

DR. WILSON'S WORM LOZENGES.

Old wives say that all children are necessarily subject to worms, and that these parasites when they occur are of small moment.

This is a mistake, about as incorrect as the statement that boils in maturity are an evidence of robust health. All grown persons should be without boils and all children without worms. Where worms do occur, the persistent use of *Dr. Wilson's Worm Lozenges* will eradicate them and effectually prevent their return.

That they cause much annoyance, especially in the intestines of children, is well known, but just the remedy to get them out is not so well understood. Without doubt there is nothing better, if equal, to *Dr. Wilson's Worm Lozenges*.

Little children suffering from other disorders are frequently dosed for worms by their unthinking elders and much harm done. It is therefore important that the symptoms attending worms in the intestines should be fully described. When sure that worms are present give *Dr. Wilson's Worm Lozenges*.

Those most subject to worms usually have a light, fair skin, flesh soft and flabby, enlarged abdomen, legs and arms comparatively small. There is a great disposition to the production of mucous.

Catarrh, mucous diarrheas and mucous vomiting are frequently present. These conditions, in fact, are the danger signals which indicate worms in children.

These conditions must be corrected, first by using *Dr. Wilson's Worm Lozenges* to expel and eradicate the worms from the bowels, and secondly, by giving *Dr. Wilson's Tonic and Sarsaparilian Elixir* to strengthen the system and leave no possibility for the development of worms through weakness and debility.

Worm fever is one of the most distressing symptoms attending worms. It is often quite violent in its nature, the pulse being very rapid, the heat great. It is noticeable for being an unsteady fever; there are sudden starts and twitches, and unless cured by *Dr. Wilson's Worm Lozenges*, the child will become weaker and weaker until it falls a prey to the first disease that attacks it.

Plain diet is a necessity; worms are often introduced into the stomach by unwholesome foods. Meat may be given once a day, no pastry, cake, preserves or candies, just substantial, nourishing food, and nothing more. With the *Worm Lozenges* as an immediate remover, the worms will pass off in the evacuations.

Itching at the anus is usually the result of ascariides or pinworms. *Dr. Wilson's Worm Lozenges*, together with an injection of an ounce of sweet oil, will bring them away at once.

When the worms are away, keep them away. A second return subjects the impaired organs of the child to a yet greater strain, and it sometimes happens that worm fever is followed with fits, convulsions or epilepsy.

Perfectly harmless, *Dr. Wilson's Worm Lozenges* cannot hurt the most delicate constitution.

Perfectly pure, it is impossible that *Dr. Wilson's Worm Lozenges* should have any other than a most beneficial result.

Perfectly palatable, not even the most fastidious child will refuse to take *Dr. Wilson's Worm Lozenges*.

Perfectly safe, no other lozenge or comfit has such universal satisfaction as the *Worm Lozenge* of *Dr. Wilson's* preparation.

The highest medical authorities have declared themselves in favor of this medicine.

Hundreds of testimonials have been received as to its great efficacy.

Thousands of children have had their health restored and their lives saved by it.

Millions of worms irritating and debilitating to the children of Canada, have been expelled by its use.

Mothers, on you devolves a great responsibility. The future Premier of the Dominion, its leading scientist, poet, artist or merchant, may be at present lying in your baby's cradle.

Think of it, a mind which may control thousands of its fellows, may be forming under your hands. Only by perfect health can perfect brain development take place, and the mind takes its disease most frequently from a diseased body. If your little one is troubled with the loathsome disease, worms, it is ten chances to one that its lot in life will be altered, its ambition thwarted, its energies dampened, all through an imperfect digestion and nutrition because of the parasites infesting its inside. These should be removed at any cost, and *Dr. Wilson's Worm Lozenges* are the proper thing to do it with.

Some will say that the worms are of little or no consequence and that the child will naturally "grow out of them." Will it? That it might do so is just possible, but in ninety-nine cases out of every hundred, unless treated, the child suffering from worms will go from bad to worse.

A proper worm medicine is the best remedy, not imbecile waiting to see what will follow. What will follow unless something is done are first sickness and then death. Surely it will be better to administer the palatable *Worm Lozenges* offered your child by *Dr. Wilson* than to let the little sufferer die.

It should be explained that sometimes the worms do not come away whole. They frequently do, but if the worms were high up in the small intestines, they would be dissolved in the juices pertaining to that part of the body, and cast off with the feculent matter. But if the worms were lower down in the larger intestines they would then come away whole whether alive or dead. In either case, the relief resulting to the patient is the same.

My child will not take the lozenges or any other medicine is the foolish reply of mothers, and I consequently do not like to use force to administer a remedy for what may be but a mythical disease after all. But if worms are there, the disease is not mythical, besides,

It is a mother's duty to act for her child. The child is not a competent judge of what is good or bad for its case, and the mother is alone responsible.

There is no use shirking the duty; mothers, if your children have worms, it is you who are responsible. It is you, and you alone whose place it is to give them *Dr. Wilson's Worm Lozenges*.

No other lozenges have been so carefully prepared, no other lozenges are as efficacious, no other lozenges are as reliable, in fact, no other lozenges can be in any way compared to *Dr. Wilson's Worm Lozenges*.

If others are offered, refuse them.
