

## MEN WHO SUFFER SHOULD READ THIS

She was Cured of Female Troubles by Dodd's Kidney Pills

They Made a New Woman of Her And She Blesses the Day She First Heard of Them.

Newmarket, Ont., April 30.—(Special.)—The case reported below is another of the many thousands of instances of Dodd's Kidney Pills coming to the rescue of weak, suffering women. Mrs. M. Dwyer, of this place, says:

"For more than three years I suffered from weakness and female trouble brought on through my kidneys failing to act properly. I was bothered with a pain in the small of my back, headaches, dizzy spells, heart fluttering, depression, loss of sleep, poor appetite, and a terrible dragging sensation as if a weight was fastened round my loins. I tried doctors and took all kinds of medicines, but nothing seemed to do me any good. Then a neighbor told me of Dodd's Kidney Pills and advised me to try them. I did so and after taking six boxes I am entirely cured."

### BRITISH DEMANDS.

Cabinet Sends Cruiser Minerva to Keep Turkey Within Bounds.

London, April 28.—The Cabinet yesterday longly considered the dispute with Turkey regarding the Tabaah boundary, and resolved to despatch the second-class cruiser Minerva to El Arish, with instructions to investigate the report that the Turks have removed the frontier pillars at Bafenaar and El Arish.

### \$100 REWARD \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toronto, O.  
Sold by all Druggists, 75c.  
Hall's Family Pills for constipation.

### A Good Excuse.

After the Duke of Wellington's victorious campaigns the University of Oxford complimented the duke himself and his principal officers by conferring upon them the honorary and not very appropriate degree of doctor of civil laws. At that time the fees were heavy, and one of the distinguished soldiers, who had gathered more honor than profit in the wars, declined the proffered degree in the following verse:

Oxford, I knew you wish me well,  
But prides me too to be  
I can't, alas, be D. C. L.  
For want of a s. d.

### WHY THAT WEARINESS?

You're uneasy, restless, without appetite. Still worse, you are thin and fagged out. Work must be done, but where is the strength to come from?

Make your blood nutritious and you'll have lots of strength. Your only hope is Ferrozone, an instant blood-maker, blood-purifier, blood-richener. It brings keen appetite, digests food and supplies nutrition for building up all the bodily tissues. It increases your weight, builds up your strength, and gives you the vigor you need. It brings keen appetite, digests food and supplies nutrition for building up all the bodily tissues. It increases your weight, builds up your strength, and gives you the vigor you need.

Andrew Carnegie in Toronto. Toronto, April 28.—Mr. Andrew Carnegie arrived here yesterday, and was warmly welcomed by a representative party. In the evening he addressed the Canadian Club, and said his hope was "Canada to unite Anglo-Saxons and be the peace of the world."

### WOMEN WITH WEAKNESS.

For all weakness which girls and women suffer, no surer remedy exists than Dr. Hamilton's Pills. They maintain that bracing health every woman so earnestly desires; they cure disease, and bring strength that stays till old age.

No medicine could be more beneficial than Dr. Hamilton's Pills. It will be remembered that such a letter Mrs. Mary E. Ayton, of Victoria, "I have been strengthened, my digestion is better, I have improved in color and feel considerably better since using Dr. Hamilton's Pills." Sold everywhere, 25c. per box. Five boxes for one dollar.

The man who makes hay while the shins don't let the grass grow for his feet.

Night Soap is better than other soaps, is best when used in the sunlight. Soap and follow directions.

Wit that wounds is the cruel surgery of speech.

Coughs, Colds, Hoarseness and throat ailments are quickly relieved by Croscove Tablets, 10 cents. All druggists.

### MINE PROSPECTING.

Hard Work Says One of the Initiated—The Outfit Needed—Get to Work Daily at Daybreak.

This coming summer will see one of the wildest scrambles after mining property ever witnessed. In other countries there have been districts opened to staking at a given hour, a mad chase has taken place, a few days' excitement, and all was over.

At Cobalt the disappearance of the snow will be the signal, but owing to a find being necessary before a claim can be held, and that a find may not be made without the expenditure of a great deal of work, the sight of several hundred men all trying to find discovery will be indeed an interesting one.

The principle of the "grub stake" is being employed largely by people desiring to put money into a Cobalt venture. The working of a "grub stake" is for one man to put up the money, the other fellow to do the work, and each to share in the profits if any.

The class of men that were sent into the Cobalt district last year on "grub stakes" was very far from being ideal. About one-half of the town's population at that time was made up of young fellows, and old fellows, and all sorts of fellows, having a good summer's outing at somebody else's expense.

To prospect in this way is no picnic and the man who would make a find in the "grub stake" next summer has got to be a hustler, or else the goddess fortune will play a funny prank.

