

FROM ALL OVER THE PROVINCES

FREDERICTON
Fredericton, N. B., Nov. 14.—A stated case in connection with the insurance on the bell of Christ church cathedral, which was destroyed by fire last summer, was argued before Chief Justice Barker this afternoon. A. J. Gregory, K. C., appeared on behalf of the bishop, and M. G. Teed, K. C., on behalf of the fire underwriters. The case is to decide whether the bells are part of the church or furniture or of the building. The chief justice took time to consider...

RICHIBUCTO
Richibucto, Nov. 14.—Mrs. J. B. Wright went to St. John today for a short visit. The Rev. E. W. Taylor, of Caribou, Maine, is visiting relatives in this locality. The North River United Baptist people held a successful social on Saturday evening in the church. The proceeds amounted to \$70, and will be used to complete the large horse shed in course of erection near the church.

CAMPBELLTON
Campbellton, N. B., Nov. 15.—In the early hours of this morning fire broke out in the wooden building on Gerrard street. The fire was discovered in the basement under the store and is thought to have started from a candle left in the stove. The building was used as a warehouse for the 'Arthur Begg' who has since fled. The loss is estimated at \$10,000. The company on Friday will make a test of the gas pressure.

HOPEWELL HILL
Hopewell Hill, Nov. 14.—Work on the new concrete lighthouse at Grandtrot Island, is completed, and the crew of workmen are leaving for their homes in St. John this week. The lantern is set up in place, and it is not known yet whether the light will be installed in the new building, or in the old building, or in a structure to be built of concrete. It is fifty feet in height, as compared with the twenty-eight feet of the old building, and is eleven feet in diameter at the foundation, running straight its full height. The tower is six sided, each corner having a butress of concrete two feet square, resting on the top, where a platform is built for the lantern. The concrete work is reinforced with steel rods, and the building was a solid rock foundation. The work was done under the direction of W. F. Fitzgerald, of St. John, and was begun in August. District Engineer Forsberg, the marine department, was at the island last week, inspecting the work. The concrete is not painted, but is given a coating of a preparation that renders it proof against decay, and also in color. One of the men working on the lighthouse, who has been at his home here for several weeks on account of the illness and death of his mother, left today to resume his studies at Mount Allison University. The weather took a great change yesterday. Last night was much the coldest of the season. Hopewell Hill, Nov. 14.—Prospects for lumbering operations this season, in this section, are said to be improving, and the chances are that a good deal of work will be carried on by different operators. F. C. Frost is expected to get out about five million of three million. McClellan Bros., Riverside, who, earlier in the season were not intending to get out any cut, are now expected to conduct quite extensive operations on the Shepody Mountains and also in New Ireland. Herbers Wilbur is expecting to get out a large cut in Harvey, and Alex. Prosser is to get out a million or thereabout on the Millage property, which he recently purchased at Midway. Altogether there would seem to be considerable prospects of a pretty good season's work in the woods. One big buyer has guaranteed operators \$12 a thousand. The smoker tendered to G. W. Fowler, M. P., at Albert, is reported to have been well attended. The smoker, on 25 cents admitted the party followers to the two-story programme, including sandwiches and coffee and the oratory of the evening, and a good sized crowd gathered. Patronage matters, it is understood, were dealt with to some extent. The scramble for the offices it is supposed to make vacant, is still on. It is said there are five applications for the Hill post office. A man is reported for the Riverside and Hopewell Cape post offices, and the postmaster at Hillboro is also reported to be likely to be removed. Capt. Hugh Allison, of Hillboro, has been appointed master of the dredge which has been in charge of Capt. Edmund Kinzie. Capt. Kinzie is a Liberal.

