MARKETS AND FINANCE

Saturday, April 27.—The meat market at nine o'clock this morning was absolutely bare, but this was the result of a small run earlier in the morning. To start with there were not many farmens in and the small loads they brought did not equal the supply, as it was. Green stuff ran about the same and other produce on the market was unchanged. Eggs and butter were a little easier.

Bradstreet's Trade Review

Montreal-There is no lack of activity in several lines of trade here. Retail stocks are showing a better movement following unon warmer weather. It is impossible however, to speak of wholesale trade conditions without referring sgain to the difficulty ox meterine again to the difficulty ox many such feeble minded ness, but judging from the recent issues of organs of both sides of politics, it is not the label from the case in textiles for whether the sale have improved during the past week and there has also been some improvement noted in collections here. The fall business in drygood is torning out well. As regards summer lines the wind-up of last season left hand. This would help public morality against the summer lines the wind-up of last season left hand. This would help public morality against the summer lines the wind-up of last season left hand. This would help public morality against the summer lines the wind-up of last season left hand the comment on public life to J. S. Metcalfe for the construction of a two-minded transport of the case. The fall business in the oven to bake, and while a bauty.—Fall Mall Gazette.

A good rule, if it could be adopted, would be to condemn only such things in our opponents as we condemn in our friends. This would help public morality against the summer of the condemn on our public life to J. S. Metcalfe for the construction of a two-million-bushel elevator of Tiffin, well, the other afternoon, while the girl was away, she put a pan of "Hall hall hall" roared the guests, and the properties of the case is not to be griefed over. The form of the earliest hours of sleep. by the wary, has been library for a beauty sleep. It was also been some improvement to bake and the early the deepest hours of sleep. by the wary, has been library for a beauty sleep. It was also

have been advanced. Hardware is moving briskly. Orders for paints, oils and the smaller goods are coming in very freely and heavy lines are active and firm. Figure is a smaller goods are coming in very freely and heavy lines are active and firm. Figure is higher while boiler plate is easier on account of the removing of the duty on English and American goods.

Toronto—All branches of trade here report a continuation of the unusual activity which has prevailed throughout of siles, cottons, and wools especially the state of the siles, cottons, and wools especially to state of the siles, cottons, and wools especially firm of the substances doing in fall lines of the demand for metals and for heavy hardware generally is brisk and prices generally firm directed are more active owing to the opening with other markets. Dried fruits are firm and the demand for tests brisk. Deliveries of country produce are light, owing to spring roads. Butter and cheese is firm. Hides and skins are quick with prices steady to easy. Tallow prices are expected to go lower. Wool also is taking an easier turn following foreign markets. Foreign fruits are active. Southern vegetables are scarce and firm.

Winnipes—Owing to improvement in weather conditions trade prospects throughout the West fiave brightened up considerating the past week. There had been some fear that continued cold weather would interfere with seeding operations and perhaps lower the total acreage to be put to crops, but things have taken on a better conditions true of the conditions true of the conditions true in the coal mines involved the category of the conditions true in the coal mines involved the center of inter-

erops, but things have taken on a better aspearance and it is contidertly expected the total acreage will this year show a very considerable increase.

Vancouver and Victoria-The situation in the coal mines provides the centre of interest in affairs here. For a long time trouble has been brewing in the British Columbia mines and it is only lately that matters have come to a head. The mine owners have announced a reduction in wages and the miners have comes down for the time being. If this trouble should continue the result will be disastrous to trade throughout all the West. The lumber trade continues exceedingly busy and values are firm. Quebec-drade conditions are unchanged from that of the proceedings busy and values are firm. The outlook, however, is encouraging. The arrival control of the province.

COBALT NOTES.

