THE MINES OF BANNOCK CITY

ROSSLAND CAPITAL IS DEVELOP-ING THE CHRISTINA.

A Splendid Strike of Six Feet of Quartz last between the James Cooper Manu-Has Just Been Made-News of Other facturing Company, Limited, Claims Being Worked.

Bannock City, B. C., July 1.-(Special.) Situated 14 miles up the north fork of the Kettle river from Grand Forks on the main wagon road, which goes 40 miles further north to Franklin camp, this place is gradually becoming known to the mining world. It lies at the base of Pathfinder mountain, in what is known as Brown's camp. The place boasts of an excellent stopping house, known as the Headquarters Hotel, which is run by J. W. Shaw, a former Rosslander. There are also half a dozen dwelling houses. Adjoining the townsite and surrounding it in every direction, from the bank of the river to the summit of Pathfinder mountain, are mineral locations. At the time of the visit of the correspondent of the Miner there was much activity camp. He had occasion to visit many o the nearby mineral claims, and though mount of development had bee Lo large a performed or any great depth gained, there was sufficint to prove the existence of many mineral bearing ledges, mainly of quartz, and measuring from a few inchup to six and 10 feet in width. These ledges have a general trand worth have a general trend north and about \$11.000. south and dipped invariably east into the mountain at about 45 degreees. The veius are in a formation of diorite and por; 'ay-He was informed, when enquiring regarding the values that the quartz runs from a trace to as high as \$130 in gold and silver. On the surface the ore appears to be free milling. This may or may not be the case with depth.

At the present time the property at tracting the attention of those in camp. on account of a truly remarkable find o quartz, was the Christina. It is owned Kettle River Mines Limited. by the company promoted by S. Thornton Lang-ley, a well-known mining operator of and. At the time of the correspondent's visit, the men had uncovered, just immediately across Hornet creek, in what is believed to be the steep bank. extension of the 98 lead, known as the Christina east or No. 3 lead. The ledge as opened up was fully six feet in width well mineralized quartz. It was the cost of the Mother Lode group and all plant, machinery, development work, intention to run an adit tunnel, as the steepness of the mountain at that point gave every facility for mining at depth. therefore been, approximately, \$200,000. and there was about 600 feet of ground to run through.

The main development of the Christina has been confined to the west or No. 1 vein, next to the river, but it had to be abandoned on account of the water floodnel was run 25 feet, it cut through a six foot vein of quartz, in place, which was dipping into the hill. At the end of the dipping into the hill. At the end of the for the expenditure on the company's On the return of Jay F. Graves non Spectrum of the proceed on a tour ber 27, 1899, Scott wired that he heard thus follow the ore down on its dip. separate from those of the mine, had by of inspection of their Bounadry proper the government was being materially strengthened, and that therefore he A winze was started but Tork was suspended on account of the water coming in. Captain Frank D. Howe, a promin ining engineer of Spokane, who examined the property for the company, sampled this ledge with the following results: Four feet of clear quartz with little iron, \$10.50 in gold; two feet of quartz with iron, \$26.80 in gold: grab of dump sample from winze, \$6.95, and a picked sample gave \$96 in gold per ton. Other development of this ledge is a prospecting shaft 12 feet deep, apparently on the Here is shown two streaks of sulphides of a foot wide each, with a small sprinkling of pyrrhotite and chalcopyrite in the white iron. 18 Only a

1. That it is desirable to reconstruct the Company, and accordingly that the Company be wound up voluntarily and that Robert William Grigor of the City of Rossland, in the Province of British Columbia, he and he is hereby appointed of the property is gone. It is therefore certain that Mr. Wright looks for a good liquidator for the purpose of such winding

British Columbian market during the next half year. His reasons for doing-so are not probably essentially different from those advanced in the Record last month, and are in all likelihood founded upon as intimate an acquaintance with which have been prepared with the privthe market conditions prevailing as the. ity and approval of the directors of this Company.

2. That the said liquidator be and he is hereby authorized to consent to the

lowing resolutions:

registration of a new company to be named the Silver Queen Mines, Limited, with a memorandum and articles of association

3. That the draft agreement submitted

to this meeting and expressed to be made

'etween this company and its liquidator

of the one part and the Silver Queen

Mines, Limited, of the other part be and

the said liquidator be and he is hereby

authorized, pursuant to section 13 of th

Companies Winding Up Act of 1893, one

of the statutes of the Province of Brit-

ish Columbia, to enter into an agreement

with such new company (when incorporat-

ed) in the terms of such draft and to

carry the same into effect with such (if

any modifications) as they think expedi-
