## You Can Practise Economy by

#### Buying that Suit of Clothes Now

Woolens are continually advancing in price, and the limit is not in sight yet.

It is certain that a suit made from good material will cost you much less today than it will a few months from now. Every item entering into the cost of clothing is keeping step with the upward price-march of all commodities. A suit bought this spring will save you several dollars.

The clothes I make have all the the qualities of good clothes--style--fit--workmanship--finish--service--satisfaction--value.

It is real economy to put your money into such clothes.

Come in and see me.

That Exclusive Little Star Fannie Ward

In Albert Payson Terhane's Tense Tale of New York Society and South African Diamond

The Years of Locust"

WEDDED TO A SWINDLING STOCK BROKER who is sup-posed to have committed suicide, then re-married to the man she really loved, only to have her first husband appear on the scene, is the fate of Fannie Ward in today's splendid Lasky pic-

taking the watcher from the ward in today's spiencial Lasky picture. It is a story swiftly and vividly portrayed by the camera, taking the watcher from the sumptuous and perfumed drawing rooms of fashiomable New York to the grime and dirt of South African diamond mines. The acting is tense, compelling, stirring one's heart to the very depths. In scenic treatment it is a delight to the eye, and the gowns worn by the society folk appearing are truly Parisian in modishness and diegance.
