

## McKendry's Millinery

### IS THE TALK OF THE TOWN

BEAUTIFUL COSTUMES Ladies are finding out that this store is the proper place to find exquisite novelties in Muslin and Silk Waists, Spring Costumes and JACKETS. It is quite impossible to describe the garments our skilled artists have prepared for your approval, suffice it to say they are positively unique. The very least any lady of taste can do is to look, and we know that it means you will buy if there happens to be a need.

McKENDRY'S, Limited, 226 and 228 YONGE ST.

### ONTARIO TEACHERS.

Continued From Page 1.

Prof. Clark spoke in the west hall, but was quite inaudible at the middle distance. The front benches enjoyed the addresses, and ripples of laughter spread sympathetically rearwards as the professor waxed jocund. He called for the cultivation of a uniform kind of English in all parts of the empire; the provincials should speak English as well as they can. He advised those with a provincial accent not to imitate some other accent, but to strive for a clear enunciation of the consonants and vowels.

**Cooking in Illinois.** Miss Isabel Bevier repeated in general terms the substance of her morning address, giving an account of home science work in Illinois. Some business was transacted, and it was resolved to leave the decision of the next place of meeting to the trustees, a motion to select the university and another the educational buildings dividing the meeting. It is believed that the disagreement was the outcome of the Latin conflict, the Goths and Vandals holding the convention on their native heath they could have defeated the hosts of Caesar.

Prof. Squire reported to the public school section that the committee appointed to consider the membership of the council had not met. The section discharged the committee, and the retiring president was instructed to appoint a committee to advise the minister of education that the council at present did not fairly represent the public and secondary school men. There are six university men out of twelve, and one public school man on the council.

**Three New Sections.** The board of directors of the association arranged for the formation of three new sections last night. The first, proposed by Dr. Oldright, is for hygiene, the second, for the manual arts, including manual training and drawing, and the third will be for the high school head masters.

The resolutions passed by the various sections will be presented to Hon. E. Harcourt, and it remains to be seen what the minister of education will make of them.

H. W. Doan, the popular secretary of the association, was the subject of many congratulatory remarks on the great success of the meeting. Over 50 members were registered, a number greatly in excess of any previous record.

The last day of the Ontario Educational Association was busier than the two previous ones. Eleven of the thirteen sub-sections held meetings.

In the modern language section Miss L. L. Jones, B.A., gave a paper on "Teaching Pronunciation of Foreign Languages."

W. J. Sykes gave a brief biographical sketch of Dante Gabriel Rossetti. F. S. McKellar, B.A., described "Our Collegiate French Circle."

In the afternoon Prof. Squire spoke on "Victor Hugo," and Prof. Vander-Smissen gave an account of "Young Goethe in His Lyrics and Letters," also illustrated.

**Natural Science Officers.** The natural science section met at 10 for business and elected the following officers: Hon. president, Prof. T. L. Walker; president, T. H. Lennox; Stratford; vice-president, S. B. McCready, London; secretary-treasurer, H. L. Hill, Guelph; councillors, L. H. Graham, Toronto; J. P. Hume, Campbellford; D. S. Jackman, Berlin; A. Cosens, Brampton; E. L. Hill, representative to college and high school department.

The afternoon meeting was in combination with the mathematical and physical section.

In the classical section there were six papers. The first of the morning was by F. W. French, who compared the schools of the United States with those of Ontario in the teaching of classics, and stated the Yankee superiority to be due to more time and fewer subjects to study; more oral work, due to a uniform pronunciation;

**Fabrics-Colors Women.** The more dainty and delicate they are the greater the need of Pearline for the washing.

Gingham Dimples Piques Organdies Madras Swiss Laces Linens

Use Pearline without soap without rubbing

114 cases of New York Millinery have been passed into stock yesterday, comprising the most up-to-date novelties that money or good taste can secure. We've never been in so good a position to serve the thousands who will flock here this week. All we ask is that those who can will help a little by coming out in the forenoon. The stock is worthy the best of Paris or New York and a credit to Canada, whilst prices are kept within most reasonable bounds, consistent with excellence of material and first-class workmanship.

**Domestic Science.** The home science section held its third session in the school domestic science room, and transacted routine business. A resolution of condolence on the death of Miss Edith Curran was feelingly introduced by Miss Ida Hunter and carried by a standing vote.

Miss Isabel Bevier of Illinois University gave an account of her work in establishing a course in home science and outlined the four-year course which had been adopted. Their object was not to train teachers or professional housekeepers, but to give the students those things regarding the essentials of life which they ought to know.

