POWER ON THE FARM

A BRITISH MADE
ENGINE

That is Used in Every
Quarter of the Globe

THE LISTER GRINDER

LISTER ENGINES

are in use on thousands of
Canadian Farms

When buying an engine consider the HIGH GRADE EQUIPMENT, UNEQUALLED WORKMANSHIP, SIMPLICITY OF CONSTRUCTION, ECONOMY IN FUEL AND OIL CONSUMPTION OF the LISTER ENGINE and you will not be satisfied to instal any engine of inferior quality.

Through four years of the greatest struggle civilization has known, British skill, British patience and British workmanship have proved to be a combination against which the greatest efforts of Germany were unavailing. The British manufacturer owes his world-wide reputation to the quality of material and the high standard of workmanship in his goods. "British-made" means "well made."
