Rev. Griffith Jones, of Youngstown, Ohio, was standing in the door of a store which he conducted in his home town, when he was approached by a resident, who, knowing his fondness for a joke, asked:

"Can you sell me a yard of pork today?"

"Yes, sir," promptly answered Jones.

"How much is it?"

"Just sixpence."

Bent on carrying the joke to its end, the man paid over his sixpence.

The pastor-storekeeper went to the inside of the store and soon returned with three pig's feet. "There's one foot, and there's two feet, and there's three feet," he counted, "and anybody knows that three feet make a yard."

The customer got more than his sixpence worth telling the joke to his friends.

HEADACHES

Were Caused By A Sour Disordered Stomach

Mr. James McLaughlin, Bracebridge, Ont., writes:—"In order to let you know what Milburn's Laxa-Liver Pills have done for me, I am writing you.

"About a year ago I was troubled a great deal with a very sour disordered stomach and had terrible headaches, that were so bad I could scarcely do my work.

"One day in telling a friend who had used your pills before how I felt, she told me to try them, which I did and to my great surprise after using one vial I was greatly relieved, and when the second one was finished I was totally cured, and have not been troubled since with either my stomach or the headaches, and I feel greatly indebted, first to the friend and secondly to Milburn's Laxa-Liver Pills for the great relief I derived from their use."

Price 25c. per vial or 5 vials for \$1.00 at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

QUESTIONS AND ANSWERS. Miscellaneous.

FALL SEEDING — BUCKWHEAT IN ORCHARD.

1. Is fall seeding of timothy and clover with fall rye as a cover crop, practical?
2. At what stage in its growth should buckwheat be turned under as a fertilizer in an orchard to derive the best results?

R. F.

Ans.—1. Fall seeding of timothy is all right in Western Ontario, but fall seeding of clover is uncertain. Better sow the clover alone in spring.

2. The buckwheat should be plowed under in spring early in May. Plowing the orchard now would stimulate late wood growth, which is the very thing we seek to avoid.

HARDWOOD ASHES.

Would you kindly answer, through your valuable paper, the following: What would be the value of hardwood ashes on worn-out land; also what crop would be best to grow with them, and how much should be applied per acre? The ashes can be purchased for 5 cents per bushel.

A SUBSCRIBER.

Ans.—The value and composition of wood ashes vary so much, owing to the kinds of wood from which they are produced, the intensity of the fire and the care used in storing, that, to find their actual agricultural value necessitates their being analyzed. If they were unleached, they might contain in the neighborhood of 2 per cent. phosphoric acid and about 6 per cent. of potash. Phosphoric acid and potash are worth from 5c. to 6c. per pound, so that ashes of this composition would be worth about \$8 per ton. This may be a high estimate for your ashes, and to get at the actual value have them analyzed. Ashes give best results when applied before sowing such crops as legumes and roots. They also are valuable in orchards. Work in with harrow and cultivator. Fifty bushels per acre would be a good dressing.

TRADE TOPIC.

In towns and cities many of the business men rent their places of business rather than invest money in buying them. By so doing, they claim that they have their cash to put into their business, which gives them far greater profits than investing in buildings. Some landowners might do well to take a lesson from this, and rather than make too strenuous an effort to pay all possible down on the newly-purchased farm, often leaving them without enough ready money to properly operate their new holding, they would do better to use some of the money to increase their returns by following more thorough and up-to-date methods, and using the best machinery. Money should also be kept in sufficient quantity to ensure the working of the farm to its largest output, and, consequently, largest profit.

Hank Dobbs was noted as an "honest" horse-trader. He would not lie about a horse. He would merely suppress the truth. Incidentally he always beat the customer who dealt with him. The way he could slur over the defects and buzz about the virtues of an animal amounted to genius.

Once Hank was trying to sell a neighbor a horse that had an eye which was nearly sightless. The neighbor knew Hank would not lie outright to him, so he questioned the horse-trader as to the various points of the brute.

"How about his sight? Can he see out of both eyes?"

"Sure," said Hank, "he's got good eyes." Here he leaned forward, his eyes fairly scintillating with suppressed honesty. "One eye is particularly good."

Hank's enthusiasm for the truth had carried him too far. The deal was off.

Cecil was accustomed to hear his mother telephone for nearly everything she needed. One day as he entered the pantry, a little mouse scampered across the floor. Very much frightened, he jumped up and down screaming: "Oh, mother, phone for the cat! Please phone for the cat!"

OWNERS ARE PROUD OF I H C WAGONS

There is a certain pride in owning a wagon that you know is built of the highest quality materials obtainable—a wagon that is not only attractively finished with the best paint and varnish, but which also gives perfect service, day after day, and year after year. That's why I H C owners are so proud of their wagons.

If you want to be proud of your next wagon—choose one of these two in the I H C line—

Chatham or Petrolia

The loads they carry, the roads they traverse, and their wonderful durability make others wish they had bought a Chatham or Petrolia.

Chatham Wagons have a long record for satisfactory service in Canada. Made with hard maple axles, oak bolsters, sand boards, rims, and spokes, and oak or birch hubs—they represent the highest standard of wagon construction. When you buy a Chatham wagon it is with the assurance of getting the utmost service and satisfaction out of it.

Petrolia Wagons are constructed of first quality woodstock which is thoroughly seasoned by being air-dried. The ironing is of the very best. The inspection of each part is most rigid.

Be sure to call on the I H C local agent, get a pamphlet, and let him show you one of these wagons. If you prefer, write the International Harvester Company of America at nearest branch house for any information you want.

EASTERN CANADIAN BRANCHES:—International Harvester Company of America at Hamilton, Ont.; London, Ont.; Montreal, Que.; Ottawa, Ont.; St. John, N. B.
