

beaten, or even burned, he never gives vent either to the growl or the sharp cry with which a healthy dog expresses anguish, although his efforts to escape and his change of countenance are sufficient proof that he is not insensible to suffering. It is generally supposed that a mad dog always foams at the mouth. This is an error, although in most cases the throat and mouth of the animal are filled with foam, in some they become completely dry. In these cases the dog makes a movement with his paws against his cheeks, similar to that made by one who has a bone stuck in his throat, and tries to free himself from it by the aid of his paws. This movement has sometimes been the cause of fatal accidents, resulting from some one endeavouring, by introducing his hand into the dog's mouth, to remove the obstruction which appeared to trouble him, and getting bitten in the attempt.—*Shilling Magazine.*

Professor Agassiz, in the course of some interesting lectures on the physical features of Brazil, which he is giving at New York, stated that he has discovered in the basin of the Amazon alone 2000 different kinds of fishes—(ten times as many as were known a century ago to Linnaeus as existing in the whole world)—of which he has brought back with him more than 1500. He also found among many of the shell fishes of the Amazon, in fresh water, a singular tendency to ape the marine shells, whilst their internal structure is entirely different.

ADVERTISEMENTS!

Western Halifax Agricultural Society.

THE MEMBERS will meet at the CHRISTIAN ASSOCIATION ROOMS, Hollis Street, on Tuesday, 11th June, at 12 o'clock, to receive and consider a communication from the Board of Agriculture relative to the Provincial Exhibition of 1868.

GEORGE LAWSON,
Halifax, 8th June, 1867. Secretary.

Notice.

ALL BONES suited for Agricultural Purposes will be received and paid for in cash, at my Store in future. Parties having large quantities of the above, can have them removed from their premises regularly, say once a week, by giving notice as above, at prices from 30 to 50 cents per 100 lbs., according to quality.

As it is intended to place the whole of the Bones ground at the Mill at the service of agriculturists at reasonable rates, the co-operation of parties favorable to the development of farming interests is respectfully solicited,—which they will manifest by taking especial care of their bones.

JAMES STANFORD.

N. B.—Store—just north of Police Office. Mill—at Three Mile House.

Lassitude was imported by the Government, in 1865, from England; he is a Chestnut Horse bred by Mr. Bleakiron. Dam, Ennui; Sire, Horror; Foaled in 1863. General Stud Book, vol. x. page 105.

Ennui (the dam of Lassitude) was bred by Lord G. Bentick, in 1843, was got by Bay Middleton, her dam Blue Devils by Velocipede out of Clare by Wolf, (Ennui is dam of Saunterer, Loiterer, &c.)

Horror (Lassitude's sire) was bred by Mr. J. Eyke, got by Wild Dayrell (1857), his dam Sally by Ithuriel, her dam by Partisan out of Pomona by Vespasian.

During the season of 1865 Lassitude ran in the Highbroke Stakes at Huntington of fifteen sovereigns each, and had engagements as follows:

Levant Stakes, at Goodwood, of fifty sovereigns each; in the Priory Stakes at Lewes of fifteen sovereigns each; in the St. James' Palace Stakes of one hundred sovereigns each; in the Cleveland Stakes at Stockton of 5 sovereigns; in the Harlowe Stakes at Stockton of 10 sovereigns; in the Lambton plate at Stockton of 25 sovereigns each; and in the Leger at Stockton of 10 sovereigns each. He was further engaged for 1866 in the Derby, at Epsom, of 50 sovereigns each; in the Prince of Wales Stakes of 50 sovereigns each; in the St. Leger of Doncaster of 25 sovereigns each. He had also several engagements in England for 1867.

TERMS FOR THE SEASON (without warranty and to be paid strictly in advance) \$10.

JAMES CROSBY,

Sec'y Yarmouth Agri. Soc'y.
Hebron, Yarmouth, May, 1867.

Churning made Easy & Butter Good.

TOMLINSON & CO.'S BUTTER POWDER.

BY the use of this inexpensive Powder the churning of hours is reduced to minutes, and is applicable to the making of Butter at all seasons of the year; a small quantity added to the Milk or Cream at the time of churning will produce Butter in much less time, in larger quantity, and of a superior quality, flavour, and consistency, so much so that it increases its value from 1d. to 2d. per lb. In winter it removes the unpleasant flavour caused by the cows feeding on turnips, cake, mangolds, weeds, &c.; and in summer the rancidity peculiar to some Butter, also makes it firmer and sweeter even in the hottest weather.

Butter made with this Powder invariably takes the prizes at the Agricultural Shows throughout the Kingdom.

Sold by the principal Druggists and Storekeepers throughout the Colonies, in boxes at 3d. 6d., 1s., 2s. 6d., and 7s. 6d. each; and wholesale of the Manufacturers,

TOMLINSON & HAYWARD,
Chemists, Lincoln, England.
AVERY, BROWN & CO.,
Halifax, N. S.
