

four storeys, besides the basement, and will accommodate sixty boarders. It will be equipped with every modern convenience, is in easy reach of Toronto by trolley, and yet has all the advantages of the country.

One of the distinctive features of St. Alban's is the special attention that is given to individual pupils. It has been the policy of the School to have the instruction given in small classes. Much better work can be done in classes of from ten to twenty pupils than when the classes have from thirty to fifty pupils. By having a sufficiently large teaching staff, the classes can be kept small, and thus the work of each pupil can be carefully supervised by the master. Pupils need never be kept marking time for lack of attention. This advantage is shown by the age at which St. Alban's boys are fitted for matriculation. For several years our boys who have gone up for the examinations have averaged less than sixteen years.

COURSE OF INSTRUCTION

The Course of Instruction covers all that is necessary for candidates preparing for Matriculation Examinations in the Universities of the Dominion, and the Royal Military College, Kingston, Ont.

Classics, Mathematics, Modern Languages, Physical Science, Divinity, Shorthand, Bookkeeping, Drawing, Music (vocal and instrumental) and Military Drill, are all taught as part of the regular curriculum.

Special attention is given to boys wishing to enter into commercial life.

The School is divided into an Upper and Lower School; the latter being preparatory to the former. Boys are received into the Lower School when they are able to read and write.

A Confirmation Class is held annually in the School after Easter for pupils, who are presented to the Bishop in the Cathedral during the month of June.

A class in Carpentry is carried on during the Winter months, a room being specially fitted up with benches for that purpose.