In Nipissing mine the force has been in-created to 600 men. Bungalows have been built for their accommodation. Most of the staff will be used in prospecting the many acres of the untouched property owned by

The Larder Lake stampeds still continue and is growing from day to day. Excitement runs high owing to the statement and reports from mining engineers and miner coming out regarding the wonderful find and strikes made in that districts

The Biue Bell Company started two large crews of men from Toronto yesterday with complete outfits for establishing camps and commencing active development, preparatory to installing 12 stamp mills upon their properties, which are reported to be marvelously rich.

T. Hays and Son. Toronto, gave out the results of an assay of some over then from the property of the flaruard Point Gold Mining Consupany at Larder Lake. The ore per ton.

Three veins have been located on the broperty of the Big Hen Cobait Mining Com-tonia. The finds were made on the northeast corner of the claim adjoining the Green-Mechan. The veins comprise niccolite and on the property.

extended from April 15 to May 15.

Mr. H. Dreany, who has been engaged in securing information aboupt geological situation around the Larder Lake district, and yesterday that the old formation of granite had been broken up, and this was intediarded with infusions of the later formations of iluronian in beits 20 miles wide. Large some of gold-bearing one, principally quartances of gold-bearing one, principally quartances of gold-bearing one, principally quartances of gold-bearing one, principally quartances, along these contracts in close proximity to disbase and conglomerate. Breaking away from these, were vents filled with quartz, pophyry and schists. A peculiar feature was that the velas had carbonate of lime or calcites in the quartz. Owing to the proximity of the lishness rock, which differed from granite in having cubes of lime, instead of subes of quartz. College of Dental Surgeons received degrees and diplomas last night at a special convocation of the University of Toronto, held in the Y. W. C. Guild Hall in that city.

On the platform were members of the faculty of the Dental College and several of the leading heads of the university, amongst whom was Acting President Dr. Maurice Hutton, who delivered an opening address.

Dr. J. B. Willmott, secretary of the Board of Directors of the college, introduced the candidates to Dr. R. B. Burt, of Hamilton, president of the board, who conferred the degrees of licentiate of dental surgery. The degree of doctor of dental surgery was conferred by President Hutton.

Dr. W. Heyles, K.C. principal of

revening.

Those on whom degrees were conferred are: Messrs. William A. Black, Basil E. Brownlee, Richard M. Chambers, Joseph C. Crawford, James A. Drummond, Edgar A. Dolson, Horace F. Goodfellow, Robert A. Dolson, Horace F. Goodfellow, Robert M. Graham, John Grassie, Kenneth E. Halnan, Arthur H. Hertel, George N. Howden, Ashley W. Lindsay, Frederick J. McMahon, †vivan C. Marshall, Lessie A. Maxwell, Alexander W. Muir, Robert J. Mumford, Arthur E. Proctor, Ernest F. Risdon, William J. Sandere, Willmott B. Steed, Frederick E. Warriner. The convocation was closed with prayer by Professor R. P. Bowles, of Victoria College.

LARDER LAKE GOLD

BLUE BELL PUSHING AHEAD

New Liskeard, Ont., April 26 .- The Larder Lake stampede still continues, and is growing from day to day. Excitement runs high owing to the statements and reports from mining engineers and miners coming out of the wonderful finds and strikes made in

wonderful finds and strikes made in that district.

The Blue Bell Company started two large crews of men from here to-day, with complete outfits for establishing camps and commencing active development, preparatory to installing twelve stamp mills upon their properties, which are reported to be marvellously rich. It is claimed this company will be the first to send out gold and that the results will astonish the outside world.

ELECTION OF OFFICERS.

INTERNATIONAL LODGE, L O. G. T., CHOOSES A NEW SET

At the meeting of the International Lodge, held in the C. O. F. Hall last evening the following officers were

ected for the ensuing term: W. Diack, Past Chief Templar. J. Porteous, Chief Templar.
Mrs. R. Morison, Vice Templar.
Mrs. D. B. Smith, Superintendent

J. H. Taylor, Secretary. Miss Grace Priestland, Assistant Sec

retary.
A. H. Lyle, Financial Secretary.

