28	Tues.	47	40	44	40	7 57	2 2	style.			

FEBRUARY.—It is most likely that the Ontario Act for the draining of lands will prove highly beneficial to the country at comparatively small cost. But let not the agriculturists of Canada depend on acts of parliament for their improvement or the improvement of their estates. More attention must be paid practically to the matter of drainage. We are happy to know that this is the case. Exercise skill and judgment in the application of labour and capital. It is proved by large experience that the expenses incurred in careful drainage are soon restored to the farmer in the increase of his produce and the health of his stock.
