

SEES CANADA AS  
BEST DEBTOR

Financial Expert Lauds the Dominion as Good Field for Investments.

Explains How Country Successfully Withstood the Results of War.

Canada, owing the United States a billion and a half dollars, is the best debtor that country has, not excepting even sturdy old Britain. The reasons for this statement constitute a shining example of what is good in foreign investment, just as much as the analysis of Jugo-Slavia typifies what is undesirable in this field.

Has Weak Points. But even Canada has her weak points to be marked with red. The fundamental questions to be considered in regard to any credit are: Will the physical resources on which it is based duly produce the means to meet all obligations involved and are the human interests to whom it is extended morally certain to keep faith in respect to those obligations.

The probabilities in the case of a nation can be determined with reasonable certainty by considering the seven basic lines of its economic life: agriculture, mining, transportation, industry, trade, finance and politics. Canada, second only to America as a wheat producer, is, with the exception possibly of Siberia, the world's greatest potential source of increased wheat supply. The crop already averages 225,000,000 bushels. With only 25,000,000 acres under cultivation, there are 250,000,000 acres more that can be developed. Many other staple products, with a sure world

## Report From Fire Underwriters Proves Too Lengthy For Council

Should the demeanor of the members of the finance committee be accepted with any degree of surety, the city council will not tarry long in its consideration of the report just issued by the Provincial Underwriters' Association, suggesting the re-establishment of No. 4 fire hall, North London.

City Clerk Sam Baker presented the lengthy document at Wednesday's session of the committee, creating but passing interest. In fact, a veritable storm of protest resounded about the chamber as the clerk threatened to read it out, clause by clause.

Why are there not sufficient copies to be passed around," questioned the councillors, and the clerk was directed to write for duplicates, if there was any concentrated rush on the city hall for the same.

"In the meanwhile this report will be there in the drawer for all who desire to consult it," reminded Mayor Wilson, and the conversation turned to other problems of seeming greater interest.

No. 4 fire hall was closed last spring as an economic measure, following Mayor Wilson's plea for a general 10 per cent reduction in all estimates.

If his worship and any of his colleagues on the finance committee are carried away to the outcome, they failed to reveal it Wednesday night.

Ingles and Canon Skye: "That with a view to the proper care of the mental defects of the province, inasmuch as they are becoming a serious menace to society for the lack of such proper care as well as for the sake of their own advantage, the Upper House concurring, this synod grants the memorial of the do-gooders for social betterment, and memorializes the provincial government of the province of Ontario to put the recommendations of the report of Mr. Justice Hodgins on the subject of the care of mental defects into immediate effect."

The report referred to provides for the formations of special classes in the public school for mental defectives, the removal of insane persons from Orillia, and the transfer thereof to mental defectives from jails, penitentiaries and other places.

Whereas a concession was made in 1863 to the religious sentiment of the Roman Catholics by granting them separate schools in the province of Ontario which concession, at the time, was understood to be final; and

Whereas representatives of the Roman Catholic hierarchy of the Province of Ontario are now seeking an amendment to the act in force in that province which would give a larger measure of support to the separate schools, which amendment would apparently inflict an injustice on non-Roman Catholics by compelling them to support sectarian schools in whose religious teachings they do not believe; and

Whereas they are also claiming the right, under the statute, to extend the present separate school system to include secondary schools, which would be a further detriment to the national school system; and

Therefore be it resolved, that the synod of the diocese of Huron emphatically protests against the proposed amendment of the assessment act and any extension of the system of separate and sectarian schools beyond that provided for by the present law.

Laud Religious Education. The synod also approved of a motion introduced by Canon G. B. Sage of London, and seconded by Rev. Charles Miles, by which the synod recommended with a view to adoption the system now in use in the public schools of London with reference to religious education. The resolution read:

That in accordance with clause (c) of the recommendations of general synod held in October, 1921, this Provincial Synod of Ontario makes the following suggestion as a temporary measure until joint action can be taken with other religious bodies:

Whereas the school board of the city of London, Ontario, has adopted for memorization a course of Scriptural selections comprising from six to fifteen verses apiece for each of the eight grades of the public school to be taken in conjunction with the Biblical passages read every morning in compliance with the school regulations, and whereas, these selections may be added at the discretion of the teacher, verses taken from other designated passages, and whereas, this course is reported by the two inspectors and teaching staff of the city of London to be working satisfactorily.

Be it resolved that this synod recommend for consideration with a view to adoption the London plan, in which the Bishop of Huron was cordially thanked for the manner in which he propounded the issue in his charge issued to the Synod of Huron, and which was published in the newspapers. The resolution was accompanied by the request that the religious education board of the Church of England print and put in circulation that portion of the charge dealing with the separate school question.

Rev. A. L. McTeer submitted to the house a statement regarding the conference of delegates from the lower house with the house of bishops, regarding their reasons for non-concurrence with the house of bishops' article, providing for the establishment of suffragan bishops. Resolutions, voting in accordance with the appreciation of the synod of the hospitality of both civic officials and citizens of London and also to the press of London.

The invitation of the city of Belleville for the next sessions of the provincial synod held there was accepted.

THE LONDON MOTOR CO. is pleased to announce that the result of the theft in Detroit Sunday last. One of the officials of the company had parked the car in front of the Hotel Tuller, and although the car was locked it was stolen before he returned. No trace of the car has been found by the police.

The last rose of summer is not here yet; but our Palm Beach suit looks like it.

## NEW RULING ON TOSEER AD OF BOTTLED WATER SUPREME COURT

District Food and Drug Inspector Notified of Regulations. Labels Must Show Origin As Domestic or Foreign.

W. E. Wilson, Dominion food and drug inspector for the London district, has been notified by the department of health at Ottawa, that hereafter, on all bottled waters (table and mineral) offered for sale in Canada, the label must distinctly state whether the water is of domestic (Canadian) or of foreign origin, and the name of the actual place of production must be clearly printed on the label, and must be distinctly labelled as "Natural" or "Artificial," the terms modified, carbonated or distilled, or other, may in certain cases, be accepted as equivalent to the term "Artificial."

A new ruling in regard to section "bottled waters" of the food and drug act of 1920, states that under the term "bottled waters" is included that class of waters, which is distinguished from the ordinary drinking water by being offered for sale in special containers, which may be bottles, kegs, barrels, siphons, etc., and by being proprietary.

An amended portion of the act says: "In some cases a well known source has come to give its name to a type of mineral water, just as in the case of wines, where the terms port, sherry, etc., imply types of wine, rather than wines of definite geographical origin."

"Thus the name Vichy, Carlsbad, Hargrave, etc., may be used as types of mineral water, just as in the case of wines, where the terms port, sherry, etc., imply types of wine, rather than wines of definite geographical origin."

"When the water is described as a certain type, e.g., Vichy type, it is required that the composition of such water as determined by analysis, shall approximate within reasonable limits the composition of the water of that type."

Mr. Wilson points that violators of the act who have offered bottled waters for sale without labels, bearing labels that are misleading, or if the contents are adulterated to the detriment of being injurious to the health, shall upon summary conviction be liable to a fine not exceeding \$200 and costs, and not less than \$50 and costs, or to imprisonment for any term not exceeding three months, or to both fine and imprisonment.
