

the Corporation of Arpentours-Geometres of the Province of Quebec.

I have therefore the honour to request that you will be so good as to cause such instructions as it may be considered necessary to be issued by the Department of Crown Lands for the survey of the Reserves in question, and that you will be good enough also to inform me whether they can now, as they could have been in 1766, be located at any point along the St. Lawrence from La Tuque to Weymouthachinane on either side of the river. I should also be glad to receive from you, with the instructions referred to, a map of the St. Lawrence territory, showing, distinctly marked, the area within which the two Reserves proposed to be surveyed may be located.

The Reserve for the Abonakis of Quebec and St. Francis will not be surveyed at present.

Deputy Minister of
Indian Affairs.