To prospect with any chance of success the prospector has got to be right on the ground, so that he may step out of his camp in the morning and go to work at daybreak.

Six miles a day through the Cobalt bush is a day's work, so the man who thinks to do anything by living in a hotel in Cobalt and walking out from town and finding a claim in the morning, is away off.

Prospecting is about the hardest kind of work a man can go at.

Only the most inaccessible spots bear a chance of yielding anything to a superficial search. To get near these spots the prospector must move his tent and all that is in it on his back. To founder thus hampered through the bush to the accompaniment of the busy mosquitoes, and to the tender soliloquies of black flies, is certainly not the kind of work that all can enjoy.

The man who should be selected to be sent to Cobalt is he with a good recommendation as a hard worker and as having a good big stock of horse sense.

Nine chances out of ten the man who has read his mineralogy and has a host of technical terms ready to shoot, will pitch his camp on a pretty spot by some lake and start to enjoy himself.

The man who thinks that mines are "found" is mistaken.

The first finds in the Cobalt region were the result of accident, but out of a side that all have been secured only by hard work.

Foster, whose quixotic attempt at stocking his mine was the sensation of Cobalt a week or two ago, prospected all the summer of '94 and into May of '95, and even then it was his father, who had recently joined him, who actually made the find. He started to amuse himself digging before breakfast and uncovered Cobalt bloom right where the boy's camp was pitched.

If two fellows go into the Cobalt district to work, make a serious effort to try and find something, and prospector generally go in pairs, what they need is a tent, some blankets and a few cooking utensils, an axe, etc. All should be of the lightest possible make, for all must be carried on their backs to the point where they are to be used.

If the idea is to go north then a larger and more extensive outfit is required. Tent \$210, probably, with a stove.

Here it may be said that the common folding stove is worthless after being set up and used a few times. Get one put up to stay.

Take good grub and cook it well.

Caught at His Own Game.

They were drummers, and had landed in a rural hotel far from any place of entertainment.

It was agreed to spend a pleasant hour asking each other questions, but should anyone ask a question he could not answer himself he had to stand a supper to the company.

A bullying fellow proposed that the new man, the novice on the road, should begin.

"Very well," said the novice. "You're all seen the hole that a squirrel makes in the ground?"

"Yes," replied the drummers, in chorus.

"You have possibly observed there is never any earth at the mouth of it?"

"Do you know why?" proceeded the novice. "No."

"Well, it is this. The squirrel, in digging his hole, commences at the bottom and works his way up to the surface. 'Ah, my man,' said the bullying one, 'but how does he get at the bottom to begin?'

"That's a question of your own asking," said the novice. "Better answer it or pay for the supper."

He said. The novice is called "novice" no longer.

### Government Is Firm.

Several officials of the Grand Trunk Railway were in consultation with the government recently in regard to the railway's request to be allowed to erect and conduct licensed hotels in Algonquin Park, says The Toronto Globe.

It will be remembered that such a request was emphatically refused by the government some time ago, on the ground that it would be unwise to alter in any way the law forbidding the sale of liquor in the park. The Globe understands that this attitude was firmly maintained by the government at the conference. The G. T. R. officials were again informed that the company could rent sites, under certain conditions, for the erection of two hotels if they decided on building two, but that they would not be licensed to sell liquors, and must be run on strictly temperance lines.

The impression was gathered that the company will accept this decision of the government, and commence to build almost immediately one hotel in the park, under the conditions laid down. The company expects to carry many tourists to the park this summer.

Minard's Liniment Relieves Neuralgia.

## Cure For The Blues

ONE MEDICINE THAT HAS NEVER FAILED

Health Fully Restored and the Joy of Life Regained.

When a cheerful, brave, light-hearted woman is suddenly plunged into that perfection of misery, the BLUES, it is a sad picture. It is usually this way: She has been feeling "out of sorts"

Mme. Josephine Rivville

for some time; head has ached and back aches; she has slept poorly, been quite nervous, and nearly fainted once or twice; head dizzy, and heart-beats very fast; then the man would make a find in the "grub stake" next summer has got to be a hustler, or else the goddess fortune will play a funny prank.

To prospect with any chance of success the prospector has got to be right on the ground, so that he may step out of his camp in the morning and go to work at daybreak.

Six miles a day through the Cobalt bush is a day's work, so the man who thinks to do anything by living in a hotel in Cobalt and walking out from town and finding a claim in the morning, is away off.

### FIVE NEW SENATORS.

Sketches of the Careers of Recent Appointments to the Senate.

Hon. Robert Jaffray.

