

A. O. Norton, Boston, Mass., U. S. A., and Coatlicook, P. Q., Canada.

The Norton Journal Jacks weigh about one-third and cost about one-fourth as much as Hydraulics of same capacity, for same purpose.

All our Screw Jacks can be used in any position, flat for pushing or bottom up, if necessary.

The cost for maintenance and repairs on all Jacks in use for past four years averages less than 1 per cent. per annum.

We will guarantee to keep our Jacks in perfect working order for five years for one-half what it costs for alcohol alone, for Hydraulics of same capacity and service.

Manufactured by **A. O. NORTON,**

OFFICE AND FACTORY, 167 OLIVER STREET, BOSTON, MASS.

We do not publish testimonials, but having hundreds of such, we will be pleased to furnish AT ANY TIME the HIGHEST REFERENCES, both from railroads and from users of our Jacks in all kinds of service.
