

Blood Poisoning

Mrs. Mary E. O'Fallon, a very intelligent lady of Piqua, Ohio, was poisoned while assisting physicians at an autopsy 5 years ago, and soon terrible ulcers broke out on her head, arms, tongue and throat. Her hair all came out. Her husband spent hundreds of dollars without any benefit. She weighed but 75 pounds, and saw no prospect of help.

At last she began to take Hood's Sarsaparilla and at once improved; could soon get out of bed and walk. She says, "I became perfectly cured by

THE WHEEL.

C. H. TAMBLING LEADS THE METEORS.

Wm. E. Sherbrooke, who surprised all London two weeks ago by knocking F. F. Radway's St. John record down a few notches, was himself somewhat astonished last night. The second of the Meteor Club's road races to the little village and return was held, and both C. H. Tambling and Sherbrooke were in it. Both were scratch men and had a splendid start. When the Victoria Park gate was reached Sherbrooke was slightly in the lead of Tambling, but as though shot from a cannon the latter spurred and led the way to the finish. Tambling's time was 31:23 4-5, and Sherbrooke's 31:25 1-2. Both riders reduced their best previous records, but couldn't touch Radway's.

The start and finish were witnessed by a large crowd. Tracy O'Brien was the limit man, and with a handicap of eight minutes succeeded in keeping first place. Allison came a close second, the rest of the riders being pretty well scattered. Geo. Watson had a handicap of six and a half minutes and was the only one who did not finish.

Riders. Handicap. Time.
1. T. O'Brien.....8 minutes 38:35
2. W. Allison.....6 minutes 35:07
3. J. Shoultice.....6 minutes 36:16
4. F. Evans.....6 minutes 36:25
5. H. Gorman.....6 minutes 36:49
6. C. Griffiths.....3 minutes 34:12
7. C. H. Tambling.....Scratch 31:23 4-5
8. W. Sherbrooke.....Scratch 31:25 1-2
9. J. Forth.....14 minutes 33:14
10. J. Lambie.....14 minutes 33:29
11. R. Firth.....4 minutes 34:05
12. F. Asplund.....4 minutes 35:50
13. W. Foote.....6 minutes 37:25
14. C. Smallman.....8 minutes 40:00

The special prize given by Mr. Arthur Gorman for the green rider making the best time in the race will go to W. Allison. The officers of the race were: Starter, A. Talbot; timers, Thos. Gillen and A. Gorman; clerk of the course, F. Robinson; scorer, R. W. Evans; times at St. John's, A. McCormick and W. Southcott.

THE LONDON CLUB'S LARGE TURNOUT.
The second run of the London Club, under the captaincy of Mr. James McCormick, was very largely attended last evening, some 80 wheels leaving the club house at 7:30 o'clock and several others falling in on the way. The run was out Dundas street to the asylum. Making a circuit of the many drives on the beautiful grounds, the captain called a halt on the cricket crescent, where a band concert was in progress. The large party thoroughly enjoyed the splendid programme rendered by the asylum band. The concert being over, the club again remounted and proceeded to the club house by way of King, Richmond and Dundas streets. A very pleasant feature of the London Club runs is the large number of ladies who take part, about a dozen being in line last evening. After returning to the club room wheels were stacked and a pleasant hour spent.

CYCLING COMMENDED BY HIGH MEDICAL AUTHORITY.

In view of rather frequent condemnations of the bicycle by medical men, it is interesting to find that a recognized authority like the British Medical Journal is an enthusiastic advocate for bicycling as an exercise for women. It concedes that it may be overdone, or carried on under bad conditions, but rationally indulged in, it contends there is no better means of preserving health and beauty by exercise, which has with women of late become

almost a forgotten art. The chief objection to the bicycle is really not to the machine, but to the foolish style of riding bent double over it. There is no more sense in that apart from racing, than there is necessity.

ALL RIGHT.