Mr. Robert Jaffray, who is president of The Globe Publishing Co., was born at Bannockburn, Scotland, on Jan. 23, 1832. After being educated at Stirling school, he became a journalist. He was J. R. Dymock, but when 20 years old came to Canada, becoming a resident of Toronto. He entered the employ of Mr. J. B. Smith, a grocer and provision merchant at the corner of Yonge and Louisa streets, five years later became a partner in the business, and in 1858 became sole proprietor. He retired in 1858. Mr. Jaffray was for several years a Government agent on the board of the Northern Railway Co.; later a director of the Midland Railway; became a director of The Globe in 1880, and its president in 1888. He is vice-president of the Imperial Bank, of which he has been a director since 1887; vice-president of the Crow's Nest Pass Coal Co.; one of the commissioners of the Queen Victoria Niagara Falls Park; and a director of the Toronto General Trusts Corporation, and of the Canadian General Electric Co. He was chairman of the Temiskaming Railway Commission until the advent of the Whitney Government to power, when he resigned.

Hon. J. M. Douglas.

Mr. J. M. Douglas was born at Linnton, Bankhead, Scotland, on May 26, 1839. He was educated there, at Toronto University, at Knox College and at Princeton Seminary. He was ordained to the ministry in 1865; was pastor at Edinburgh and Coburg Presbyterian Churches; was a missionary to India and chaplain to the British troops at Mhow from 1876 to 1882. Returning to Canada, he became minister at Brandon, and subsequently at the pulpit at Moosemin. He retired from the ministry in 1896 and devoted himself to farming. He was elected to the House of Commons from East Assiniboia in 1902, and re-elected in 1904. He married in 1861 Jane, the daughter of George Smith, of Darlington, Ont.

Hon. Peter Talbot.

Mr. Peter Talbot, who is of an Irish father and a Scottish mother, was born at Braman, Wellington County, on March 30, 1854. He was educated at Rockwood Academy and the Ottawa Normal School, was Principal of Cornwall Model School from 1883 to 1890, when he was appointed Principal of the Public School at McLeod. He was elected to the Legislative Assembly of the Northwest Territories as a supporter of the Haultain Government in 1902, and re-elected in 1904. He was married to Clara Card, of Guelph, Ont., on Jan. 1, 1879.

Hon. L. G. DeVeber.

Hon. Leverett George DeVeber, M.D., son of Richard Sandys and Caroline DeVeber, of Wellington County, was born Feb. 10, 1849, at St. John, N. B., and was educated at the Collegiate School and King's College, Windsor, N. S.; St. Bartholomew's Hospital, London, England, and the University of Pennsylvania. He was married in 1885 to Rachel Frances Ryan, and was elected to the Northwest Territory in 1898 and re-elected in 1902. He was Health Officer of the Town of Leamington. He belongs to the English Church, and is a Liberal politically.

### WINTERS GROWING WARMER.

Some of the Many Theories Put Forth For the Change.

That our winters are displaying a tendency towards a greater geniality is a theory held by many people, lay and scientific, all through the temperate zone.

There are the theories put forth in support of the conviction, the most important being advanced by Herschel and favored by Gleick and the authorities of the Kew Observatory. That is that the axis of the earth is gradually wobbling, bringing the temperate and Arctic zones nearer the tropics, and carrying the tropic zone nearer the polar regions. The world is like a spinning top, they say, the upright centre upon which it spins being the axis.

Now they believe that the earth is running down, and is wobbling just like a top. Let anyone be alarmed for fear the spinning should suddenly stop, and the world be left a flat. It has been running down for some millions of years, if these scientists are right. That many regions that are now hot were once cold, and many cold places were once hot, seem to be proved by scientific discoveries, which need not be discussed here.

Another scientific theory is that the earth swings back and forth every few years, and that the cold winters for five or ten years are followed by mild winters for a like period of time. All we can say of this theory is that to strike a winter like this, after last winter, the earth would have had to back up so suddenly that everyone must have felt the jolt.

Passing over the sun-spot theory, which has many admirers, we come to the students of the Gulf Stream and its influence upon our climate. These observers declare that the stream is changing its course, and is now closer to the Atlantic Coast of Canada and the United States than it was some years ago. The fact that the climate of Maryland and New Jersey is growing warmer is offered as proof of this theory. The Japanese current, others say, is changing its course. In short, there are scores of theories, all but one of them ridiculed by every scientist. What the one is depends on the scientist.

