

13618

From my own experience as well as from my general observation I think, that much better work can be obtained when there is the limitation provided in the legislation.

I am afraid that my observations are very general in their nature. If there are any specific points you would like to ask me about, I will be glad to answer them if possible. I regret that I have not the time available to go into the working of the Act section by section, and so I give these general answers for what they are worth.

Yours very truly,
