

## Galt Shingles

ANY progressive minded, unprejudiced man must admit that as a roofing material for any building, public or private, slate has only one advantage—durability. It is not water-tight. It is very expensive to lay and more expensive to repair. Its immense weight necessitates a heavy roof-frame and massive walls.

And you can't concede even permanence to slate in comparison with "GALT" Steel Shingles. I on tyou think that a roof which keeps out snow and rain, is handsome and dignified in appearance and fire and lightning proof for 50 years is a better investment than one that leaks for three hundred? That's what a roof of "GALT" Shingles does. They are easily laid by any man and will last indefinitely without any attention whatever. Locks or seams are automatic and complete in each sheet—no trimming, punching or soldering required. "GALT" Shingles are the result of years of study and effort to produce for a reasonable price, a practical roofing material suitable for all classes of buildings.

Our free booklet "Roofing Economy" fresh from the press tells all about this modern roofing. Name and address? 17

H. SMITH, HAY P. O., ONT. FARM VICTORIA PARKER ON G. T. R.

## QUESTIONS AND ANSWERS. Miscellaneous.

### WARTS ON PERSON'S FACE.

I have been troubled with a number of warts on my face. Can you please tell me what will kill them? C. B.

Ans.—Our veterinary editor declines to prescribe for this case. Consult a physician.

### CAPPED HOCK.

I have a mare with a small capped hock; has been on about two months. Can it be removed by severe blistering? OLD SUBSCRIBER.

Ans.—The enlargement may be reduced some by rubbing a little of the following liniment well in once daily, viz.: Four drams each of iodine and iodide of potassium, mixed with 4 ounces each of alcohol and glycerine. Repeatedly blistering the parts is sometimes practical instead of using the liniment.

### CANADIAN CENSUS.

1. What was the population of Canada at the last census?
  2. When was it taken?
  3. How much has it been increasing each year?
  4. How much do you think it is now?
  5. When is the next census to be taken? Please publish this in "The Farmer's Advocate" as soon as possible. W. W.
- Ans.—1 and 2. The population of Canada at the last census, taken in 1901, was 5,371,315.
- 3 and 4. The population is now estimated at 7,500,000, increasing at the rate of two to three hundred thousand a year.
5. The next census is to be taken in 1911.

### SCHOOL TRUSTEES.

1. Who has power to unseat a trustee for receiving pay for school work, the ratepayers or the inspector?
2. Is it legal for a trustee to have a say in hiring a teacher after receiving pay?
3. When is the proper time to demand a poll for school trustees, and how?

FARMER'S SON.

Ontario.  
Ans.—1. Ratepayers.  
2. No.  
3. At the meeting for the election of trustees, and by demand made by any two ratepayers upon the chairman within ten minutes after the result of a vote has been declared by him.

### Veterinary.

#### TUMORS.

Cow has half a dozen lumps under the skin in her udder. They vary in size from that of a pea to that of a hickory-nut. They are not sore, but are growing. W. A. H.

Ans.—These are little tumors. They should be carefully dissected out, and the raw surfaces dressed three times daily until healed, with a five-per-cent. solution of carbolic acid. While it would be wise to get a veterinarian to operate, an amateur with some skill with the knife may do it. The cow must be cast and secured. Then catch a tumor between the thumb and finger of the left hand, and, with the knife in the right hand, cut through skin and tumor. Then carefully dissect each half of tumor from skin. Hands, instruments, and the seats of operation, must all be thoroughly disinfected with say, a five-per-cent. solution of creolin, before operating. External application will do no good. An operation is necessary. V.

#### SWELLING IN HEAD.

During the last few days a hard swelling as thick as a man's hand has appeared on my cow's head, partly on the upper and partly on lower jaw. She is an old cow, and will be due to calve in March. Would treatment affect the quality of the beef? F. H. W.

Ans.—This was probably caused by an injury. Bathe well frequently with hot water, and, after bathing, rub well with a liniment composed of two ounces oil of turpentine, two ounces tincture of arnica, two ounces spirits of camphor, half ounce liquor ammonia fortior, and water to make a pint. The treatment will not effect the beef, but the beef of a cow so far advanced in pregnancy is not fit for food. A.

## HAD HEART TROUBLE NERVES WERE ALL UNSTRUNG.

Wherever there is any weakness of the heart or nerves, flagging energy or physical breakdown, the use of Milburn's Heart and Nerve Pills will soon produce a healthy, strong system.

Miss Bessie Kinsley, Arkona, Ont., writes:—"It is with the greatest of pleasure I write you stating the benefit I have received by using your Milburn's Heart and Nerve Pills. This spring I was all run down and could hardly do any work. I went to a doctor and he told me I had heart trouble and that my nerves were all unstrung. I took his medicine, as he ordered me to do, but it did me no good. I was working in a printing office at the time, and my doctor said it was the type setting caused the trouble, but I thought not. My father advised me to buy a box of your pills as he had derived so much benefit from them. Before I had finished one box I noticed a great difference, and could work from morning to night with out any smothering feeling or hot flushes. I can recommend them highly to all nervous and run down people."

Price 50 cents per box, or 3 for \$1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.