### Kind Words For the Sucker.

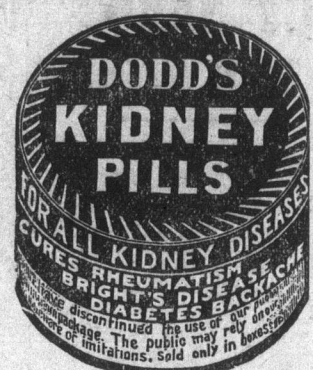

The sucker is the coyote and hog of the waters, but he has his uses. Caught in the early spring, the fish is firm and clean and may become a dried and salt food of commercial value. Pigs are caught in this fish in the fall, and in the season, and if boiled and mixed with bran or meal it gives no taste whatever to meat or milk. Successful experiments have been made in feeding carp, suckers, and catfish with dried or salted. If all other fish are caught by the net fisherman and the sucker is thrown back into the water the inevitable result must be that only the sucker will remain. He will consume the wild rice and other wild-fowl food, and also the food that would support better fish.

Give unto others the full measure of credit which is due them for whatever good they may have done.

Flat for rent, containing four nice rooms and bath room; heated by steam; nicely finished in hard wood; comfortably warm in winter, cool in summer; all modern conveniences. Apply to W. E. Rispin, 115 King Street.

Among other things, the burglar takes chances.

Minard's Liniment Relieves Neuralgia.

### Coal Operators As They Were.

New York, April 28.—The anthracite mine operators, through their subcommittee of seven, yesterday replied to the latest propositions of the mine workers for an adjournment of the anthracite conference in the anthracite fields, refusing to modify their position heretofore announced. "Your propositions are wholly inconsistent with out position in the premises, from which we have not varied," the operators say. And then in conclusion: "We trust that on Thursday next the deliberate judgment of the anthracite workers will result in an acceptance of that proposition [to renew existing relations for three years]."

### ABOUT RHEUMATISM.

There are few diseases that inflict more torture than rheumatism and for which such a varied and useless lot of remedies have been suggested. To say that it can be cured is, therefore, a bold statement to make, but Chamberlain's Pain Balm, which enjoys extensive sale, has met with great success in the treatment of this disease. One application of Pain Balm will relieve the pain, and hundreds of sufferers have testified to permanent cures by its use. Why suffer when Pain Balm affords such quick relief and costs but a trifle? For sale by all druggists.

### Tradition.

What an enormous "camera obscura" magnifier is tradition. How a thing grows in the human memory, in the human imagination, when lore, worship and all that lies in the human heart are there to encourage it, and in the darkness, in the entire ignorance, without date or document, no book, no Arundel marble, only here and there some dull monumental cairn—Carlyle.

### CHAMBERLAIN'S COUGH REMEDY THE BEST AND MOST POPULAR.

"Mothers buy it for croupy children, railroad men buy it for severe coughs and elderly people buy it for a gripe," says Moore Bros., Elvora, Iowa. "We sell more of Chamberlain's Cough Remedy than any other kind. It seems to have taken the lead over several other good brands." There is no question but that this medicine is the best that can be procured for coughs and colds, whether it be a child or an adult that is afflicted. It always cures and cures quickly. Sold by all druggists.

### Call It "An Outrage."

Toronto, April 28.—Local Socialists have passed a resolution denouncing the action of the Postmaster-General in excluding the Appeal to Reason from the Canadian mails "as an outrage upon the principles of free discussion."

Beauty is born in the blood. Beauty is more than "skin deep," it is blood deep. When the blood is tainted, the complexion is sallow, and the skin shows it. Sallow or muddy complexions, pimples, blotches, and eruptions are only the surface signs of impure blood. Face washes, lotions, complexion powders, and the like, do not cure the cause, but only cure the effect. The only cure is to cleanse the blood of the poisonous matter which is the cause of the outbreaks in the flesh and skin. Impure blood can be absolutely purified by the use of Dr. Pierce's Golden Medical Discovery. Its effect on flesh and skin is marked. Sores heal and disappear. The skin becomes smooth, and regains its natural color. The eyes become bright and sparkling, the whole body is radiant with health. "Golden Medical Discovery" contains no alcohol, whiskey or other harmful ingredients, and is absolutely free from opium, cocaine and other narcotics. The use of Dr. Pierce's "Discovery," by cleansing the system of clogging matter.

A woman may ask if her hat is on straight, but never her complexion.

Floods the body with warm, glowing vitality, makes the nerves strong, quickens circulation, restores natural vigor, makes you feel like one born again. Hollister's Rocky Mountain Tea. 35 cents.

A. I. McCall & Co.

When a man is under a cloud you can't always convince him that it is a silver lining.

Of course you pay your money. But you get your money's worth. For what does money mean to you when Rocky Mountain Tea is on hand?

A. I. McCall & Co.

Man seldom speaks of a wife's devotion without getting in a good word for himself.

We are not how you suffer, nor what failed to cure you, Hollister's Rocky Mountain Tea makes the puniest, weakest specimen of man or womanhood strong and healthy. 35 cents. Ten or Twelve.

A. I. McCall & Co.

Patience may be a virtue, but it's often akin to stupidity.
