### M.P.P.'S HARD AT WORK

Legislature Put in a Full Day's Business on Tuesday.

Salary Increases From Several Points of View-Premier Whitney Declares Cost of Living Double What It Was 20 Years Ago-Government Found Work Roster In Awful Mess After Taking Up Reins of Power.

Toronto, March 7.—In the Legislature yesterday, Col. Matheson moved the House into supply with Mr. Little in the chair. The Premier defended the general increase in salaries to officials. The Government had to meet the condition of affairs as found. It found officials struggling along under salaries Halfpence and farthings were not coined in England before the time of inadequate to meet the ordinary de-Edward I., and until they were the penny, which was then made of silver,

was issued deeply indented with a cross in order that it might be broken

inadequate to meet the ordinary demands.

Hon. G. P. Graham asked for information about the official residence.

He had heard rumors that the building would be disposed of.

The Premier said the Government had never had any thought of disposing of the property. The matter had not been discussed, and the proper thing, he thought was to be contenued with the cross in order that it might be broken into two pleces for halfpennies or into four things, or farthings. The silver penny was the first coin of the Anglo-Saxons struck in England. In 1672 an authorized coinage of copper pennies, halfpennies and farthings was established. Silver farthings ceased to be coined under Edward VI. and silver

thought, was to be contented with the building as it is.

Ex-Premier Ross found some inequalities in the increases. Some of the large ones might require some explanation. He called the attention of the Treasurer to the question whether the increases could be maintained from year to year. There is a growing sentiment in this country in favor of MEDICINES OF KNOWN COMPOSITION. It is but natural that one should have some interest in the composition of that which he or she is expected to swallow, whether it be food, drink or medicine.

Cost of Living.

The Premier said he had looked into the cost of living, and he was satis-fied that it cost more than twice what it did 20 years ago. It was not the policy of the Government to increase the salarles from year to year. The new Government had found the reverse of order in many of the departments. There were many officials who were doing double duty, and the Government set about to straighten out the disorder. The Government found that a deputy minister of a department was worth \$3,000 a year and was not afraid to say so. He would be glad to hear from the leader of the Opposition from time to time as to which of the deputy

stition of that which he or she is expected to swallow, whether it be food, drink or medicine.

Recognizing this growing disposition on the part of the public, and satisfied that the fullest publicity can only add to the well-earned reputation of his medicines, Dr. R. V. Pierce, of Buffalo, N. Y., has "taken time by the forelock," as it were, and is publishing broadcast a list of all the ingredients entering into his leading medicines, the "Golden Medical Discovery" the popular liver invigorator, stomach tonic, blood purifier and heart regulator; also of his "Favorite Prescription" for weak, over -worked, brokendown, nervous and invalid women.

This bold and out-spoken movement on the part of Dr. Pierce, has, by showing exactly what his well-known medicines are composed of, completely disarmed all harping critics who have heretofore unjustly attacked them. A little pamphlet has been compiled, from the standard medical authorities of all the several schools of practice, showing the strongest endorsements by leading medical writers of the several ingredients which enter into the composition of Dr. Pierce's medicines. A copy of this little book is mailed free to any one desiring to learn more concerning the valuable, native, medicinal plants which enter into the composition of Dr. Pierce's medicines. Address Dr. Pierce as above.

Dr. Pierce's Pleasant Pellets are tiny, sugar-accoated anti-billous granules. They resulted and invigoration, three or four for an active cathartia. Once tried always in favor.

\$50,000 GIVEN AWAY, in copies of them. Will you share in this benefit? If so, send only 31 one-cent stamps to cover cost of mailing only for book in stiff paper covers, or 50 stamps for cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y. ministers was not worth \$3,000 a year, and the opinion would be given due consideration. This Government was not above receiving information from the other side of the House,

Hon. Mr. Harcourt said increases of \$50 had been given every year without a word of discussion, but when they came to increases of hundreds of dol-lars they might require a word of explanation. As to the deputy attorney general no one would say that \$3,500 was too much. No practising barrister in Ontario was too big a man for the place. But the case of the deputy ministers was different; the work of some of these was largely clerical, and there

was room for some discrimination. Would the Premier say that all of them were worth \$3,000 a year?