SALISBURY
Salisbury, N. B., Nov. 14.—Mrs. R. M. Gross and daughter, of Annapolis, spent Sunday in Salisbury with Mr. and Mrs. R. A. Brown. Miss Hattie Moore, of Halifax, who has been in Moncton with her sister, Mrs. Lindley W. Carter for a few days, returned to Salisbury this week and is the guest of Mrs. W. D. Baird. Miss Edna Steeves, teacher of Forest Hill, Albert county, was the guest here recently of the Misses Duncan. T. T. Goodwin, principal of the Salisbury school, is in Fredericton this week undergoing his final examinations in his studies for the legal profession. V. E. Gowland came in from Sydney Saturday evening and spent Sunday at his home here. Rev. Leander Daniels, pastor of the Dibley Methodist church. Rev. W. A. Ross, M. A., general secretary of the W. B. and P. E. I. Sunday school Association visited Buchsala last Wednesday. He took an important part in a meeting held there that evening in the interests of Sunday school work. Miss Victoria Cochrane has returned from a visit to Loggieville friends. The directors elected E. W. Sumner, president; J. C. Patterson, vice-president; T. Williams, second vice-president; M. Lodge, secretary. Moncton, N. B., Nov. 15.—William Asbell, proprietor of the Wilmut Hotel, was in Moncton today interviewing Chief Rideout in an effort to locate the whereabouts of 'Arthur Begg' who is alleged to have checked in here recently. Asbell, says he holds a bogus check passed on him by 'A. Bagg', who was in Sussex Tuesday. A search here for Bagg failed to find trace of him, and he is believed to have gone to Nova Scotia. An interprovincial professional hockey league seems assured. A meeting to organize is called at the Learmonth Hotel, Fredericton, on Friday night. A. E. Holston, manager of the Moncton rink, will represent Moncton at the meeting, and will enter a team. It is also understood that the Moncton man will leave in a few days for Upper Canada in search of players for the Moncton team. At the school board meeting tonight, a resolution was read from the board of health protesting against the use of a common drinking cup in the public schools. A joint meeting of the school board and board of health will be held soon to discuss the matter. The first street car by the Moncton Tramways Electricity & Gas Company was run on Mechanic street this afternoon to test the power and equipment. Within a few minutes the car was in motion, running regularly between the new L. C. R. shops and the power station. The work of piping natural gas to Moncton from the wells in Albert county has been completed to the Postville bridge, and the company on Friday will make a test of the gas pressure.

MONCTON
Moncton, Nov. 14.—General opinion among the citizens is that the population of Moncton is from 1,000 to 1,500 larger than the figures shown by recent census. The master came up at a meeting of the board of trade tonight and the school census.

LAW SCHOOL OPEN FOR ANOTHER YEAR
Wednesday, Nov. 15. The opening of the King's College Law School for the twentieth year took place yesterday afternoon in the Pugsley building, and, judging from the large attendance of students, the scholastic year of 1911-12 promises to be one of the most successful in the history of this institution. In keeping with custom, the dean of the school, Dr. Alward, K. C., presided, and after outlining the year's programme of lectures, delivered an excellent address in which he exhorted the students to put forth every effort to make the best of the many advantages at their disposal and incidentally to do their part in keeping up the high standards of the school. Dr. Alward referred to the fact that the opening of this year marked the entrance of the school on the twentieth year of its existence, and briefly sketched the excellent work which had been accomplished by the school during that time. 'It was on Oct. 8, 1892,' he said, 'that the school was first opened here and the teaching faculty at that time numbered only three distinguished lawyers as the late Hon. A. G. Blair, Dr. Pugsley, L. Allen Jack, the late Recorder Skinner, Hon. J. D. Hazen, Dr. T. D. Walker, Dr. Curran, A. E. McIntyre and the late Dr. Earle, the late Judge Palmer and the late Judge King.' Of that board, he said, that he and Dr. T. D. Walker alone were members of the present teaching faculty. In the nineteen years of its existence seventy barristers were graduated from the institution, receiving the degree of B. C. L., while thirty others took special courses. The advantages which the school offered, he said, were very great and could only be fully appreciated by those who were cognizant of the many difficulties which the law student of some thirty or forty years ago had to contend with. Having no systematic course of procedure or special examinations as existed today, the students were left to grope for themselves and their pathway to the goal of success was by no means a easy one. He pointed out how the students of King's College Law School were especially fortunate in having as their instructors men who not only