A. H. Lyle, Financial Secretary.
D. Housego, Treasurer.
R: Johnston, Chaplain.
Miss Lily-Boniface, Musical Director.
J. W. Gilbert, Marshal.
Mrs. F. Skedden, Assistant Marshal.
Miss Winnifred Stevens, Guard.
H. Boniface, Sentinel.
F. S. Morison, Registrar.
During the evening two condidates

P. S. Morison, Registrar.

During the evening two candidates were initiated and one proposition for membership was received. The lodge will take sides during the coming quarter, and the opposing forces will be led by Miss Grace Priestland and Miss aMry Morison.

A HAMILTON MAN.

SUCCESS OF DR. RENNIE'S BROTHER IN COMMERCE IN CHINA

The Toronto Globe, in its illustrated section of this morning has an excellent likeness of Mr. A. H. Rennie, formerly of this city, who is a brother of Lieut.-Col. Rennie. The following sketch of his career is also given:
Mr. A. H. Rennie, formerly of Hamil-

Mr. A. H. Kennie, formerly of manu-ton, is a Canadian who is prospering and winning fame in the distant part of the empire. Recently Mr. Rennie open-ed an enormous flour mill at Hong Kong, where he is, manufacturing, 8,000 ed an enormous flour mill at Hong Kong, where he is manufacturing \$8,000 bags of flour dailyl with the intention of increasing it to 16,000 later on. Mr. Rennie was born in 1857, and received his early education in Toronto. He began his public life as secretary and confidential clerk to Hon. John Norquay, who was Premier and Provincial, Treasurer of Manitoba from 1885 to 1889. The grasp of public affairs which he nequired in such a school caused him to be specially selected to visit the United States and England in 1887, when a proposal was on foot to negowhen a proposal was on foot to nego-tiate a loan for Manitoba. Later he went to Hong Kong and began life there in the Public Works Department in 1890. He subsequently entered the commercial world, and the establishment of the huge mills is expected to make Hong Kong independent of Canton for its supply of flour.

Sleep and Old Age.

Breaking away from these, were veins filled with quartz, porphyry and schiefs. A peculiar feature was that the veins had carbonate of lime or calcites in the quartz. Owing to the proximity of the liabase rock, which differed from grante in having cubes of lime. Instead of subes of quartz. This class of vein should carry silver and gold combined, which have an affinity. Wherever they are thus found more permanency of deposits is assured, than other cases. Silver served to act as a smalgam for gold, and mare the considering present of the condition of the conditi

LARDER LAKE

THE GOLDEN NORTH AND THE

GOLDEN OPPORTUNITY.

The cry is now, "On to Larder Lake !"

A great stampede has set in! Thousands are on the way! They are now beating the northern trails !

What will undoubtedly prove to be the greatest stampede that has ever been known into a new gold country is now on The Larder Lake district is believed to be the richest gold

country ever known, and it is just now being opened up. will commence the most tremendous outpouring of gold-known to civilization since the days that King Solomon's mines paved the floors and walled his temple with that precious metal! People of Toronto, People of Ontario, People of Canada-

do you realize the great mineral wealth and riches that are now being opened up in Northern Ontario right before our very eyes? Do you understand that you have the richest and most wonderful gold and silver camps, rapidly developing, and that the values are increasing tremendously from day to day? Do you realize that investments of a hundred or a thousand

will grow rapidly into hundreds and thousands and millions The over-conservative and skeptical will smilethey will laugh at these predictions, some will even consider this a joke—but remember COBALT, if you please, two or three years ago! Then it was a "vision," it was a "dream," "a flash of the pan," a "bubble," somebody was "crazy"; but now it is different. Those crazy men are now classed among the smartest and keenest business men of the day. The actual value of a few mines are worth at the present date more than one hundred millions of dollars. These are facts. Larder Lake is the opportunity of a lifetime!

