

CROP INDICATIONS.

How the Fruit and the Fall Wheat Look.

THEY WILL BE FAIR TO GOOD.

Corn is backward, and Other Spring Crops Promise Well.

Meas. Robt Evans & Co., seed merchants of Hamilton, have made inquiry...

The fall wheat will be a little better than the reports indicate, as since the letters were written...

It is too early to say much of other serious crops. Hay is everywhere looking very fine, and there will be an almost unprecedented yield.

Small fruits promise fair. Strawberry is beginning to grow scarce. Currants are plentiful, but blackberries and blackberries are an average crop.

Welland—Cherries, pears and apples average; plums, half a crop; peaches, none fall wheat, quarter crop.

Welland—Cherries and plums, poor; peaches, half a crop; fall wheat, poor, not half a crop, some plowed it up.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

Welland—Cherries and plums, fair to average; peaches, half a crop; pears and apples, fair to good; fall wheat, average.

VOL. IV.—NO. 27.

Ellyth—Don't if there will be half a crop of fruit; quarter crop of fall wheat.

Zurich—Cherries, average; no plums; quarter crop peaches; pears, below average.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

Chesham—Cherries, plums and apples, average; no peaches or pears; fall wheat, about half a crop.

AROUND THE WORLD.

—Pinarof Sullivan is coming to America again with music.

—John of Fidenza, Tuscan, when Gregory X. was pope, was found by the Pope's Papal Nuncio washing up the dishes of the Franciscan monastery in which he lived.

—The Star Spangled Banner, as the nation flag of the United States, is 104 years old.

—There is every indication that summer travel and excursion parties will be heavy this summer.

—A hospital for sick leas has been established at Paris by the society with the long name.

—The pyramid of Memphis, like that of Popi, is found to have inscribed on its face a list of names.

—A mol recently broke up a pest camp near Kansas City, Mo., driving off the nurse and sick under threat of death.

—In thirty seven years the Church of England has erected 5,241 churches, and expended on church buildings \$900,000,000.

—During the last four years 470 colored blind persons have been discovered among 13,882 railway servants in England.

—Oscar Wilde—otherwise Parnis's aesthetic Postulate—is, it is reported, thinking of coming to America to lecture on art.

—As usual, Edison says he took out a patent for a new plan of storing lightning two years ago, but abandoned it as too expensive.

—The cool wet weather has killed millions of army worms. These pestiferous ravagers did not believe in Yenor, and marched with out their heads.

—It is now proposed to revise the Welsh New Testament, and a committee of Welsh divines has been appointed to consider the matter.

—When civilization advances to that point when school children shall be as carefully taught to read as to write, reform will have reached its millennium stage.

—The arrival of a baby in the family of Mr. Wray, of Branford, reminds us that, even in earliest infancy, the child is a humorist.

—The fool goes out in a sail boat when he does not know a boom from a breaker, but is soon as safe as a cork in the ocean.

—A prominent physician says that giving children plenty of water—not ice water—is the best way to prevent cholera.

—The estate of the late Rev. William Morley Funtoun is valued at \$80,000. The property was left to any benevolent institution was \$250 to the Wesleyan Missionary society.

—Eight hundred Mormon preachers are coming through the world, and the rest of the world is being converted to their faith.

—Professor DeLaurie, the inventor of the new telephone, is now working in a machine shop in London. He afterward went to college and gave special attention to chemistry and physics.

—The German patent office has adopted and issued patents for a new kind of can for collecting water. This prevents fraud, for the can is stamped with the name of the inventor.

—A Nevada man thought he'd economize and smoke up his tobacco in a pipe. The result was that he had a pipe in his mouth and a pipe in his back.

—The German patent office has adopted and issued patents for a new kind of can for collecting water. This prevents fraud, for the can is stamped with the name of the inventor.