The officers were elected, Mrs. Hoodless becoming president; Miss Davidson, president; Miss Ewing, vice-president; Miss MacPherson, secretary-treasurer; Misses Givin, Laird, Marshall, Bensinger, Roddick and Buchanan, councillors; Miss Tennant and Miss MacMillan, auditors.

The chief business of the afternoon was by Prof. Hume, on "Ethics and the Home." He declared that women were too much governed by superstition and tradition, and should be paid special attention to problems of ethics, for they had most to do with moulding the lives of the young. The functions of parents cannot be delegated to public and Sunday school teachers and ministers of the gospel.

**Kindergarten.** The kindergarten department met in the morning and was addressed by Mrs. Hughes. W. L. Richardson proposed the kindergarten as a basis for manual training, and games were exhibited by Brantford visitors.

G. R. Pattullo read a paper on "Our Schools and Civic Reform." He urged the beautifying of school grounds as a step towards making the country more attractive to young people who drift away to the cities.

C. W. Kelly's paper dealt with "Salary Systems." He was decidedly in favor of raising teachers' salaries, and made suggestions on grading. A resolution was carried by the trustees regarding the salary scale, asking the other district trustees to co-operate in protest.

The officers of the mathematical and physical section were elected at the meeting yesterday morning. J. O. McLennan, Ph.D., was chosen as president; W. J. Robertson, LL.B., vice-president; H. S. Robertson, secretary-treasurer; W. J. Patterson, J. L. Cox, J. F. Manley, G. Hogarth, A. D. Griffith, J. T. Letoury, J. T. Crawford, Miss Hill, councillors; and H. S. Robertson, representative to college and H. S. department.

Papers were contributed by J. W. Hedley on "Analytic Functions," and by A. M. Overhol on "The Difficulties of Euclid to Junior Pupils." These were of technical interest.

At 2 o'clock F. J. Smith, Ph.D., discussed the question, "Should physics be taught in secondary schools?" N. R. Carmichael, M.A., spoke on the use of experiments in teaching physics. To perform the experiments necessary to enable a pupil to formulate for himself the principles of physics was impossible in a life-time. The real purpose is to connect the laws of the subject with the facts of nature, and to learn to put questions to nature and to understand her answer. The study of science furnishes mental exercise very similar to that found in the study of literature and may lead to a similar spirit of culture.

**Lecture on Radium.** Prof. McLennan's lecture on radium and radio-activity was one of the treats of the convention. His exceedingly lucid style, the number and ingenuity of the illustrations and apparatus displayed, and the sequential manner in which the subject was discussed gave everyone a comprehensive and intelligent grasp of the great issues involved in the latest discoveries in chemistry and physics. The successive experiments by which Prof. McLennan demonstrated that an electrocope was 20,000 times 10,000 times 1,000,000 times more sensitive than the most sensitive balance wheel to the consciousness of the audience with conviction that science and the higher imagination were not so far apart.

The historical section met at 2 o'clock and elected their officers, which were: President, W. L. Grant; vice-president, J. F. Hume; secretary-treasurer, J. S. Carstairs; councillors, Miss Janet Caronochan, Prof. George M. Wrong, W. J. Robertson, A. C. Casselman, William Dale, W. S. Milner.

Alexander Fraser, provincial archivist, gave a complete and concise exposition of the workings of the archives office, and appealed for assistance in making a collection of documents.

**James H. McTear.** Deputy Minister of Agriculture C. C. James told of the struggles of the early Methodists of the province to secure higher education. The Upper Canada Academy played an important part in this, and eventually became Victoria University. At least twenty-two of those who were trained in the academy sixty years ago were still alive.

"Our First Novelist." Major Richardson was the subject of a paper by A. C. Casselman.

In the public school department, D. H. G. Park mentioned some difficulties of organization. Many teachers remained only short time, and the financial basis was too narrow. Unity of action and sympathy, the development of the superannuation scheme, and the regulation of education and salaries were among the benefits likely to result.

W. F. Moore, principal of Dundas Public School, discussed the proposed new history. The lack of interest in history he charged to the style of book libraries in use, a story without life, and dried-apple style, with the juice all gone. One might as well spend the time in a grave-yard studying epitaphs as the ordinary history. Every teacher should read historical fiction to his classes.

**Enlivened Prof. Wrong.** Cameron Ross McIntosh also contributed his views to this discussion. Graphic representations, maps, pictures and charts should be a feature in a school history. He eulogized Prof. Wrong's book, and favored an all-Canadian history comprising poetry and prose, with biography as the central idea in each chapter.

W. L. Richardson stated that manual training was not a fad but necessary for mind development. Factor activity must not be curbed, but its impulses should get free expression. A better name would be "Training in Manual Arts," and this is likely soon to be adopted. The drawings in the advanced classes developed the imagination and reason and impressed on the pupil the necessity of plan and system.