WAS CANCER OF THE NECKLESS
'Fruit-a-lives' Completely Restored Me
Sydney Mines, N.S., Jan. 25th, 1910. For many years, I suffered tortures from indigestion and dyspepsia. Two years ago, I was so bad that I vomited my food. I also suffered with constipation. I consulted physicians, and medicine gave only temporary relief. I read in the 'Morning Post' about 'Fruit-a-lives' and I decided to try it. After taking three boxes, I found a great change for the better, and now I can say 'Fruit-a-lives' has entirely cured me when every other treatment failed, and I recently said 'Thank God for 'Fruit-a-lives'.' EDWIN ORAM, Sr. 'Fruit-a-lives' strengthens the stomach, increases the actual quantity of gastric juice in the stomach and ensures complete digestion of all sensible food. 'Fruit-a-lives' is the only medicine for indigestion, constipation, and flatulency. A box, 6 for \$2.00, or trial size, 25c. All dealers, or from Fruit-a-lives Limited, Ottawa.

FIVE THOUSAND SEEK SHELTER IN VARIOUS PLACES EACH NIGHT
LONDON, Nov. 1.—Visitors to London who have been astonished and annoyed by the host of whining and repulsive beggars which infests the streets, will be spared this harrowing of their feelings in future and incidentally the professional 'down and out' is going to have an uncomfortable time of it. John Burns, president of the local government board, which has control of the official poor relief agencies, acting in conjunction with the heads of the metropolitan police and the managers of the various private charities dealing with the homeless and vagrant class has begun the compilation of a 'beggars' blacklist' as a preliminary step to the co-ordination of all the public and private relief agencies. Already more than a thousand persons are on the list, and it is being added to daily. When it is complete, the police will begin a vigorous campaign against the professional beggars and vagrants. At present a clever-work-shy can manage pretty well in London. There are dozens of places where you can get free meals, if he can't get the price of them and he can sleep one night at the Salvation Army shelter, the next at the Church Army hostel, and so on. At present magistrates hesitate to send men to jail for vagrancy because the hard luck story they tell may be true. Under the new scheme every patron of these free hotels will be reported every morning to the general authority set up by the local government board and if for generally hard up people avoiding the workhouse casual wards these institutions are to be levelled up to a common standard: they will be clean and warm, and the food will be of good quality. A fair but not excessive amount of work will be demanded in the morning, but anyone who feels physically unfit for it may appeal to the workhouse doctor for exemption. Early this year, the London County Council took a census which showed that on that particular night there were 6,416 of them were in the casual wards, while 1,026 were sheltered in the streets and the rest were in the free shelters supplied by the local government board. The preliminary work in connection with this scheme has been done by the Local Welfare Association whose secretary is A. H. Paterson. 'At present,' said Mr. Paterson, 'any destitute person has a legal right to claim food and shelter at the casual wards of the workhouse, but, owing partly to the wretched condition of some of them and in the case of the beggar type a horror of work of any sort, that right is claimed only by a small proportion of the total number of persons requiring it. There is absolutely no effective method of dealing with these thousands of permanent loafers and idlers of both sexes who are an intolerable nuisance to the whole public, themselves included. What we are aiming at is to institute permanent detention colonies to which the police should have the power to send all the men they know to be irreclaimable. This compulsory measure is an ideal of the future, but we feel that it will be the logical outcome of John Burns' present step. The many voluntary agencies which assist the deserving cases are to receive official recognition and support. The police will have orders to sort out all the persons who find in different grades and send them to their respective agencies. This is a reform which cannot be over-rated, because every social reformer knows only too well that the main thing in dealing with the destitute is to get hold of them quickly before they sink into the mire and become hopeless.'

