

### National research gives u of s power

Canada's powerful new linear accelerator will be located at the University of Saskatchewan.

The unit, to cost \$750,000, will be paid for by the National Research Council. The university will provide the building.

At present there are four accelerators in use at Canadian universities and one under construction. So far the universities have been using the Van de Graafs type. The linear electron accelerator is a new departure.

The National Research Council wants first class equipment and facilities in Canada so that qualified graduate students will remain here rather than go to the US or other countries.

What a **REFRESHING NEW FEELING**

... what a special zing you get from Coke. It's do-se-do and away we go for the cold crisp taste and lively lift of Coca-Cola!

Ask for "Coke" or "Coca-Cola"—both trade-marks mean the product of Coca-Cola Ltd.—the world's best-loved sparkling drink.
