Moneton's new track was something of a revelation to horsemen and much sur-prise was expressed to find such an excel-lent course and splendid accommodation. Not a few pronounced the track the best in the provinces and one prominent horse owner placed it equal to any in Canada. The races were well conducted and everything passed off to the entire satis-faction of the horsemen and management. The races were very keenly contested and there were surprises for the favorites. In the twenty dass a close race among a field of horses has seldom been witnessed. In nearly every heat five horses finished within a few yards of each other and there in the Mississippi Valley region. The work of this station will be under the liraction of Dr. W. K. Dr. Inch advocated the amendment of the school law in respect of boards of trustices in the different districts where often some members retaind or block the well being of the schools. He thought if county boards were appointed better re-sults would obtain in many districts, where but a very few scholars resided and under which circumstances a teacher would not take the same interest that they would if a larger number were present. Under the system he advocated arrangements could be made whereby scholars could be conveyed to another district, thus form-ing a fair sized school as well as cutting down expenses for two or more districts combined. He suggests the change could be brought if the business and profession-al men throughout the province would take an interest in the matter and memor-alize the government.

They took the case into ourt, which decided that their refusal or loss the "mater" did Rev. Mr. Gosline, of the Nova Scotia F. B. conference was then introduced and expressed his pleasure in being present. He said the Nova Scotia F. Baptists were a small body in comparation with those in this province. There were only forty churches with a membership of 3,434. em-bracing thirteen pastorates. They were pretty well supplied with ministers at present. The average salary paid was larger than here, and the proportion of pansonages was larger. Last year they had an evangelist in the field finding it an excellent investment. He spoke of their problems and presented a copy of the to kiss the "paten" did not make them theretics, and that they should either get \$20 apiece from the society or be rein stated in its membership.
