

THE SEMI-WEEKLY TELEGRAPH, ST. JOHN, N. B., APRIL 25, 1920.

GRAND FALLS THE PROPOSED SITE FOR AN IMMENSE NEW INDUSTRY.

There's promise of a big industry for New Brunswick, on entirely new lines also, and it was referred to the legislature at Fredericton yesterday. It is the establishment of a plant at Grand Falls for reducing wad or bog ores...

house re-establishing the control of this water power in the government. The proposed Electro-Manganese Company wants the use of the great water power as part of their plan. Then they will erect three reduction plants, gather in this line depends entirely, however, upon the undertaking being upon a sufficiently large scale and having a sufficient water power...

each ore upon a commercial basis. The success of the new process has been demonstrated in the United States and works are about to be established in connection with the Shawinigan Power Company, Quebec. The success of the works in this line depends entirely, however, upon the undertaking being upon a sufficiently large scale and having a sufficient water power...

LOCAL BUDGET.

(Continued from page 2) tion was \$11,914, and the amount received for game licenses amounted to \$10,885. This service was nearly self-sustaining, but not so sure whether it is well to encourage so many people to come into the province in pursuit of our game. I think, also, that our open season is too long, and that it should not begin until the first of October, ending on the 31st of December. I think, also, that there is no sport in calling moose; it is merely winter slaughter.

Mr. Hazen—"Is the number of moose decreasing?" Hon. Mr. Tweedie—"No; but some reports would seem to show that the females are more numerous than the males. That would be one result of calling moose. I think it is very important that our game should be protected, and that guides from Maine should not be allowed to come into our province and compete with our men. If necessary, I would be in favor of prohibiting the shooting of game for a year.

Scalers to be Paid Salaries in Future "The surveyor-general intends to propose an alteration in the work of his department. Heretofore the scalers have been paid five cents a thousand on all the logs they scaled. By the proposed change we will put these men on salaries, so as to make them game wardens and fire wardens all the year round. I think that we can thus reduce the cost of game protection and collection by \$5,000 or \$6,000. It is almost impossible to give full protection in a forest country like this, but we are doing the best we can to make the protection effective.

Public Health Expenditures. "For public health the expenditure during the year reached the sum of \$28,000. This amount included the grants for hospitals. The three past years have shown a very large increase in the outlay for public health. This is certainly due to the smallpox epidemic which has prevailed over a large portion of the province. During the three years ending with the close of 1917, the expenditure in suppressing the epidemic amounted to \$20,000, and since then \$2,000 has been expended, making a total paid of \$25,743. A large amount is still outstanding awaiting adjustment.

A New Highway Act. "Another feature of the policy of the government will be the passing of a new highway act, and to do away with by-road grants altogether. We propose to abolish commissioners and supervisors and to divide the province into districts with a man in each whose business it will be to look after the roads and bridges. We believe that under this arrangement a large amount of money will be saved and much greater efficiency attained.

Stampage to be Increased. "Another feature of our policy will be to increase the stampage. The stampage was reduced to \$1 a thousand in 1920 in consequence of the depressed state of that industry. Now conditions have changed. The lumber operators are prosperous and they can afford to pay a higher rate of stampage. We propose to increase the stampage, not to injure the lumbermen, but to obtain more revenue for the province.

Manual Training in the Schools. "We also propose to bring in a measure for manual training in the schools. I think now that I have given you all the necessary information as to our financial condition and I feel confident that the members opposed to the government will see the wisdom of this matter fairly and freely. I am willing to give our opponents credit for good motives in their criticisms.

Province's Future All Right. "I think now that I have gone over the items with sufficient fullness to give you an idea of the financial condition of the province. I have no fear of the future of New Brunswick, and that our revenue will prove sufficient for our needs. We have claims on the dominion government, which must be met, and which will improve the financial position of this province.

amount of money will be saved and much greater efficiency attained. The success of the new process has been demonstrated in the United States and works are about to be established in connection with the Shawinigan Power Company, Quebec. The success of the works in this line depends entirely, however, upon the undertaking being upon a sufficiently large scale and having a sufficient water power...