That's all right. What's all right? The SMALLEY. Just before the entry list was closed, the London Bicycle Club decided to send Messrs. A. F. Little and F. F. Radway (London's two fastest riders) to represent them in the great 310 Hilsen-degen 25 mile road race at Detroit, where about 150 of America's fastest riders competed. Mr. Little had never ridden 25 miles at one time, but in this race, mounted on a 26-pound SMALLEY ROAD MACHINE, he took third place, was only two-fifths of a second behind the first man, and won a King of Scorchers racer valued at \$175, the most valuable prize ever won by a London bicycle racer. His riding time was 1 hour, 9 minutes and 24 seconds, which breaks THE WORLD'S COMPETITION RECORD FOR THIS DISTANCE.

And it was done on a Smalley. Mr. Little has only been riding about two months, but has tried several wheels during that time, and, for easy running qualities and rigidity, he has settled on a Smalley. In the St. John's road race Monday night last, the winner was Frank R. Sweney, who rode a 26-pound Smalley road machine, and won easily. Frank is only a boy, not yet 17 years old, but he broke the record by nearly a minute—and it was done on a Smalley. Our wheels are right. They run easy. In the above race two of our wheels broke the record, and they made second, third and fourth best time. This speaks for them. For some years we anticipated engaging in the bicycle business, but before commencing we gave the matter our closest attention, visiting factories, exhibitions, etc., and have selected wheels to handle, that we can guarantee with confidence, and that will give full value every time. There is no such thing as "the best wheel in the world," as there is no wheel that will suit every rider, but we have as good as can be bought, and from the following list we can please you:

Smalley.....\$125 00 Brantford.....\$110 00
Bison.....125 00 Imperial.....100 00
Rambler.....125 00 Canadian A.....80 00
Raleigh.....125 00 Tourist.....70 00

We have also some second hand wheels from \$25 up. Come and see our stock. Whether wishing to purchase or not we shall be pleased to see you.

GRAND CIRCUIT RESULTS.

BUFFALO, N. Y., Aug. 1.—The downfall of J. M. D., the red-hot favorite in the 225 class, was the feature of today's Grand Circuit racing, which 8,000 people witnessed.

J. M. D. took the first two heats in rather easy style, but both Cobwebs and Rex American made the clip so hot in the finish of the third heat that the gelding fell back beaten and much distressed. In the fourth heat J. M. D. was laid up, and Cobwebs again showed in front, and Cobwebs Rex American outfooted the coarsely-grained son of Onward, and J. M. D. was never in the argument, his driver claiming after it was over that he had trown a shoe.

The special pacing race between Robert J. (2:05 1/2) and Mascot (2:04) did not prove much of a contest. Robert easily defeated his rival in the first two miles, and in the third one walked away from him in a fashion that left no doubt as to which was the fast horse. The mile was in 2:06 1/2, within a half second of the track record, held by Hal Pointer, and this could have been beaten had Geers forced Robert to do his best. Mascot was a dozen lengths back in this mile, and it looked at one time as though he would be distanced. Cobwebs, the winner of the opening event, is 6-year-old, and is owned by the Turl Bros., of New York, who bought her at the Palo Alto sale last October for \$550. Summaries:

Catholic Temperance Men in Session.

ST. PAUL, Minn., Aug. 1.—Two thousand Catholic abstainers, representing a large majority of the Catholic dioceses of the country, are in the city today as delegates to the 24th annual convention of the Catholic Total Abstinence Society of America.

Among the prominent ecclesiastics present from outside points are Bishop Watterson, of Columbus, Ohio, whose recent manifesto against liquor dealers in the Catholic Church created such a sensation; Bishop Mesmer, of Green Bay, Wis.; Father Honette, of Chicago, and Father Conroy, of Springfield, Mass.