OF INTEREST TO WOMEN
Lemon peel and orange peel, dried, make a good substitute for kumquat. A handful thrown into a drying fire will revive it at once. If you ever tried calf tongue? It is smaller than the usual tongue, correspondingly delicate; also cheaper and boils more quickly. To clean deanters—Mix half a gill of vinegar with a handful of salt. Put a little in each deanter and shake well. Rinse in clear water. Arrowroot is excellent for thickening sauces made of fruit juices, as it neither alters the nature of the liquid, nor destroys the flavor of the fruit. Stagnant water in a kitchen boiler often leaves a sediment, especially in rainy weather, where there is a poor filter plant in the city water supply. In making tomato soup with milk, always put the soda in the milk before putting the tomatoes and milk together, and your soup will never curdle. Always remove the cake of fat that settles on the top of cold soups; if allowed to remain the soup will turn sour more quickly than it otherwise would. When reading or sewing by lamp light a sheet of white paper is placed under the lamp it will be found that a far stronger light is shed all over the room. A chafin device for moving a stove is to take a new broom, raising the stove from the base, place it upon the broom and push the broom and saw it by the handle. A piece of sandpaper, kept for the purpose of scouring pans and kettles in which something has been scorched, is very helpful. It keeps them bright and smooth. A small pinch of carbonate of soda in the water in which cabbage is boiled preserves the color of the vegetable and lessens the unpleasant odor while cooking. It is especially useful to understand that stomach purifiers may be death to germs; they are equally death to the pipes, and plumber bills follow. Small pearl buttons are much better than cheap collar buttons. Sew them on the neckband of the waist and button the collar over them the same as over a collar button. Bell radishes are dainty. Cut them into rounds about half an inch thick, boil ten minutes in slightly salted water, and lay in butter until tender. They should be highly seasoned. At the approach of cold weather it is important to have the plumbing thoroughly inspected. A bad break is more considerably repaired now than with the thermometer at zero. A pinch of soda in the fruit jar after being washed will sweeten it. This, of course, is to be put in the jar before being highly seasoned and leaving it sweet and free from odor. For leather of chairs that is rubbed or worn or looking shabby, the white of an egg is excellent. Apply it with a soft rag, when the leather will not only be restored but wear longer. For use in an ironing-boards a piece of leather cut from the top of an old shoe will protect the hand from the heat, also save callous spots from the grip if one uses the patent handle iron. Pear stains may be removed from any fabric by saturating with turpentine, then rubbing with glycerine, and finally with one of the worst of stains may be removed in the same manner. A teaspoonful of warm honey taken every twenty minutes near a surprising effect on catarrh. Honey should always be kept handy, as it is invaluable in cases of illness caused by catching cold. If fringed napkins look worn because they are soiled at the ends, it is only to draw a few threads and hemstitch the napkins. They will make very attractive doilies and will last a long time. The best napkins are made by putting a tablespoonful of lemon juice in a cup of hot water. It removes stains from fingers and nails and softens the cuticle about the nails and around the cuticle. Care should be taken in drying bread to be used for crumbs. Do not let it remain in the oven long enough to brown, for such a crust is often found in oven-baked crumbs will not brown when frying. To remove wrinkles from clothes, hang the articles in the bathroom, with the door and windows, open, and let the steam from the hot water to fill the room with steam and leave the clothes for an hour or two. Dry in the open air, if possible.

THIS BROADCLOTH SUIT ONLY \$5.50
Black or Navy Blue
Express Charges Prepaid by Us
Nobby Ladies' Suit made of very good quality broadcloth, each semi-fitted back, coat sleeves and collar are beautifully trimmed and outlined with heavy silk braid. Finished with trimming buttons. Court Martial
Speedy Verdict
of the Wreck -
Officer and
McDonald to
Turn.
Halifax, Nov. 15.—Lieutenant Graham was today court martial of causing the stranding of the ship on July 10 last, on the Cape Sable. He was reprimanded. Lord Alister was the watch up to the time of the stranding. The proceedings began on Sunday and lasted until 6.50 p.m. Witnesses included Capt. MacDonald, of the Niagara going lieutenant, James whom are charged with the stranding of the ship. While the evidence of absence of any deliberate part of the accused, it is not clear that he should have been as he should have been. He was well aware of the Cape Sable lights and should be discernible when this passed and if seen he did not intimate to Commander a navigating officer. Graham's Defence. Lieutenant Lord Alister presenting his defence, was assisted by Mr. G. Macdonald, of the Niagara. He stated that the stranding of the ship was the result of a misunderstanding of the watch officer's orders. He stated that the watch officer, James, was under the impression that the lights were not visible. He stated that the ship was not sighted at all. The ship was on her port side of the lights. The compass was south 74 degrees. The ship was not given to the officer in writing to frequently on her course by standing the officer on the position of the ship. The ship's position in the accident was not a buoy. It was a buoy. It was a buoy. It was a buoy. It was a buoy.