In the afternoon J. T. Curtis said he relied for getting experienced teachers appointed in rural sections, on the improvement of public opinion. Teachers must also show their worth, and insist on adequate remuneration.

Resolutions were adopted by the board as follows: That principals of model schools should be selected of all other class work; that the number of the model schools should be reduced, and that there should be a redistribution of districts, and that the best of the model schools should be largely increased; that no certificate should be granted to anyone under 21 years of age, except as assistant; that the model school term be lengthened to eight months; that a provincial system of superannuation be established, aided by the state; that the education department provide a more suitable text book in history after consultation with the teachers who have to use the same; that a set of readers up-to-date be authorized; that the association department take means thru the county associations to obtain fair representation on the educational council; that the teachers coming to this convention make application for rates similar to commercial travelers.

**Kindergarten.** The kindergarten department met in the morning and was addressed by Mrs. Hughes. W. L. Richardson proposed the kindergarten as a basis for manual training, and games were exhibited by Brantford visitors.

G. R. Pattullo read a paper on "Our Schools and Civic Reform." He urged the beautifying of school grounds as a step towards making the country more attractive to young people who drift away to the cities.

C. W. Kelly's paper dealt with "Salary Systems." He was decidedly in favor of raising teachers' salaries, and made suggestions on grading. A resolution was carried by the trustees regarding the salary scale, asking the other district trustees to co-operate in protest.

## CONVICT LABOR

robs the honest, skilled shoemaker of work and wages. Convict Labor is Unfair Competition. 30 cents per day is the price paid by the prison contractor—the only one benefited by the unjust contract. At this price, every busy convict means an idle skilled shoemaker. Convict shoes are necessarily poorly made, and wholly lacking in style and quality—the inferior product of inferior workers.

## When Women Buy Shoes

### This Stamp

Is protection against the unfair competition which robs the husband and father of wages, and the home of support. The Union Stamp on shoes means justice to the worker, fairness to the manufacturer, is protection against

poorly made, ill-fitting shoes, inferior in style and quality. The Union Stamp is assurance of shoes, for women, misses and children, combining style, quality and the finest workmanship.

## BOOT AND SHOE WORKERS UNION

432-434 ALBANY BUILDING, BOSTON

JOHN F. TOBIN, President.

CHAS. L. BAINE, Sec.-Treasurer.

## FOR A TEMPLE OF LABOR TO BUY THE ATHENAEUM

Eighty Delegates in the Toronto District Trades Council Show Interest in the Scheme.

At last night's meeting of the Toronto District Trades Council, it was decided to purchase the Athenaeum building to make it a temple of labor.

An earnest of their intention, eighty delegates subscribed for 557 of the 51 shares that have already been placed on the market. The building is to cost them \$50,000. It is the intention to raise this amount by issuing shares of a dollar each, to be bought up by any members of any of the local unions. It is expected that this first amount subscribed will be greatly added to by the locals, who will now take the matter up and decide at their next regular meeting just what amount it will take.

After the discussion in regard to this matter, the council invited Vice-President Dunn of the Commercial Telegraphers to address them. A vote of sympathy had already been passed at the last meeting, but they again expressed their sympathy and assured the telegraphers of their support whenever it was necessary.

It has been decided that there will be no labor candidate nominated to run in Ward 5 at the coming aldermanic elections. This is the decision after considerable discussion. There is a feeling that the time is too short to make the canvass necessary.

Secretary William Ward has issued notices to the Labor Day committee to attend a meeting Monday night next. Preparations will be started at once in connection with the celebration next Labor Day.

A meeting of the Elevator Constructors' Union was held last night in Strathcona Hall. The matter of making a demand for more wages was discussed, but no action taken. It is felt that the membership is not as yet strong enough to warrant such a step for the present at least. Out of about fifty mechanics of this kind in the city, there are only twenty-five who are members of the union. They were first organized a year ago last night.

**AN EXPLOSION OF GAS** Magnified into an Attempt on the Life of King Alfonso.

London, April 7.—Julius J. Lay, United States consul-general at Barcelona, telegraphs as follows to the Associated Press: "An explosion of gas occurred last night, giving rise to the report that a 'petard' was exploded as King Alfonso was leaving the exhibition. The explosion, however, took place half a mile from where the king was."

A despatch to Reuters' Telegrams Company from Barcelona says it has been definitely ascertained that the explosion which took place last night, when King Alfonso was leaving the exhibition, was in an escape of gas, and that no importance is attached to the incident.

