Consumption Cured

An old physican retired from practice, having had placed in his hands by an East India Missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Catarrh, Asthma and all throat and Lung affections, also a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellows. Actuated by this motive and a desire to relieve human suffering, will send a copy of the prescription, free of charge, to all who desire it, this recipe in German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp, naming this paper W. NOYES, 820 Powers' Block, Rochester, N. Y.

MORTGAGEE'S SALE.

Take notice that there will be sold at public Auction, in front of the Court House in Dorchester, in the County of Westmorland, on

MONDAY, 7TH DECEMBER,

next, at two o'clock in the afternoon, under and by virtue of the power of sale contained in a certain indenture of mortgage, bearing date the third day of October, A. D., 1884, and made between Nelson W. Allen and Emma Allen, his wife of the first part, and W. Wilberforce Wells of the second part. All those lands and premises mentioned and described in the said indenture of mortgage, and also described in a deed thereof, from Ephriam Allen (3rd) to the said Nelson W. Allen, bearing date the thirty-first day of October. A. D., 1883 and duly recorded in the Westmorland County records by the number 47119, folio 198, Libro T 4 of said records; containing about eight acres of marsh and including the upland farm and premises lately occupied by the said Ephriam Allen (3rd) Default having been made in payment of the principal money and interest due upon the said mortgage.

W. WILBERFORCE WELLS. Mortgagee.

Dorchester, Nov. 26th, 1891.

FOR SALE.

The Subscriber offers for sale the place on which he resides situated on Foundry St., within quarter of a mile of the institutions and all principal points, and consisting of

10 Acres of Land with Dwelling House and Barn thereon

in a thorough good state of repair, and a never failing well of water. Possession given immediately.

CHARLES A. COLE.

Sackville, N. B., Nov. 26. tf

General News.

—A train ran off the track in Russia last week, whereby 26 persons were killed.

—No rain has fallen in Aden, Egypt, since three years ago, when the drouth of twenty-six years was broken.

—A great international horse show is being held in New York. A number of Canadian horses are being exhibited.

—A new telephone has been erected between London and Paris. The charge for use is eighty cents a minute.

—English capitalists recently purchased $150,000 worth of railroad machines in Philadelphia for Brazilian railroads.

—The Grippe is troubling Germany again. The open fall weather may mean that it will come to Canada again.

—The Anarchists of France boast of a force of about 40,000. Their leading organ, Le Pere Peinard, has a circulation of nearly 20,000. The Socialists number about one million.

—Almy has been found guilty of murdering his sweetheart at Plymouth, N. H., and has been sentenced to hang in December, 1892.

—Chicago is seriously threatened with a soft coal famine. Hotels, factories and other places using such fuel have been put to great inconvenience. It is occasioned by the miner's strike in the Indiana district.

—The consumption of ladies cigarettes in France rose from 101,900 francs to 800,000 francs last year, and the orders at the government factory are still increasing. No wonder there is an anti-tobacco society in France.

—Illuminated walking sticks are among the latest applications of electricity. A small incandescent lamp is concealed in the head of a cane and can be ignited by a spring.

—At Gunanjalo, Mexico, on Sunday, while several hundred people had assembled to witness a goat fight, a part of the amphitheatre fell, and twelve people, men and women, were killed, and nine were wounded.

—The little Greenstead, Essex county church, England, is the last Saxon timber church remaining, and the oak timbers erected in the year 1013 are still perfectly sound. The pine roof built in 1848 has, however, become rotten and dangerous, and it has been decided to build a new one in oak.

—Brazil is in the throes of a small revolution. The people have compelled President DaFonseca to abdicate in favor of Peixotto who is a favorite of the people and will abolish much of the arbitrary rubs which marked Da Fonseca's rule. Congress has been summoned for December 8th.

—The steamer Ethiopia of the Anchor line on her recent trip to New York ran into a whale. She struck his whaleship amid ships and cut him in two. The water was tinged with blood for a considerable distance from the ship.

—The warden of the San Quentin (Cal.) prison recently suspected there was trouble brewing and ordered a thorough search of the prisoners and their cells. He was surprised, however, when five revolvers and 250 cartridges were found, one 60-feet tunnel and numerous suits of clothes for disguise.

—Mr. Albert Edelmann, a Polish inventor, offers a scheme to manufacture coal which he pronounces superior in its results to either bituminous or anthracite coal, to which the world has been so long accustomed to look for its chief supply of fuel.

—The trial of the new protected cruiser "Blake" at London, last week, was successful, and the vessel will be sent out as flagship of the North American squadron. She is of 9,000 tons burden and 20,000 horse power, and is regarded as the best protected cruiser, and the fastest in the world. She made 19 knots on her trial without very high pressure. She cost $2,500,000.