Mr. Whitney interjected that none was worth less than \$3,000 a year.

Wrong Principle. Wrong Principle.

Discussing the education estimates Mr. Harcourt criticized the appointment of Mr. Colquhoun as deputy minister. He had no word against the man, but there were hundreds of capable men now in the service who were overlooked. It would have been a nice compliment to the teaching profession for the Minister to have recognized the services of the profession. Such a position should be looked upon as a pre-

tion should be looked upon as a preserve in the teachers' ranks.

Hon, Dr. Pyne sald in reply that the appointment of Mr. Colquhoun had been approved all over this province Dr. Ryerson had been an editor, and Women disguised as men have often served as soldiers. The following inscription is on a tombstone in the English town of Brighton: "In memory of Phoebe Hassel; born 1713, died 1821, aged 108 years. She served for many years as a private soldier in many parts of Europe, and at the battle of Fontenoy, fighting bravely, she received a bayonet wound in the left arm." he had never heard that the late Mr. Marling, a deputy minister, had been a great educationist. Dr. Pyne observed that the late deputy, Mr. Millar, had been promised \$3,000, but never came within \$300 of it.

came within \$300 of it.

Mr. Auld of the Opposition side won
Government applause by saying he believed Mr. Colquhoun was a big enough
man for the position. But, said he,
Mr. Colquhoun should have been given **BOILS ALL OVER HIS** chance to prove his worth before his salary was increased.

No Experts Need Apply. The Premier relterated a former atement that the policy of the Government was not to put experts in conrol of the education affairs of the pro-

vince.

The principal reason why the edu-The principal reason why the education system had been the pronounced failure it had been was because it went under expert control like a horse blinded to everything except what was before it. Again Mr. Whitney quoted The Globe in defence of the appointment. He had not heard one discordant note except that which had come from the Opposition leader and his deputy.

Nevertheless, Mr. Ross declined to withdraw what he had said as to The Globe culogy. Mr. Ross knew that there was a sort of masonry among journalists. It was a nice thing for The Globe to say what it did. But would a bank go outside for a manager? He did not believe in the doctrine that experts should be set aside.

experts should be set aside. Experts and Ottawa.

Mr. Whitney declared that he never said experts should be set aside, but in respect to the control of a department it was not necessary to have an expert. How did it come that the leader of the Opposition had not appointed an engineer or a contractor Minister of Public Works?

Mr. Ross: "He works by experts."

Mr. Whitney: "Exactly; the honorable gentleman has answered his own question."

He went on to say that the deputy Experts and Ottawa.

He went on to say that the deputy attorney-general must be a professional man, as his work had to do entirely with professional work. Hon. Mr. Graham said that a bill had

Hon. Mr. Graham said that a bill had been introduced to appoint deputies for the Lands and Mines Departments and it was the intention to appoint experts to both of these departments. He reminded the Hause also that one of the reasons for going out of the House for a Minister of Mines was that an expert should be in control of the department.

Timber Deal

Timber Deal. Mr. McDougal asked for an an-

nouncement regarding the sale of tim-ber. He understood a quantity of tim-ber had been sold to an employe or for-

mer employe of the member for North Renfrew, for \$3.25 a thousand feet. For this no tender had been asked. Hon. Mr. Cochrane explained the sale. There were 250,000 feet of timber, ac-cording to the testimony of two experts,

cording to the testimony of two experts, and it was such a small item that it was thought advisable not to advertise it, as the expense would be greater than the price of the timber.

Mr. Dunlop said the application was for the land. It would have been quite regular to give the man the timber with the land.

Mr. Gamey: "That's what would happen under the old Government.

Mr. Smith (Soo) thought the price was a good one. Very likely the man wanted to buy the land and got the timber free. That had been done in his constituency. constituency.

Mr. Cochrane promised to make an

investigation of this instance. Mr. Auld referred to applications for land in the Township of Chesley, where large quantities of timber had been secured.

