

**REMARKS.**

---

All who design to become Students in this Institution, should enter, if at all possible, at the commencement of a Term, as the regular Classes are then organized; pupils, however, will be received at any time.

The only pre-requisites for admission into the Primary Department are a good moral character, ability to read and spell, and age sufficient to enable the Pupil to prepare regularly for recitation.

The time which will be occupied in the First and Third Courses will depend upon the capacity and industry of the Student.

Certificates will be given, at the close of each Academical Year, to such Students as may have passed satisfactory examinations in all the studies of either Course.

Persons who may not wish to pursue either Course regularly, will be allowed to enter any of the Classes in order for which they are qualified.

Whenever it may be requested by a sufficient number of Students, Classes will be instructed in French, Book-Keeping, Land Surveying, Navigation, Analytical Geometry, Calculus, &c. &c.

The Institution is furnished with Maps, Globes, Chemical, Philosophical and Astronomical Apparatus, &c. &c.

Several valuable Instruments were purchased by the Principal during his recent visit to England. Among these are a beautiful Achromatic Telescope, the object glass of which is of three and a quarter inches aperture; an Oxy-hydrogen Microscope; a pair of superior Magic Lanterns for illustrating facts in Astronomy, Natural History, &c. &c. &c.

The LIBRARY, which has been enriched during the year by the addition of many standard works, now contains two thousand well selected Volumes.
