STOMACH TROUBLE **DUE TO THIN BLOOD**

It Usually Disappears When the Blood is Made Rich and Red

Thin blood is one of the most con mon causes of stomach trouble. It affects the digestion very quickly. The glands that furnish the digestive fluids are diminished in their activity, the stomach muscles are weakened and there is a lack of nerve force. In this state of health, nothing wal more quickly restore the appetite, digestion and normal nutrition than good, rich red blood.

Dr. Williams' Pink Pills act direc ly on the blood, making it rich and red, and this enriched blood strengthens weak nerves, stimulates tired muscles and awakens to nor mal activity the glands that supply the digestive fluids. This is shown by an improved appetite, and soon the effect of these blood enriching nills is evident throughout the whole system. You find that what you eat does not distress you, and that you are vigorous instead of ir ritable and listless. If your appetite is fickle, if you have any of the distressing pains and symptoms of indigestion, you should at once take Dr. Williams' Pin k Pills and wrofit by the better condition which they will put your blood.
