Magazines.

The publishers of Frank Leslie's Popular Monthly have brought out a most excellent portrait in colors of General Robert E. Lee, which serves as a frontispiece to the May number of that magazine. The portrait is pronounced by the friends of General Lee to be the best likeness ever published. It is issued in connection with the great Lee series of articles now running in Frank Leslie's Popular Monthly, and which are attracting such widespread attention.

Twenty pages of The Housekeeper present an abundance of good reading, classified under appropriate headings, in the several departments of Literary, Fashions, Fancy Work, Home Talks, Mothers' Council, Home Remedies, Floriculture, Money Making for Women, Our Young Folks, Household Helps, Our Door Yard, Miscellany, etc., etc. The paper is issued twice a month, consists of twenty large pages, and has been published for twenty years at Minneapolis, Minn. It is the only "domestic" semi-monthly published in America. The subscription price is \$1 per year. It is devoted to the home and home-making.

Drug Reports.

Canada.

The general report of last month's business has been as satisfactory as usual at this season of the year, when farmers are busy with seeding and city people with house-cleaning. There are no marked changes in value to note. Hellebore is in small demand. Blue vitriol is more brisk at advanced prices. Paris green is not much called for yet; and, with prices firm at advance, and future uncertain, very little is changing hands. Moth camphor balls good demand, we notice by Brantford papers. This article is being retailed at 5c. a lb. (There is a lesson in this for those indifferent members of the Retail Association.) There are also several substitutes for camphor having a good sale, which may have had the effect of camphor weakening in price. Gum tragacanth and arabics are higher on account of trouble in Egypt.

Cream tartar dropped a little during the month, but has again resumed high price.

Quinine, pot. bromide, pot. iodide, unchanged.

England.

London, April 27th, 1896.

There has not been much demand in either chemical or drug market, and prices have consequently given way slightly in many instances. Cod-liver oil appears to have reached its limit in the upward direction at last, and in the absence of demand is slipping backward. Oil of cassia is easier, and lower rates are quoted for oil of anisced, balsam of tolu, Canada balsam, etc. Copatba balsam, however, is firmer, and sassafras oil dearer. Higher prices are also asked for permanganate of potassium. Camphor is falling, and glycerine is easier. Quinine and cocaine are dull, the latter being threatened by a new anæsthetic called "eucaine," which is claimed to be superior in effect at half the cost.

SODIUM CHLORIDE FOR RINGWORM.—
Reilly states (*Brit. Med. Journ.*) that for the past seven years he has used concentrated solution of common salt for treating ringworm. He applies the solution in the evening and washes the spot next morning with boric acid soap. In all cases the tinea is cured in less than four weeks.
