ENGLAND WANTS EARLIER APPLES
 Ministry of Food Would Encourage Shipments.
OTTAWA IS ADVISED.
 Commissioner Smith Tells of Situation in Motherland.

OTTAWA, August 31.—(Canadian Press Dispatch).—Dealing with the crop situation in a report just made to the department of trade and commerce, J. Forsythe Smith, the Canadian fruit trade commissioner, states that early forecasts of the English apple crop situation, which were not encouraging, are fully substantiated by present indications.
 The British ministry of food has suspended the apple price control until November 15, with the obvious intention of encouraging the home industry by permitting the highest prices the market will pay during the periods in which early English apples are offered, and also with the object of attracting large supplies of early Transatlantic apples, which never come forward in as heavy supply as late varieties.

Touching on the general outlook, Mr. Smith states that the American box apple crop is estimated at 86 to 75 per cent. of last season—a shortage of 1,600 cars. The British Columbia crop will be 60 to 65 per cent.; the Nova Scotia crop 55 per cent.; the Ontario crop will show an increase and the American barrel apple crop will be substantially increased. American apples, however, will be handicapped by an adverse rate of exchange, and with the English crop practically a failure, demand should be strong and prices satisfactory.

BRANTFORD SCHOOL OPENING.
 BRANTFORD, August 31.—The formal opening of the new Master Bachel School has been set for Tuesday, September 2.

There's a Two-Fold Happiness in the Electric Washer

The Electric Washer is valued by the housewife not only for what it will do, but for what it will permit her to do.

It washes with almost unbelievable thoroughness and speed, and she can have her heaviest washing on the line by nine.

But the happiness it brings does not consist solely in doing away with the drudgery of wash day—it adds daily to the joy of living, because the home with an Electric Washer can use its fine fabrics constantly.

The Electric Washer makes clothes last many times longer than when they are rubbed on a washboard. It washes clean the most filmy, delicate things, and the thickest blankets.

It is simple to operate, and the cost of electricity is a mere trifle—about one cent for an average washing.

The Hydro Shop will be glad to give you a demonstration. When you see what the Electric Washer will do you will never again wash in the old way. And remember, it not only washes the clothes, but it wrings them in its power-driven wringer.

Convenient terms of payment can be arranged.
