

land, and have enjoyed the freedom of our institutions and our laws, should avail themselves of the protection given them by that very freedom and those very laws to undermine the power of the land they have sworn to defend. Yet, such is the fact. They are so short-sighted and their skulls are so thick that they cannot discern the difference between freedom of thought and action, and German Kultur or German efficiency.

It is not necessary to enter into a dissertation here upon the German point of view, because those who read this book have, I take it, long since settled in their minds the absolute unrighteousness of the German proposition and the corresponding righteousness of that for which the Allies are contending, and if by chance the tale should fall into the hands of any of the proponents of Kultur, they would not understand the explanation if I made it.

So, I say, if any of these human snakes cross your path and their traitorous activities, either through the spoken word or the disloyal action, come under your observation, it is just as vital,