Are you going to let this golden opportunity pass? Are you going to get in now, in time, at Larder Lake ? You can now get in at ground-floor prices on inside properties make big profits and lots of money. Or will you wait three or four months or a year, and then fall all over yourself in an

irresistible desire to get in anywhere or at any price?

Don't wait! Be wise! Act NOW! NOW IS THE TIME! Here is an opportunity that excels that which you had two or three years ago at Cobalt. Perhaps you will say, as you did then: "How do we know they have got any silver up there?" Perhaps you say now: "How do you know there is any gold at Larder Lake?"

We say to you: Do not be so skeptical that you lose faith and confidence in all mankind.

Do you imagine for a moment that men will endure the snows and frosts of the Northern winters for fun or pleasure ?

Do you think there is any fun in living, cooking and sleeping day after day, night after night, weeks and months, upon the ice and snows of the frozen North ?

Do you think there is any great pleasure in a man trudg-ing along unbroken trails with a pack of 30 to 50 pounds on on his back when the air is clear, full of frost, and so cold and still that the creaking of every step upon the snow can be heard for a mile away ?

All the last winter men at Larder Lake have had to go to the railway station, some 12 to 15 miles away, to obtain the necessities of life. They would shoulder a pack weighing from 30 to 50 pounds and earry it back to their tent on their snowcovered gold claims.

We ask again, Can there be any pleasure in this? 'Is there pleasure or fun in frozen faces, frozen hands or frozen feet ? If you think there is, you are certainly entitled to another think. No, no! The thousands of strong men who braved the

north winds last winter around Larder Lake, who lived in their little tents upon the claims they staked, and watched and guarded as they would their lives, knew full well the treasures they were guarding! This endurance was not for pleasure, but for gold, Gold, GOLD!

Many a tired sleeper in those cold tent houses had bright and happy dreams of the future—days of happiness and plenty that were sure to come to their wives and children, sweethearts, fathers and mothers, sisters and brothers-all from the gold he had found! The gold he was guarding. Gold-pure, virgin gold! Gold that had never been bartered or used as exchange-gold that had never bought man's honor or woman's virtue. UNTAINTED GOLD.

The hardships that have been endured by the prospectors of the Larder Lake district should impress the most skeptical

that there must be something there worth while.

We were loath to believe at first. But we have gone further. We have had our own mining engineer making examinations. We have made personal observations and can say without-fear of contradiction that the gold discoveries around Larder Lake in Northern Ontario are indeed the most wonderful The profits from investments in that district will amount to hundreds of millions.

NOW is the accepted time to place money there. Values are already increasing at a remarkable rate. In our estimates of Larder Lake gold district we have not taken the items from the newspaper or hearsay reports as our basis; we have sent our own engineers and have gone there ourselves and made personal investigations. We are satisfied beyond question, from our engineer's reports and our own personal obs that the reports from that country are not exaggerated. The discoveries and conditions are as reported. Millions upon millions of gold will be produced from that district, and the outpour of the precious metal will astound the world! All busi ness and trades of Canada, especially Ontario, will be greatly benefited therefrom and thereby. Toronto will be benefited, even more so than were St. Paul, Minneapolis, Winnipeg, Seattle, and Vancouver benefited by the opening up of the great gold fields of the Klondike and Alaska. It remains to be seen, however, whether the investing public and people of Ontari and Canada grasp the situation and take advantage of this exceptional opportunity-truly a golden opportunitythe millions upon millions of honest, legitimate profits that only await the employment of their capital.

