April 27th, 1934.

Hon. A. Meighen,  
The Senate,  
Ottawa, Ont.

Dear Sir:

The press informs us that your bill, entirely in the interests of Lloyds and most positively against the best interests of the people of Canada, has passed the Senate.

This measure has become law in the interests of the few large concerns, many of them in the Senate, and most positively against the major interests of Canada, is one of the most unequitable and unfair pieces of legislation enacted for some time and votes cast in its favor had either a direct personal interest or to assist some friend who had. It is known for a fact that many Senators would rather save a few dollars getting cheap insurance than protect the country as a whole.

The chances are the last has not been heard of the matter and while members of the Senate are on safe ground, the public will have to be told that "Lloyds" is not the safest source in the world to look to for protection and many cases can be shown where the assured has had to accept a compromise or lose all in fighting a law suit.

Yours truly,
