NG CLAIMS SURVEYED. Rossland.

esent Condition of the Hall Mines Smelter-A Streak of Luck.

Nelson Squatters on Government Lots Notified to Quit-Bank of British Columbia Opens in Sandon-Burglaries in Nelson-School Allowance.

new blast furnace of the Hall mines smelter is nearly completed, but a week will be required for the drying of the concrete before any building can be done. The columns and deck plates are on the is on the road and is almost daily ex- was quoted at 69 cents. The next day Main Office, Rossland, pected to arrive. It will still be five or the market fell to 651/8. The difference six weeks before the furnace will be between the two quotations represents a tidy sum upon Thursday's consigncompleted and the capacity of the smelter will be raised to 330 tons per day, the new furnace adding 200 tons.

At present the capacity of the tramway is up to the mines. The smelter is now handling from 110 to 120 tons per day, and the output of the mines is at present only about 80 or 90 tons per day. Much energy is now being devoted to extending the main tunnel of the mine and making ready to sink new shafts from it. By the time the new furnace is in operation the mines will be in a position to put out between 200 and 300.

H. J. Lisle, representing Ganong Bros., St. Stephen, N.B., says: "Chase's Ointment cured me of a very stubborn case of Itching Eczema. Tried everything advertised, several physicians' prescriptions without permanent relief. Know of several cases of Itching Piles it has cured." tons per day, and the balance of the capacity of the plant will be taken up with commercial work. During the past week the ore from the Hall mines has been unusually good, that is, it is much richer than the average that has been taken

The new roaster furnace is nearly completed and is only waiting now for fire brick to finish the fire box. The flue for the roaster which is to connect with the big stack is under construction and rapdly nearing completion.

The reverberatory furnace is within three or four days of completion, but, like the roaster, is now waiting for the arrival of fire brick. Everything is in first class condition and work progresses

The assay office is still busy with outside ores which have been submitted, and the outlook is that when the new furnace, which will be interchanged for lead, is in operation, that a great deal of Slocan ore will be handled. The smelter people are very eager for the construc-tion of the Crow's Nest Pass road and the building of the branch from the crossing into the Slocan. It will greatly facilitate matters and permit the handl-

ing of much more ore.

A large addition is being built to Mr.
Sicotte's boarding house at the smelter, and the building generally is being put in good shape for the winter.

The recent find of mica near Slocan Crossing, previously mentioned in these columns, promises to turn out exceedingly well. This claim (the Mica King, leasted by C. Fracching)

located by C. Freer) is situated about two and a half miles from the railway track, a few hundred yards from the Slocan trail, and is about 500 feet higher than the railway grade. Its low altitude, near location, plenty of timber, etc., and last but not least, its good surface showings, combine facilities not usually found in mica mining. A few shots put in across a face of 24 feet exposed a deposit of mice wowning from a posed a deposit of mica varying from a few inches to two feet in thickness extending into the rock. The specimens

RUBBER STAMPS taken out are very clear and of good have several offers for the prospect. The outlook is that it will continue improvwith development, and that Kootenay will have a rich mica mine in the

Stipendary Magistrate Fitzstubbs will today cause notices to issue against all squatters on government land, particularly in block 70, ordering them to vacate forthwith. Mr. Fitzstubbs has received instructions from headquarters and is satisfied that he will have the support of the government in this action.

Nelson Tribune: Although the Slo-can section of West Kootenay has attracted the attention of mining men for four years, and has shipped in that time hundreds of thousands of dollars worth of ore, it was without banking facilities, other than the facilities furnished by the banks at Nelson, until Tuesday of this week. On that day the bank of British Columbia established a branch at Sandon. The chartered banks of Canada have large capital and are conservatively managed. When they establish branches it is a sure indication that the town in which they are established is the center of a country whose business will support a bank. From this it will be seen that Kootenay is a prosperous country, for there are five branches of three of Canada's greatest banks already established within its boundaries, namely, branches of the Bank of British Columbia and of the Bank of Montreal at Nelson; branches of the Bank of Montreal and of the Bank of British North America at Rossland, and a branch of the Bank of British Columbia at Sandon. The bank at Sandon was opened and will be managed temporarily by G. V. Holt, the manager of the bank's branch at Nelson. The Bank of British Columbia is the province's oldest chartered bank, and is | WM. PERDUE said to be a little slow in its movements, but when its management gets a move

have established a branch of its institution at Sandon, while the larger town is still without adequate banking facilities. The new branch opened for bus-iness on Tuesday last, and J. C. Eaton, manager of the Whitewater mine, drew the first check. It is now rumored that a large and wealthy eastern bank will WEST SIDE OF establish a branch at this point at an early date, provided local influences do not prove strong enough to prevent. A gang of crooks, realizing that the government does not afford the people of Nelson police protection, this week commenced a systematic campaign of Thursday of each month. Visiting brethren introduced to the people of Nelson police protection, this week commenced a systematic campaign of thursday of each month. On Tuesday night the vited.

Silver King hotel was broken into and the till rifled of \$12.50, a watch and a number of articles of jewelry. The following night the postoffice store was broken into and a quantity of change taken from the till. The Madden hotel was broken into and some \$10 taken from the till, and the Phair hotel was entered and a few cents secured from the cash register. In any other country the government would wake up to the necessity for better police service, but the government of British Columbia has

settled into its last sleep. G. R. Robson, secretary of the Nelson board of school trustees, has received a communication from S. D. Pope, superintendent of the department of education, enclosing vouchers for \$228. This is an increase of \$148 over the last allowance. The superintendent of education has also notified the Nelson trustees that the department will pay for a stove for the school room upon being advised Nelson Miner: The foundation for the lew blast furnace of the Hall mines the department in thus practically acceding to the demands of the Nelson The columns and deck plates are on the ground, and all the rest of the machinery al quotations, and on Thursday silver

OFFICERS.

D. CAMPBELL, M. D., PRESIDENT. C. M. CARPENTER, TREASURER. W. J. MERRYWEATHER, VICE-PRESIDENT. A. M. WHITESIDE, SECRETARY.

The Buffalo Gold Mining Company have acquired and paid for in full three claims. The Buffalo, Ontario and Great Britain No. 1, each 1,500 feet square, are the great free milling property of Trail Creek, and about three miles from the town of Rossland. On the Buffalo claim there are two leads—one of quartz from four to fifteen feet wide, and cropping for 800 feet, from the surface of which assays have been taken running from \$3 to \$12 in gold per ton. The other is an immense iron cap nearly 30 feet wide.

On the Ontario only prospecting work has been done, consisting of stripping a fine ledge which crops out through the claim.

On the Great Britain No. 1 there is a white quartz lead running through the property from which free gold has been obtained. This is confidently expected to prove up well when further work has been done.

to prove up well when further work has been done.

The Red Mountain Railroad will run about a mile from these claims, making

cheap transportation a great factor in the development. Taking everything into consideration, having three full claims, the numerous ledges (especially the free milling ledge), cheap transportation, the stock in this company should prove a paying investment and well worthy of your attention. Four men are now working and more will be added to keep up quick and con-

A limited number of shares of the treasury stock will be placed on the market at the remarkably low price of 5 cents, and no more will be sold at this price after
