

## ONLY A Common Cold

**BUT IT BECOMES A SERIOUS MATTER IF NEGLECTED. PNEUMONIA, BRONCHITIS, ASTHMA, CATARRH or CONSUMPTION IS THE RESULT.**

Get rid of it at once by taking

### Dr. Wood's Norway Pine Syrup

Obstinate coughs yield to its grateful soothing action, and in the racking, persistent cough, often present in Consumptive cases, it gives prompt and sure relief. In Asthma and Bronchitis it is a successful remedy, rendering breathing easy and natural, enabling the sufferer to enjoy refreshing sleep, and often effecting a permanent cure.

We do not claim that it will cure Consumption in the advanced stages, but if taken in time it will prevent it reaching that stage, and will give the greatest relief to the poor sufferer from this terrible malady.

Be careful when purchasing to see that you get the genuine Dr. Wood's Norway Pine Syrup. Put up in a yellow wrapper, three pine trees the trade mark.

Mr. Wm. O. Jenkins, Spring Lake, Alta., writes: "I had a very bad cold settled on my lungs. I bought two bottles of Dr. Wood's Norway Pine Syrup but it only required one to cure me. I have never met with any other medicine as good."

Price 25 cts. at all dealers.

**Shorthorns**—Sweepstakes herd at Wallacestown, Bodney, Ridge-town, and Highgate, 1907. We have for sale at reasonable prices 3 choice young bulls, 1 red and 2 roans, of grand type and quality. ## GOSSIP.

It is most desirable, says the London Live-stock Journal, that the support of breeders, feeders, and the public generally, should continue to be extended to the fat-stock shows. There never was a time when it was more necessary and important that every possible stimulus should be given to the skillful breeding and feeding of cattle, sheep and pigs. The perfected specimens exhibited demonstrate the capabilities in flesh production of the various breeds. They are not put forward merely as commercial stock, which can be seen any day. They are the result of careful breeding and feeding, and indicate where the farmer should go if he wishes to have the kind of stock calculated to improve his own animals and to enable him to hold his own in face of competition.

A feature of the trade in milch cows at the Chicago Stock-yards, and in all the region tributary to that great market, is the demand for large cows of the milking Shorthorn type. These cows, showing plenty of size, are eagerly bought at long prices by the dealers from New York and Pennsylvania. Newly-calved, or well along in calf, such cows elicit the strongest competition. The dealers explain the demand for them by saying that, as the Eastern dairyman no longer makes any attempt to rear his own heifers into profit, he must have something that will yield a remunerative flow of milk for a time, and then fatten readily into beef that brings a good price. This combination is found in the Shorthorn type of cow, which is bringing as much as any other sort of distinctive dairy breeding.

Mr. J. Ernest Kerr, of Harviestoun Castle, Dollar, Scotland, has added to his other live-stock enterprises a herd of Shorthorns. He has purchased from Mr. Wm. Duthie, as a foundation, five well-bred heifer calves. One of these is a Princess Royal of red color, by Bapton Favorite, out of Princess Royal 65th. Bapton Favorite, it will be remembered, was sold at the Uppermill sale for £1,260, while the dam is the dam of the highest-priced two-year-old heifer (£240) and the highest-priced yearling heifer (£336) at the Uppermill sale, where her sister, only seven months old, made £346 10s. The Missie representative is a white, by Pride of Avon, seven gets of which at the last Collynie sale averaged £450. The sire of her dam is Scottish Champion. The other families represented in the group are the Roan Ladies, the Golden Drops, and the Butterflies. The Roan Lady calf is by Scottish Fancy; the Golden Drop one by Strowan Champion; and the Butterfly one by Captain Webb. The pedigrees are all of the best, and the heifers are a correspondingly choice lot, the last three mentioned being roans.

The first winter in a colt's life is an all-important time, and if the colt is neglected then, by want of food, or exposure, or too close confinement, the loss can never be regained. Therefore, the aim should be to keep the colt in good, growing condition, by liberal feeding and plenty of exercise. It should have three quarts of crushed oats per day, mixed with an equal quantity of bran, and all the good hay it will eat; and, unless very stormy, it should have at least three hours' exercise every day in a yard or paddock. The most successful horse-breeders always feed their colts well, and give them plenty of exercise, especially during the first winter. They know that the surest way to ruin a colt is to keep it in a close box or stall all the winter; and that exercise is all important, as it grows bone and hardens the muscle. Examine the colt's feet, also, and keep the toes from growing long by rasping the hoof into shape, as this must be done before putting the colt on to pasture, when, if neglected, the hoof breaks up. Many a horse goes through life with poor feet because they were not properly attended to at this period.

## Salem Herd of Shorthorns

The number of important premiums won by this herd is excelled by no other. It has placed herd headers that have earned distinction for their buyers in many leading herds of the United States and Canada. At present there are a number of this kind for sale; also some high-class heifers. They are bred, fed and priced to the advantage of buyers.

## LIVINGSTON'S OIL CAKE MEAL

OLD PROCESS

Nothing is better for fattening steers quickly and putting them on the market in prime condition than Oil Cake Meal. Thousands of Canadian and English stockmen use Livingston's, and would have no other. It is equally good for milk cows. They give more and better milk when fed Livingston's Oil Cake Meal. Also used for horses, sheep and hogs. Write for information regarding prices, etc., etc.