—One of the new feats of the German strong man, Eugene Sandow, is called "supporting an orchestra." Sandow holds in the air a piano, a pianist and three other musicians, who play while in that position. Sandow also lifts a horse above his head, after the animal has been raised several feet from the ground by tackle. The horse is only a pony, but there is no mistaking his weight. Another of the German Hercules' new feats is turning a somersault with a fifty six pound dumbell in each hand.

—The insanity of the King of Bavaria Otto, appears to have taken the form of an illusion that he is a stork. In one of the magnificent appartments devoted to his use at the Palace of Furstenried he has labouriously constructed a gigantic nest, every stick and straw of which he has conveyed to the spot in his mouth. In that nest he squats almost the entire day with feathers stuck in his long, thick hair and beard, while he chatters in imitation of the "clappering" of a stork whenever anyone approaches. Occasionally, too, he stands on one leg, gazing vacantly straight before him, while at other times he stalks gravely about just in the same manner that he has seen the long-beaked, long-legged birds do.

Dr. T. A Slocum's
OXYGENIZED EMULSION of PURE COD LIVER OIL. They who use it - - Live. For sale by all druggists. 35 cents per bottle.

SOME DYSPEPTIC QUESTIONS.

A CAPTIOUS CATECHISM.

What's the world, rich man?—No doubt very pleasant;
But I've really no time for amusement at present.

What's the world, poor man?—In grinding employment
The missing of all that gives life its enjoyment.

What's the world soldier?—A race hardly run,
Where the prizes by favor, not merit, are won.

Whats the world parson? — A school of preferment,
Where the dean lies in wait for the bishop's interment.

What's the world doctor? — A sphere where I thrive
On the fees that fools give me to keep them alive.

What's the world, lawyer?—A court of contention,
Of knavery, folly, and things we don't mention.

What's the world author?—A masque where my brain
Plays Abel to every critical Cain.

What's the world, critic?—A mill, where I break
Many hopes on my wheel for bread and cheese sake.

What's the world, mummer?—A stage where my vanity
Basks in the "bravos" of gushing humanity.

What's the world amateur?—Where the swell throng
Give me meals in exchange for my antics and song.

What's the world, mothers? —A sorry campaign
With a limited income, and daughters all plain.

What's the world, spinister?—Where I'd buy;
But I find the demand much exceeds the supply.

What's the world, M. P.?—A plane whence to rise
To the platform of power on the ladder of lies.

What's the world, Paddy?—Beshrew, 'tis a stool
Of repentance for those who coquet with home rule.

What's the world, bobby?—Where nightly I learn
How nearly to beasts men and women can turn.

What's the world, wise man?—(On you no asperation
Dear reader) There's not one to give me his version.

—Cotsford Dick in London World.

Work of a Rain-Drop.

A single rain-drop falling upon a mountain top produces no appreciable affect, but it nevertheless does something. It may move a grain of sand from its place, or even set a pebble in motion towards the valley below; and the countless millions of rain-drops which follow it in succeeding ages will finaly succeed in wearing the mountain top away. As they roll down the mountain side, they gather into rivulets, brooks, and torrents, and their erosive force becomes greatly increased by gravitation. Another drop may fall into a crevice in the rock, there to remain until it expands in the act of freezing, and splits off a fragment, which in its turn is carried down to lower levels. Or perhaps the rain-drop as a snow-flake which, with many others, is in time consolidated into an ice field and glacier, which ploughs down the mountain side, crushing and grinding the rocks as it goes into a form which can readily be transported to lower levels by the streams of water formed by its melting.

Or perhaps the raindrop falls upon a limestone formation. A little—a very little, but still a definite quantity—of the hard rock is dissolved and carried away to the ocean, or deposited in a distant locality by the evaporation of the water. The amount dissolved by a single rain drop is almost infinitesimal, but the great caverns found in all parts of the world owe their origin to nothing but this solvent of innumerable drops of water. Even the hard enduring granite will finely crumble away, one of its constituent minerals, feldspar, become decomposed and changed into clay. The erosive power of running water and the chemical action of still water supplement each other in their great work.

That the streams and rivers of the more level districts are continually lowering the level of the land is evident to every one. The bars which are formed at the mouths of the rivers are only the earth which had been washed down from higher regions by the rushing rain-drops, and the level of the land is constantly being lowered, and in many cases, preceptibly so by this means. If any proof were needed of the action of the force in past times it would be found in the fossilized rain-prints, where the impressions made in soft mud by the drops of some ancient storm have been hardened into stone, and perserved to us so perfectly that we can tell from which direction the wind was blowing in that shower of millions of years ago.—Popular Science News.