Mr. Hazen—"What will be the amount of the increase?" Hon. Mr. Tweedie—"That has still to be decided. We are considering the question whether there might not be a different rate for different districts, according to the facilities which they have for bringing their lumber to market.

"The policy of the government will be in the future, as it has been in the past, a policy that is fair to all parties. It is our desire to protect every interest, to guard the public treasury, to advance the prosperity of the province in every possible way and to promote its welfare.

"The premier received great applause at the close of his speech. The debate will continue until 3 o'clock tomorrow afternoon.

A Powerful "Anti-Ph" Smoking Tobacco Will Burn 75 minutes "Test it?" "Save the Tare they are valuable.

PAINTERS GO ON STRIKE. Five Men in Employ of Robert Barbour Went Out—Apprentice Over Age the Cause.

There was a strike Wednesday of painters in the employ of Robert Barbour. Five men knocked off work. They considered it a grievance that Mr. Barbour had in his employ as an apprentice a young man over 21 years of age—the limit beyond which one cannot be considered an apprentice.

TENDENCY OF CATARRH IS TO SPREAD. Just a slight matter at first, and because slight, neglected, it will soon bring forth a dangerous ailment, Catarrh, which, if not cured, may lead to other serious ailments.

HALIFAX MAN CRUSHED TO DEATH. Halifax, April 21.—(Special)—John O'Malley, brakeman, was crushed to death at Deepwater terminus here at 12 o'clock tonight while coupling cars. He was 20 years of age.

A HEAVY SENTENCE. A New York Policeman Gets Eight Years in Prison for Abduction.

New York, April 21.—Eugene A. Meester, a former policeman, convicted of abduction, was sentenced to eight years in prison at hard labor today. Meester was accused of procuring girls for immoral purposes. In the case upon which conviction was secured the girl victim was under 16 years of age so that the charge was made abduction.

FREE BOOK FOR SICK WOMAN

Woman is more liable to illness than man. This is because her organism is more sensitive. In man the muscular system is predominant. In woman the nervous system is predominant. Woman suffers in heart and brain a thousand things the average man can't understand. He knows nothing of the throbbing head, the aching back, the "alone" feeling, the weakness and nerves all ajar by overstrain, the "want of sleep" feeling, the self-sacrificing life. Often inspiration from the overwork, work and care of her home until it is too late, the many sleepless, restless nights followed by tired, aching, the wearing pain, the dragging weakness of female complaints, all of which are the result of a nervous system that is unutterably weary and weakens that darkens her life and brings her to the verge of despair.

Absolutely Free Fully Illustrated To Healthy Women

Dr. Sprague has given particular attention to the illustrations in this book, and has spared no effort to make them as clear and as helpful as possible. The illustrations are not only beautiful but they are also very helpful. They show the various organs of the female system and how they are affected by disease. The book is written in a simple, plain, and easy-to-understand style. It is a book that every woman should have in her home. It is a book that will help you to understand your own body and to take care of it. It is a book that is absolutely free and fully illustrated.

DR. WOOD'S NORWAY PINE SYRUP. Coughs, Cold, Bronchitis, Pain in the Chest, Asthma, Croup, Hoarseness, Sore Throat, Whooping Cough, Quinsy, and all Throat and Lung Troubles.

RAMSAY'S PAINTS. TO PAINT YOUR HOUSE inside and out with just a light touch. TO KEEP YOUR HOUSE clean and bright. TO BRUSH YOUR HOUSE with a quick and easy movement.

\$200.00 IN FREE. For Clever People with Business. Can you tell us what your business is? We will tell you that there are seven ways to make money. We will tell you how to make money. We will tell you how to make money. We will tell you how to make money.