The wise, alert investor will reap the quickest and greatest

Northern Ontario is immensely rich in gold and silver— probably the richest in the world. It is just now being opened up. It is now in its infancy. You can now, as the sayin invest your money and get in on the ground floor. extend to investors an invitation to join us and participate in the profits and benefits that are sure to come to all who be-

ome interested in the Blue Bell Gold Mines, Limited. This Company owns, free of indebtedness, and with no incumbrance of any kind, 27 well-selected gold claims of this wonderful district. These claims were staked by miners—men who know a gold claim when they see it. Being identified with the Cobalt a gold claim when they see it. Being identified with the Cobart district, they were in the neighborhood of Cobalt and New Liskeard when the first strike was made. They had the pick of the district. They took their time and prospected, and se-lected with care the best there was in the field. Every claim has brought a fine showing of values. Assays showing values running as high as \$15,000 to the ton have been taken right from the surface, or you might say the very grass roots. The titles are perfect, the samples and specimens taken from the various claims show not only high values in gold, but also high values in silver and copper.

The men identified with the Blue Bell Gold Mines, Limited,

have been identified with the rise and success of Cobalt. They would not be identified with any proposition that was not legitimate, straightforward, honest and upright in every particular.

Proposition Plainly Stated.

The Underwriters' Syndicate will consist of and include all investors who join with Law and Company in subscribing for the 2,500,000 shares at Ten Cents per share.

No application to the Underwriters' Syndicate will be accepted for less than one membership (1,000 shares), which

will cost \$100.

As Son as the Underwriters' Syndicate is closed, which will be on or before May 15th, 1907. The Blue Bell Gold Mines, Limited, will at once place upon the market, through Law and Company, the first allotment of the Treasury shares of the Company at 50 cents per share.

Law & Company will advertise the Blue Bell shares throughout the Provinces of Canada and the United States in their customary vigorous manner by display advertising, they having already closed contracts with their advertising agents for large display advertising for this special flotation. This includes all the principal daily newspapers of Canada-72 in number-and 221 in the United States.

Shares will be issued proportionately share for share from the Underwriters' and Treasury shares at the price of Fifty Cents per share until all members of the syndicate have received the return of their investment therein.

Law & Company will receive the usual brokerage flotation commission of 25 per cent. for all shares sold by them, whether it be Underwriters' Syndicate shares or Treasury shares.

All moneys due the Company from shares sold out of the Treas ury will be placed to the Company's credit with their Bankers.

All moneys due the Underwriters' Syndicate from shares sold out of syndicate shares will be deposited with The Trusts and Guarantee Company, 14 King St. W., Toronto, Ont., and will be divided proportionately and in accordance with each respective interest therein. Each member of the Underwriters' Syndicate will be moon

identically the same bas.s

There will be no favors shown one over another. The large investor will have no advantage over the small. The only difference will be that the larger investor will make the larger amount of profit according to the amount invested.

The Underwriters' Syndicate will be conducted upon a sound,

straightforward, business principle, and every representation made herein will be fully carried out. The Underwriters' Syndicate proposition is simply this: Those who join us will be interested with the Organizers and Promoters in a ground-floor proposition, and will actually be the original first sellers of shares to the stock-buying public, realizing therefrom his profits

therefrom big profits.

The Blue Bell Company will install twelve stamp mills and all The Blue Bell Company will install twelve stamp mills and all additional machinery without delay. The Company expects to be sending out gold and paying dividends within three or four months.

Our Engineers advise us that they believe the Company will be able to ship out gold in quantities to pay dividends sufficient to make the shares of the Company go to Ten Dollars per share. It should be borne in mind that the Blue Bell occupies the same relative position at Larder Lake that Nipissing does at Cabalt. Its properties are in the very heart of the district, are of large acreage, and very rich in Gold and Silver.

Blue Bell will undoubtedly be the greatest shipper this suppose.

Blue Bell will undoubtedly be the greatest shipper this summer from Larder Lake. In conclusion, we desire to say to our friends and clients: "Join in conclusion, we desire to say to our arrenus and chemis: Join us in this ground-floor proposition; it is a good one, and we believe it will make you lots of money." Our advice is—TAKE AS MANY MEMBERSHIPS AS YOU POSSIBLY CAN.