The How of It.

How poor, how rich, how abject, how august, how complicated, how wonderful, is man: and it might be added, how "more so" is woman. With her peculiarly delicate and intense organization, she is the superlative degree of man. Even in disease she excels him, having many that he has not. She has, however, found out a grand remedial agent, for the cure of her diseases, in Dr. Pierce's Favorite Prescription; a medicine suited to her nature, made for the express cure of those diseases which affect her. It is especially effective in all weaknesses incidental to motherhood, while it is also a potent restorative tonic for the feeble and debilitated generally.

WOMEN'S COUMN.

Conducted by the Ladies of the Sackville W. C. T. U.

Extracts from Lady Somerset's Address at Tremont Temple.

Tremont Temple was thronged by the members of the W. C. T. U. and visitors. Tremont st. was blocked and on the Tremont House sidewalk was a curious crowd intently watching the pushing, struggling throng of would-be auditors. The announcement that Lady Somerset would speak served to attract many who would not otherwise have gone. The crush was so great that many were turned away.

The meeting opened at 2.30 with prayer, followed by singing, scripture reading, and a short testimonial meeting. The regular service began with singing "The Lord is My Shepard," by a quartette. Rev. Dr. Lorimer then made an appeal for contributions for the poor's Thanksgiving. Mrs. H. W. Smith of London then read from the 12th chapter of Hebrews and Mrs. Harris sang "Just As I Am." Then Mrs. N. W. Kinney spoke shortly and was followed by Lady Somerset, who gave as her text, Hebrews, xii. 24-28: "By faith, Moses when he was come to years, refused to be called the son of Pharoah's daughter, choosing rather to suffer affliction with the people of God than to enjoy the pleasures of sin for a season, esteeming the reproach of Christ greater riches than the treasure of Egypt, for he had respect unto the recompense of the reward. By faith he forsook Egypt, not fearing the wrath of the King, for he endured as seeing him who is invisible." She said:—

"If I were asked to summarize that which I believe condenses the whole secret of every great leader's history, I should go straight to these words, for in them I find the whole inspiration of every life that has been called to lead humanity. Self-sacrifice, suffering and pain—right through the ages this principle has come down to us even from the time when it was breathed in the old legend which tells how Curtius leapt into the dark chasm. No cause was ever victorious for which men and women have not lived and suffered and died, and the secret of true power for sacrifice has been that they dared to look on beyond the little, mean, paltry, despised, visible surroundings of that cause, for to their vision heaven by faith was opened.

"Refused to be called the son of Pharoah's daughter: That means that the subtle civilization of an era, the development of whose refined education we are only now beginning to grasp, offered that man all the highest advantages which the greatest social position could bring. Nurtured in the delicate luxury of a princess' palace, he had as a boy watched the poor slaves toiling under the burning sun, as he passed shaded from the tropical heat, robed in the softest silk, the day came when he learned the history of his birth. He knew that he, too, belonged to that despised, outcast race, that his place was among the brick kilns and the straw ricks. The cry of the children rang in his ears by day and by night, he could not, might not dared not stay; and as the young boy looked up to heaven and made his choice that day the shackles of Israel's slavery were rent by the answering 'Yes' that Moses gave to the call of God.

When first the women of America felt the stirring of the spirit to leave the refined seclusion of their home to go out into the saloons in the crusade which was the very heart of the temperance movement in this land, they went because crying in their ears was what rang through the middle ages: "Deus vult." They chose to suffer affliction with the people of God, and the mighty work born of that moments choice stretches to-day from the Atlantic to the Pacific. Nay, more than that, it girds the great world. Herein lies the secret of almighty power. The call is individual, the answer individual, the suffering individual. To each soul there comes the call to take its stand in the midst of suffering humanity. The choice is clear to every one at some moment in life, and on the great individual decision there may hang the destiny of thousands.

"Our battle to-day is for one cause, for one principal, for one great issue—Christ. The world is seeking a panacea for all the ills which weigh down the souls of men and women stretching out groping hands to find a remedy, and knows not perhaps that the very one it needs is here—Christ.

"Esteeming the reproach of Christ greater riches than the treasures of Egypt. We are not called upon to day to stand before a thousand eyes in the great arena, awaiting the moment when by one bound the lion or leopard shall send us into the arms of Jesus, but we are still called before a tribunal which has its tortures. They may seem very insignificant, sometimes almost imperceptible, but nevertheless there are times in which they make us quiver with agony Has it not been brought home to you that your Christianity is a bar to your attaining or retaining your position in society which is thought the very best the coterie most envied by outsiders? Do not your nearest and dearest regret sometimes the narrowness which excludes you from enjoying your privileges? What a disadvantage to your girls, what a pity you should not see that a little religion is good out that to overdo it becomes foolish exaggeration. And does not the same reproach touch our work our cause?

