

Never did a ship sail with such much good results as the Mayflower, a cotton clipper schooner the Mayflower, but few people have bothered to ask what was her fate after she had landed the heroic band of Englishmen on Plymouth rock. As a matter of fact, she drifted into the cotton trade and sank after many years of service for the East India Company at Madagaskar, on the coast of India.—London Standard.

NEW YORK IS ALARMED

At Popularity of Daylight Bill in Britain.

Change Would Cause Untold Confusion Unless This Side Adopted Similar Change.

NEW YORK, July 9.—Wall Street brokers, Stock Exchange members and financiers, and their thousands of employees are beginning to be seriously concerned over the popularity in England of the daylight saving scheme. Big houses, with representatives in London, have been informed that Parliament is expected to act favorably upon the daylight saving scheme, and that the scheme, and there is much concern over the confusion in arbitrage and other international transactions if the London hours of London are advanced nearer to sunrise.

William Sherer, Manager of the New York Clearing House, told a reporter that the business dealings of the London Stock Exchange, New York Stock Exchange and Chicago Board of Trade would surely arise if London put the daylight saving scheme into effect before the United States took it up.

"If confusion is to be avoided, New York and Chicago must follow London," said Mr. Sherer at the Clearing House today. "For my part, I would prefer to be at work at 7 and finish at 1 or even work from 6 to 12. There is no doubt that the cool hours after sunrise at this time of the year would permit of more work being accomplished under less trying conditions."

At present the New York Stock Exchange has the advantage of London's opening prices before the trading begins here, and similarly Chicago knows the grain prices here before the day's trading opens there," continued Mr. Sherer. "If the difference in time between New York and London is arbitrarily lessened, the immensity of transactions between the two financial centers would undoubtedly cause a loss until conditions were readjusted. If both financial capitals allowed the permit of more work being accomplished under less trying conditions."

The necessity of changing the work-time schedules has commanded the attention of men in hundreds of administrative and executive positions, and they are appalled at the task.

"If the change is made universal, I think conditions will speedily adjust themselves," declared Manager Sherer. "At the Clearing House, for instance, the day's clearances would begin at 8 instead of 10 o'clock. If the day's checks and drafts could not all be put through heavy interest charges would be lost and gained."

THE STEAMSHIP TO BE BUILT.

No man can at this moment say when the limit of size will be reached in the building of ocean liners. Extremely big and swift ships cannot be developed much beyond the present dimensions and speed unless their owners are willing to run them at a loss for the sake of advertising their lines or unless they are made commercially profitable through government subsidies. But ships of extreme size and moderate speed are possible of construction and even of profitable operation to an extent which would dwarf anything now upon the seas. The ocean greyhound 500 feet long is a terrific consumer of fuel. The mammoth of 1,000 feet sauntering across the Atlantic in eight days uses only a moderate amount by comparison. As the coal question is the chief restriction upon size we may as well sit back and watch the builders juggle with it until the day arrives when it shall be absolutely prohibitive upon further rivalry. And by that time maybe we shall have found some cheaper fuel that will help us to build ships whose bow will be able to touch Sandy Hook before the stern has quite passed the signal station at Nantucket—Brooklyn Eagle.

THE MUSHROOM'S LIFE.

The mushroom's life is measured by hours, but it flourishes long enough for an insect to hang its egg on the edge of the "umbrella" and for the egg to become an insect ready to colonize the next mushroom that springs up.

OH, WHAT A SURPRISE.

Smith. — "I had the most singular thing happen to me the other day. I moved myself up to it, to settle up a bill you owed him and find him out."

Jones (emphatically).—"No, sir. Did that happen to you?"

"It did. I had a notion, or rather, I moved myself up to it, to settle up a bill you owed him and find him out."

"And he was out?"

"Correct. Then I tried my grocer."

"Right. Plenty of shopmen, but no proprietor. Of course, I left word that I called in to settle up, but wanted to see the proprietor first. Dispute about bills. Do you twine?"

"Oh, yes, that strengthens your credit."

"Exactly. Then I called to see my butcher, and I'll be hanged if he wasn't out also."

"When I got home I found them all waiting for me!"
