46TH YEAR. NO. 19970

THE ADVERTISER, LONDON, ONTARIO, WEDNESDAY, MAY 4, 1910 -TWELVE PAGES

PRICE TWO CENTS.

Famous Case Against the Water Commissioners Which Ran From 1897 Until 1909 May Be Again Opened Up-Commissioners Are Inclined to Fight-Deny That They Are Causing Damage to Plaintiff's Mill.

The celebrated Saunby case, which involved the city in a lawsuit for about twelve years, and cost the city about \$12,000, was again opened up yesterday when a notice was served on the water commissioners by Ivey & Dromgole, solicitors for Joseph Danby Saunby, to restrain the city from forcing the water back into the mill race at his mill property. If the evil complained of is not remedied within a reasonable time, the commissioners will be brought up for contempt of court.

THE NOTICE TO THE CITY.

"In the high court of justice, between Joseph Danby Saunby, plaintiff, and the water commissioners of the city of London and the corporation of the city of London, defendants: "Take notice that the defendants have committed, and are committing,

a breach of the injunction order herein, a copy of which is hereto attached, by penning and forcing back the water of the River Thames, thereby preventing it from flowing away from the plaintiff's mill, as it otherwise would do, and causing the plaintiff damage and injury. "On behalf of the plaintiff we hereby give you notice to forthwith cease penning and forcing back the water in manner aforesaid and see to is something peculiar about that. We

it that repetition of it does not occur in future. "In default of compliance with this notice our instructions are to take immediate proceedings to enforce the terms of the injunction order, and for the commital for contempt of the order of the court of the officers and servants of the defendants responsible for the breach complained of.

"Dated at London this 3rd Day of May, 1910. "IVEY & DROMGOLE,

"Solicitors for the Plaintiff." Each member of the board was furnished with a copy of the writ, and they will discuss the situation at the meeting of the board on Saturday

NO BREACH, SAY THE COMMISSIONERS According to the information received, the water commissioners are certain that they have committed no breach of the injunction order. That, in brief, was the judgment given last year by which the commissioners were not to cause the water to back up into the mill race of

the plaintiff. The Saunby people claim that the water has backed up into their prop erty, causing them damage.

This the commissioners deny. The splash boards at Springbank are no higher than they were when the judgment was given, they say. The level of the river has not changed a particle, according to the measurements of their engineer. They also deny that the backing up injures the Saunby premises in any way. CAUSE OF THE DIFFICULTY.

The difficulty is due, according to the engineer, to the fact that great quantities of gravel have been taken out of the river north of the Dundas

By diverting the channel, and causing deep holes, this has had a tendency to force the water back to a considerable extent into the mill race causing the damage complained of. The disposition of the water commissioners is to fight the claim, teeling certain that they have lived up to the letter of the injunction. This action has already cost the city \$19,575 17. It will be remembered that suit was entered in 1897, and continued until 1909. It was carried through every court in Canada, and to the Privy Council in England. The claim was for \$20,000 damages, but Mr. Saunby was forced to accept \$1,500 in settlement of his claim. This was more than eaten up, it is alleged, by

LONDON WAS TREATED BADLY

Windsor Allowed to Set Aside Land for Factory Sites But This City Was Turned Down.

CITY WILL SEEK RIGHTS

Legislature Will _ kely Be Approached on the Matter-Mayor Beattie Gives His View.

The city of Windsor recently passed a bylaw with a large majority setting aside 20 acres of land to be used for factory purposes. London was denied that privilege by the Ontario Legislature, and there

seems to be no reason for the discrimination. It is probable that some steps will be taken to again ask the Legislature to give London the same rights as Windsor and other cities. "I saw where Windsor carried the bylaw," said Mayor Beattie. went to the Legislature about the same time, and asked for the right to take a vote. Windsor's application was accepted. Ours was turned down Brantford and a number of other municipialities made themselves busy and prevented our scheme going through. Why we should be so discriminated against is unknown to me.

Must Obtain Consent. "We would have to obtain the consent of the Legislature to purchase any block of land for factory sites. We could take a vote on a bylaw to give a firm a certain definite piece of property, but we could not pass a bylaw to purchase a block of land without the consent of the Legislature. "It is a question that should taken up, and I think that it will be before long. We cannot do anything

NO WORD WAS RECEIVED

Men Are at Work as Usual-Employers Have Had No Notice Served On Them.

A meeting of the cigarmakers, who belogn to the local union, was held in the rooms in the Duffield Block last for an increase in wages.

President Kelly of the union stated to The Advertiser this afternoon that there was nothing for publication yet. He stated that there might be "something doing" in about a week, but declined to say whether or not a strike had been decided upon, or whether any word had been received from the international headquarters. Local manufacturers state that so

far they have not been approached in regard to any increase by the union members.

It was learned from outside sources that no word has yet been received from the International Union, and until it comes nothing can be done.
