Total Abstinence and Mortality

In 1915 the mortality experienced in our Abstainers' Section was but 42% of the expected, compared with 66% in the General Section. This is but a repetition of the extremely favorable death rate experienced in our Abstainers' Section year after year, demonstrating the longevity of the Abstainer over the Moderate Drinker. The benefits of this Section are for you, if you are an abstainer. Why not ascertain the special advantages we have to offer before placing your insurance? A copy of our booklet "Total Abstainers vs. Moderate Drinkers" will be gladly mailed on request.