"My friends we need to be cut right adrift, and cast out on the great ocean of faith in God, and then we shall understand something of the wonderful power that he can give. Further, this unconpromising loyalty is in the long run, the only religion that the world recognizes—it may be after a long weary time, but surely, certainly always in the end.—Boston Daily Advertiser.

Agricultural Notes.

—The following is an extract from a circular letter addressed by the secretary of the Provincial Farmers' Association to the secretaries of the various agricultural societies;

Dear Sir,—As secretary of the Provincial Farmers Association, I beg to call the attention of your society to the following facts.

1 That the Province of New Brunswick does not produce of butter and cheese enough to supply our own markets.

2 That a large percentage placed on the market is not of that desirable quality which would ensure its sale at remunerative prices.

3 That a system of farming which involves the keeping of enough stock on the farm to consume all the fodder grown, and making possible the profitable purchase of such feedstuffs as bran and linseed and cottonseed meals must help to maintain and increase the fertility of the soil generally.

4 That dairy farming in its widest sense is such a system and will not only maintain the fertility of the soil, but will also profitably employ a large number of hands at remunerative wages for the whole year. It will also bring large cash returns. Skill in the production of a high uniform quality of butter cheese and meat and business methods in marketing, will insure top prices in both the foreign and domestic markets.

5 In order that our farmers may become skilful in turning out choice products an interest in the work must be created among them, and instructions as to the best known methods must be provided."

The secretary concludes by inviting the societies to recommend how the desired end may be best attained.

—The Ontario Bureau of Industries has issued its yearly bulletin of crops and live stock for the province. We deduce the following: The amount of fine weather was about the average. Fall wheat was above the average; the yield over the province being 25 bushels and weight 60 pounds. Spring wheat was about the average. There was less barley sown than formerly; the yield was good, but many reports say it was badly colored. Oats are reported good in some sections and very poor in others. Other grains are reported good. In roots it appears to be very much the same as in Westmorland. Turnips and potatoes grew famously but the latter were badly affected by rot. Mangels and carrots suffered in the spring from the drought but have come to the front with an average crop. In fruit the reports are at variance. From the Lake Ontario section large quantities of apples have been secured. A large part of the crop will be available for shipment. Pears, quinces and grapes were a fair crop; the latter particularly, some of the growers saying that some varieties were not picked as there was no market for them. In live stock the reports of the condition of all kinds has been unanimously good, and the fodder with the exception of beans and hay has been about the average. Hay was a light crop. The following table gives the yields per acre of the different farm crops this year and the average for the past nine years, 1882-91:

	1891.	'82-91.
Fall Wheat,	25.7	20.0
Spring Wheat,	21.0	15.8
Barley,	29.2	28.0
Oats,	40.8	35.1
Rye,	16.7	16.2
Peas,	24.4	20.8
Corn. (in the ear.)	75.9	66.1
Buckwheat,	24.2	22.6
Beans,	18.6	19.9
Potatoes,	150.1	121.2
Mangels,	513	437
Carrots,	387	357
Turnips,	546	410
Hay and clover,	.94	1.35

Farm Property has increased in value as follows, 1890, $970,927,035; 1891, $971,886,068; average value, 1882-91 $962,319,810.

—According to statistics published in Montreal the live stock export trade shows a falling off as compared with last year. The export of live cattle from Montreal this year was 109,194 head against 123,636 head for the same period last year, while only 32,042 sheep were exported, against 43,372 during the season of 1890.

—No man outside Myron Salisbury has ever bred and developed such a quartette of fast harness horses as Itol, 2.06; Margaret S. 2.12½; Homestake, 2.14½; Incas, 2.14½.

—Roseberry, the famous jumping horse, fell Friday at Chicago in an attempt to beat the world's record at the fat stock show and injured his back, died of paralysis as the result last night. He could jump 7 feet 8 inches high.

A Tree Over Five Thousand Years Old.

There is an African tree called the baobab, which lives to be thousands of years old. Humboldt calls it 'the oldest organic monument on our planet.' One specimen of it that was carefully examined by an English botanist proved to be 5,150 years old. At least that was the usual test for determining the lives of trees. The particular tree was thirty feet in diameter, and the spread of its branches was enormous.

"Dyspeptiome," astonishes chronic dyspeptics. Dyspepticure differs wholly from all other remedies, it is taken but once a day, at bedtime. The wonderful relief from its use astonishes chronic dyspeptics.
