

CLOSING LETTER ON MONTREAL EXCHANGE

(F. B. McCURDY & CO.)
Montreal, Oct. 26.—The most interesting development of the market this morning was the recovery in Dominion Iron. It will be recalled that this stock declined to 37 1/2 on Thursday on rumors that the next quarterly dividend was in danger. Yesterday the market began to improve and the stock closed at 40 1/4. This morning it opened a little better at 40 1/2 and on active buying sold up to 41 7/8. The market is evidently in strong hands and the opinion seems to be that the trading back and forth will maintain the price at present levels and that the trend will be gradually upwards.

Braslian showed a firmer tone in London this morning, but the local market was weaker. The stock was very inactive yesterday here, no transactions taking place in the forenoon and only 100 shares selling in the afternoon when the price was 86 1/2. There was not much enquiry for Canadian Pacific, sales taking place at 227 3/4 as compared with 228 at the close yesterday. At the moment considerable importance is being attached to the large increases shown by C. P. R. earnings, as it is believed they will attract more attention from English and foreign investors who have been keeping a close watch on the Canadian situation.

Montreal Power was unchanged, selling at 210 1/2 to 210 3/8. The rights were selling around 10 1/4. There seems to be very little stock offering at present.

Scotin, which has been inactive for some weeks, sold this morning at 78. This stock has not been affected by the weakness in iron, and local brokers believe that the position of the company has been strengthened by the increased market open to Canadian Coal through the changes in the United States tariff.

R. & O. continues to be one of the best supported stocks in the local list. This morning it sold at 108 3/4 and there was very little offering at that price. The opinion prevails that if the new issue of Canada Steamship Lines preferred stock is deferred indefinitely, R. & O. may tend to sag off from its present level.

Spanish River was a little under yesterday's level, selling at 13 1/2. There was no trading in the preferred.

MacDonald, however, was strong, selling at 19. The arrangements being made by interests behind MacDonald are said to be making steady headway and there is generally a better feeling towards the stock.

(J. C. MACKINTOSH & CO.)

New York, Oct. 25.—The cotton market enjoyed another sharp advance today on short covering and fresh buying based on the census spinning report. This report indicated 6,500,000 bales spun to Oct. 15th, compared with 6,373,000 last year and 7,758,500 in 1911. It is generally conceded that Texas and Oklahoma has gained probably the largest percentage to date of any previous year. Texas showed 800,000 less than last year and North Carolina was 100,000 bales short. While opinion differs as to the percentage gained in the Eastern belt many claim that it is very large. Further rains were reported in the South Atlantic states, but the storm is passing. Private wires predict another cold wave and damage reports were numerous. The market closed firm at the highest prices of the day.
