ONE OF CANADA'S FOREMOST MEN, ALEXANDER GRAHAM BELL, INVENTOR OF THE TELEPHONE, WHO DIED RECENTLY

At the top on the left is a recent picture of Alexander Graham Bell listening to the wireless telephone. Next is a picture of the memorial to Dr. Bell, as the inventor of the telephone, which was erected at Brantford. The full figure in the centre is a photograph of the great Canadian taken recently. On the right at the top is Dr. Bell (on the left) seen with a group of his crew in one of his hobbies, a flying boat. Below on the left is a picture of this flying boat, the HD-4. On the right of this is the Bell homestead at Brantford. In the centre below this is a photograph of Dr. Bell posing for a bust of himself by Dykstra, a Washington sculptor. This photograph was taken early in the spring of this year, just after Dr. Bell had passed his seventy-fifth birthday. At the bottom is the first telephone, the first instrument through which speech sounds were transmitted electrically in 1875.

WHITE WAY FOR THE EXHIBITION IS AGREED TO

The suggestion from the Retail Merchants' Association in regard to a "white way" to the exhibition grounds during Exhibition Week was favorably acted on at yesterday afternoon's session of the common council, when Commissioner Thornton's motion that he be granted authority to proceed with this work was carried unanimously.

Commissioner Frink brought up the matter of the reconstruction of the C. P. R. overhead bridge in Chesley street, and it was decided to petition the board of railway commissioners to have the railway company delay commencement of the work until a hearing was held.

Mayor McLellan's motion that all civic employees who had been paid on August 20 and had not paid their taxes before August 10 be granted a rebate equal to the discount rate, was carried after little discussion and explanation by the city chamberlain.

Committee Report

The report of the committee of the whole was adopted without discussion. The report related to payment of county tax bills; to the offer regarding a lot in

King street west; and to the petition regarding placing of a light near Box 118.

Discount Rebate

Mayor McLellan then brought up the matter of a rebate for those civic employees paid on August 20. No allowance for the discount rate had been made for them and it seemed only fair to him that they should be allowed this privilege in view of the uncertainty in the matter. He moved that a rebate of 5 per cent interest be granted to all civic employees who had paid their taxes since August 10.

Commissioner Thornton remarked that there was a considerable stir in the various departments in regard to the matter and a great many were blaming the mayor for the order.

The city chamberlain, Duncan G. Lingley, was called in and explained matters satisfactorily. The mayor, he contended, had nothing whatever to do with the mixup. The mayor's motion then carried.

Wood Cutting Report

The mayor then read a brief report in regard to the wood cutting operations at Musquash. He read from a report dated May 25 last and this set out the following information: taken, 45 1/2 cords; now at the siding, 47 cords; at Musquash, 388 1/2 cords; shipped, 138 cords; used, 88 cords; total cut, 350 cords to date. The council should secure some description of the quantity and quality down there now, and said he would have a report ready by the first of next week.

A request for hearing in regard to 1922 assessment was received from Geo. E. Holder, Jr. He will be notified when to appear.

The Engineering Institute of Canada wrote in regard to a new journal on municipal affairs that the company will be getting out soon. The letter contained extracts of the first issue dealing with Welsh anthracite coal. It said that the coal was used extensively by the British navy during the war and had given satisfactory service. The mayor remarked that his information was that fifty per cent of this kind of coal arriving here was slag. The letter was received and placed on the table for further consideration at a later date.

Overhead in Chesley Street

Reporting on the matter of the overhead in Chesley street, Commissioner Frink said that the C. P. R. were not contemplating any lengthening of the spans of the overhead and consequently there could be no widening of the street. He felt that some effort should be made toward this end and moved that a petition be sent the board of railway commissioners for a hearing in this matter before the work was commenced by the C. P. R. This carried. Mayor McLellan remarked that as it was not new work, the commission would be powerless to order any widening.

Lighting to Exhibition

Commissioner Thornton submitted a report from the city electrician in regard to lighting to the exhibition grounds, as suggested by the Retail Merchants' Association. The report showed that it could be done at a cost of \$438.58. Com-

missioner Thornton declared that the exhibition authorities were willing to co-operate to the extent of setting aside \$200 for the work. The route planned will be along Charlotte street, commencing at Princess; thence to the Queen square and across the square diagonally to Sydney street; down Sydney street to the exhibition entrance.

WAS INSTRUCTOR IN WIRELESS

Leslie Southgate, who was drowned in Newfoundland recently, was chief instructor with the Canadian wireless school and has been stationed at various points in the lower provinces. He served in the signal section of the flying corps during the war.

A sister is now in St. John.

of Saskatchewan, who has asked the minister of finance to call a conference of Canadian bankers to arrange methods of financing the 1922 crop.

ST. ROSE'S PICNIC WAS BIG SUCCESS

Fine weather favored the annual Sunday school picnic of St. Rose's church, Fairville, which was held yesterday afternoon on the church grounds in Fairville. Mrs. F. X. Morris and Mrs. Charles Dalton were the general convenors and they were assisted by about twenty-five young women of the parish. The grounds and St. Rose's hall, in which supper was served were tastefully decorated and nothing was left undone to make the affair a success. The different games were handled in an efficient way by the young men of Fairville and they were well patronized by the picnickers.

Maybe that hill
is not there, after all—

VERY often the hill we seem to be climbing, after the middle years, is made out of the common mistakes of diet which starve tissues and nerves and slow down energies with faulty nutrition and stored up food poisons.

How smooth and level the path seemed to be when we were young.

Simple, natural food may level that hill to a smooth path again.

Suppose you try it!

Begin today with a dish of Grape-Nuts with cream or milk (fresh or preserved fruit, too, if you like) for breakfast or lunch. Keep up this crisp, delicious, strengthening food in place of heavy, ill-assorted, starchy breakfasts and lunches—and see if the old-time zest and speed on the old-time level path doesn't come back again.