**Young Men's Concert.** The Young Men's Inquiry Circle of College-street Presbyterian Church gave their first and most successful concert in the lecture room in aid of their proposed gymnasium in the basement of the church. An excellent program was given by Donald C. McGregor, James Salmon, J. Alexander, Allan Hill and G. V. Anderson.

**Try our mixed word—special price for one week.** Telephone Main 131 or 132. P. Burns and Co.

Madame Januschev, who has played many times in Toronto in high-class dramatic plays, and who will be well remembered by the older theatregoers, has been forced by circumstances to become an inmate of the Actors' Home.

## LIFE CHIPS

Nothing ever came to us by chance. Over 20 years ago and before we began to make Health Foods, we spent time and money investigating the merits of different foods for body and brain builders. Our purpose was to furnish a pure wholesome food that could be easily digested by weak stomachs and at the same time was full of nutrition and palatable. We made thousands of practical tests extending in cases over years and rejected and selected, proving everything. Then when the work was done we had confidence in our Foods because we knew

## The History of Every Pound

A Sanitarium was established at Battle Creek, Michigan, where the patients were served with our own Pure Cereal Health Foods. Thousands and tens of thousands of men and women with impaired digestion, broken-down health and nerves shattered have left this institution healthy in mind and body. You can't afford to go? Then the next best thing is to use our Foods in your own house. Life Chips is just the same as is served daily at the world-famed Sanitarium. Try it for breakfast-to-morrow. It is very nourishing and at the same time

Wonderfully Crisp and Delicious

No Cooking.

All Grocers 10c

Many years of careful study among birds produced this great patent. That is why it can be relied upon and why there is such an enormous demand for it. 10c the package, 2 large cakes.

**Cottam Bird Seed**

The Cottam Bird Seed and Remedies. All grocers. Advice FREE about birds. Bird Book sent by mail. Cottam Co., 23 Dundas St. East, Toronto.

Money cannot buy better coffee than Michie's finest blend of Java and Mocha at forty-five cents a pound.

**Michie & Co., 7 King St. West**

**End of World in 1904.** Chicago, April 7.—The end of the world in ninety years has been predicted by Dr. John Robertson at the evangelistic services at the First Presbyterian Church in Austin.

**Reasoning by inductive analogy.** The end of the world and the coming of the Lord are not far distant. He is about due for the fourth time, and this time He will come as a judge."

The regular monthly meeting of the Student Volunteer Union will be held in Central Y.M.C.A., on Saturday afternoon, at 4:30. Prof. Sheraton of Wycliffe College will speak.

**GALLAGHER & CO.** FOR ALL KINDS OF FISH IN SEASON. Live and Boiled Lobsters. All kinds of Shell Fish, Oysters (Blue Points), Malpeques, & smoked Salmon.

**MARMALADE ORANGES.** New California Vegetables of all kinds. All kinds of Table Delicacies.

**DAVES'** Family Cream Ale fills along felt-waist aprons with stomach giving health and strength.

**The Board of Education for the City of Toronto. Tenders Wanted.**

Scaled tenders, addressed to the secretary-treasurer of the board, will be received until Friday noon, April 9, 1904, for the following works at Jess. Keithum School:

MASON, CARPENTER, PLASTERER, ROOFER, PAINTER.

Thus and specifications may be seen and all information obtained at the office of the Superintendent of Buildings, City Hall, on any after Thursday, April 7th. Each tender must be accompanied by the deposit mentioned in the said specifications and forms of tender.

The lowest or any tender will not be necessary if accepted.

**IN THE MATTER OF THE PUBLISHERS' SYNDICATE, Limited, in Liquidation.**

Scaled tenders will be received by the undersigned at his office in the McKinnon Building, Toronto, up to 12 o'clock noon on Monday, the 25th day of April, 1904, for the purchase of the outstanding book accounts and the amounts due from contributors of the Publishers' Syndicate, Limited. Full particulars can be obtained by application at the office of the undersigned.

Dated this 5th day of April, 1904.

J. P. LANGLEY, Liquidator.

**NOTICE.**

Notice is hereby given that the Oakville Navigation Company (Limited), has, by special resolution, passed by the shareholders of the said company, resolved that the said company shall be wound up and that the assets thereof, after paying the debts of the said company, shall be distributed amongst the shareholders thereof, entitled thereto.

They will act upon the said resolution upon the 11th day of July next.

All creditors of the company are hereby requested to file their claims against the company forthwith, whether or not such claims are now due.

Dated this 7th day of April, A.D. 1904.

HEDLEY SHAW, Secretary.

"Bully" Brady is going to launch another all-star "Circle Ten" production. He is negotiating with Nat Goodwin to play Tom.

Margaret Anglin will commence a short engagement in "Camille" at the Hudson Theatre, April 18, New York. Henry Miller will play Armand.