Spring temperance addresses were made today by Archbishop Ireland and Bishop Cotter, of Winona. The former said in part: "The American saloon is the vile den of intemperance. It is laden with blasphemy and sensuality. Temptations are there created which bring men to drink. I make no reference to the personal characters of saloon-keepers, but the business is bad. It is the enemy of God and of the country. Let the day soon come when it shall not set the name of a Catholic above the entrance of a saloon."

DRENCHED.

People used to get wet when they went out in the rain—they used to get drenched. But that day is past. The umbrella came, then waterproofing. The old kind was hot and unbearable, but the new kind, the good kind, the best kind, called Heptonette, has all the properties of waterproof and yet is porous, pliable and pleasant. Our Cloaks are fashionably made as well. You can't tell them from the most expensive. Look at this:

THIS STYLE ONLY \$7 00.

We have them in various patterns and colors. At \$5 we sell a beauty with yoke and circular cape detachable; at \$6, with apple peel frill, Worth collar and military cape; at \$7, our special, as illustrated, is of fine quality, has full military cape and two circular trills, and the skirts are full seven-gored. These come in black and navy only, the others in colors and fancy tweeds. You know what Heptonette is. It has a reputation, and such a one that with each garment we give a written guarantee, and each is stamped "Heptonette" with white letters on red ground. There is only one place in London to buy these, and ours is that place. Don't take anything that is called just as good, for it isn't.

To Bother Canadians.

BUFFALO, N. Y., Aug. 1.—Inspector DeBarry, now that the Lockwood anti-Canadian Bill has died, has persuaded the Immigration Department to back him in another scheme for harassing Canadians. He has now begun to put in operation the provisions of the immigration laws relating to immigrants from abroad, which have been in operation against European countries at the seaboard ports, and has made them applicable to Canada. Emigrants from that country will hereafter be subjected to the same examination as if they landed from a steamship at New York and the Michigan Central, the Grand Trunk and the lake steamers will be compelled to adopt the same methods of compliance with the law as are now enforced against European lines.

DISASTER ON THE C. P. R.

Two Trainmen Killed and One Mangled by a Boiler Explosion.

WINNIPEG, Aug. 1.—A shocking accident occurred last night on the mountain division of the Canadian Pacific Railway. Shortly after 6 o'clock a freight train left Field Station, east-bound, having an engine at both front and rear. When two miles out of field the boiler of the rear engine burst, blowing the engine into atoms. The engineer in charge, B. Wheatley, and his fireman, a young man named A. Hunt, were instantly killed by the explosion. Brakeman George Kemp was terribly cut and internally injured.

IT HAS been computed that since the practice of embalming began in 4000 B. C., down to 700 A. D., when it practically ceased, probably as many as 730,000,000 bodies were embalmed in Egypt, of which the greater part are yet concealed.

A STEADY stream of emigration goes on from year to year between India and the colonies. During the last decade 136,159 persons left India. About 20,000 of them went to the Mauritius, the same number to the Natal, 40,000 to Demerara, 30,000 to the British West Indies, 10,000 to Fiji, and the remainder were divided in about equal numbers between the French colonies and Dutch Guiana.

DIVIDE the number expressing the year by four (4), taking no notice of the remainder. Next find the number of days inclusive from the last of January to the date in hand, reckoning February always as having only 28 days. Add together the sum, the quotient and the first numbers and divide this by seven (7). The figure of the remainder gives you the day of the week, one (1) standing for Sunday, two (2) for Monday, and so on.

Once a week a thorough cleansing is to be carried out with an antiseptic.

Trolley Lines Destroy Waterpipes.

MUNCIE, Ind., Aug. 1.—It has been discovered here that great damage is being done the city waterpipes by the trolley system of the electric street railway. Saturday evening a leaky pipe was dug out and found to be almost destroyed by electrolysis. The process of chemical decomposition had progressed so far that the weight of the metal was materially reduced and sections of the pipe were perforated like a gas burner. The escaping water had found its way to the surface. Similar trouble has occurred in other places.