Mr. Cochrane said he heard about the timber and held an investigation with the result that the men were charged \$4.25 a thousand for the tim-

Mr. Auld replied that there men who were prepared to pay \$8 a

Mr. Smith of the Soo said no doubt large quantities of timber were stolen every year in this manner.

Mr. Ross said that while these were small parcels the manner of disposing of them did not agree with the policy of the Government to sell nothing ex-cept by auction or tender.

The Point of View.

The Premier said it all depended on the point of view. These were transactions in land, but the Government discovered there was timber on the land and sent experts out to ascertain how much. The Government then said to the purchasers: "You can have the land, but you will have to pay for the timber on it." Mr. Whitney was able to show where 100 millions of feet of pine timber had been given away by the late Government without anything in return, and if he chose Mr. Ross could have the details. Some of the details were on record, and some of them were left out of the record, but the fact was plain that this amount had been filched from the people and given to men who had declared publicly that they would carry three or four counties for the late Government. Mr. Graham said it did not matter what the old Government had done, the fact was that the present Government had declared against the prac-The Premier said it all depended on

ment had declared against the prac-

tice.

Mr. Clarke (Northumberland) talked a long time in an effort to find an analogy between this deal and the Cap. Sullivan \$9,000 rake-off. He was followed by his namesake from Centre Bruce. Mr. Clark did not believe in the tu quoque style of argument. If the late Government did anything it was safe to say it was wrong.

Mr. Cochrane's Bill.

Previous to this discussion, in moving the second reading of his bill respecting the department of lands, for-ests and mines, Hon. Frank Cochrane made his malden speech in a Canadian Parliament. He said the Government had deemed it advisable to appoint a deputy minister to take charge of mines and water powers. There would be plenty for the deputy minister of lands and forests to do in opening up the lands adjacent to the T. & N. O. Rall-way and the Grand Trunk Pacific. Hon, Mr. Ross had no objection to the appointment of a deputy minister of mines, although he reminded the Government of its promise to appoint a specting the department of lands, for-

of mines, although he reminded the Government of its promise to appoint a separate minister of mines. Under the old Government there was a director of mines, who gave splendid service to the province. He found in looking over the bill that the deputies were invested with the power of the Minister in case a vacancy should occur, or of the absence of the minister. He questioned if this was not giving the deputies too much power.

ties too much power. Hon. Mr. Cochrane also explained his bill to preserve the forests from destruction by fire. The terms have already been outlined.

Inspection of Loan Companies. The inspection of insurance and loan companies doing business in Ontario by the insurance branch of the Attorney-General's Department came in for warm criticism in the Legislature yesterday during the discussion of the esterday during the discussion of the estimates. There is an item calling for \$9,550 for this work, and Mr. Gamey questioned whether the department charged with this duty had the confidence of the people. Mr. Downey and others took part in the debate, urging Government action towards mending or ending the present state of affairs.

The Attorney-General replied that most of the insurance and loan com-panies had Dominion charters, and few doing business in Ontario came under its jurisdiction. As to what Mr. Gamey had said, it was true that public attention was now directed towards these companies. In view of the stand taken companies. In view of the stand taken at Ottawa re insurance companies, it was a question whether, it was necessary for the province to act, and how much of the cost the province should bear. It would have to go into the supplementary estimates. Whether an investigation should be made and an additional officer added were matters that would be dealt with at an early date. Mr. Foy would welcome communications touching these companies.

Hon Mr. Harcourt suggested that

Hon, Mr. Harcourt suggested that even where Dominion charters had been granted when companies operated in Ontario, the province should have power to deal with them.

Mr. Foy answered that the province had partial rights. He pointed out that there had been no complaint made in a particular case. It would be enorously costly to undertake an investi-

A long batch of private and public bills was introduced in the Legislature at yesterday's sitting.

Dairy Inspection. A joint deputation representing the Eastern and Western Dalrymen's Associations waited on Hon. Mr. Monteith yesterday merning and asked for the appointment of inspectors who shall inspect and supervise Ontario cheese factories, creamerles and dairies. Hon. Mr. Monteith said he would do what he could to forward their request.
