The Oil of the People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

Everyone reads the "Guide-Advocate Want Column" on page 4.

### A FEW SAD WORDS

The saddest thing  
A pen can scratch:  
"I've got a smoke,  
But have no match."

The saddest words  
A wife can say:  
"I need the mon,  
Hand o'er your pay."

The saddest words  
To "pa" of ten:  
"Cheer up, old man,  
It's twins again."

The saddest blow  
To beaux, by far:  
"I want a guy  
Who has a car."

The saddest words  
That women know:  
"Good gracious, dear!  
Your wrinkles show."

These sad words oft  
Cause one to grin:  
"Please, have you got  
A safety pin?"

The saddest thing  
A man can say:  
"They nipped me on  
The O. T. A."

The saddest words  
To speeding "jays":  
"Ten dollars down  
Or thirty days!"

The saddest words  
To those who know:  
"The rent is due,  
Hand o'er your dough."

The saddest tale  
Ever was told:  
"I have to own  
I'm getting old."

The saddest touch  
For some to get:  
"How's chances for  
A cigarette?"

The saddest jolt  
To married men:  
"The baby needs  
New shoes again."

The saddest words  
That seem to scald:  
"Too bad, old man,  
You're getting bald."

### A Friend of the Family

Over fifty years ago a young physician practiced widely in Pennsylvania and became famous for his uniform success in the curing of disease. This was Dr. R. V. Pierce, who afterwards established himself in Buffalo, N. Y., and placed one of his prescriptions, which he called "Golden Medical Discovery," in the drug stores in the United States and Canada, so that the public could easily obtain this remarkable tonic, corrective, and blood-maker. Dr. Pierce manufactured this "Discovery" from roots and barks without alcohol—a corrective remedy, the ingredients of which nature had put in the fields and forests, for keeping us healthy. Introduce pure red blood into the system, and health is assured. When you feel run-down, out of sorts, blue and despondent try the energizing influence of this reliable tonic. You can obtain Golden Medical Discovery in tablet or liquid form at all drug stores, or send 10c for a trial package to Dr. Pierce's Laboratory in Buffalo, N. Y.

Camlachie will celebrate Dominion Day.

### Children Cry FOR FLETCHER'S CASTORIA

CLEANLINESS IS OUR MOTTO

IT is our intention to handle only the very best Ice Cream that we can get. Served with fresh, seasonable fruits and syrups.

BREAD, CAKES, PASTRY ALWAYS FRESH

Your Wedding will not be complete unless you have one of our beautiful Cakes.

Always bears the Signature of *Dr. H. H. Fletcher*

### BREEDING IMPROVES BEES.

Successful Experiments at Duck Island, Lake Ontario.

Nearly every domesticated animal and cultivated plant has been improved by selective breeding. With bees, however, not much progress has yet been made because of the great difficulty in isolating them. They mate in the air at some distance from the hive and it is known that the drone bee will fly for miles in search of the queen bee.

It might be thought that the busy bee could hardly be improved, but Canada contains varieties of solitary bees whose tireless industry make the honey bee appear dilatory in comparison. Besides, we know that great improvements await the bee breeder because some colonies store much more honey and are less inclined to swarm than others. Any bee-keeper would give much to have his apiary composed of such superior bees.

The Experimental Farms Branch of the Dominion Government has for some time been conducting experiments to overcome the difficulty of the isolated mating of bees. The first attempt was made on a large sandy plain near Kazabazua about forty miles north of Ottawa at a spot where no colonies of bees could be found within three miles; but the young bees produced were dark colored, showing that the queens had been mated by the local black drones. Attempts were then made to mate the queens late in the day when the undesirable drones had ceased flying and also late in the season when these drones had died. The results gave valuable information but they did not solve the problem.

Next, a part of the north country that bees have not yet reached was tried, at the Experimental Farm at Kapuskasing in Northern Ontario being selected, but here the little colonies were made restless by the great and sudden changes in temperature, and swarmed out when the queens flew.

In 1919, experiments were started on Duck Island which is situated near the eastern end of Lake Ontario, and is eight miles from the nearest island and over eleven miles from the main land. Duck Island covers only about two square miles and no bees exist upon it. The Duck Island experiments were continued in 1920 and have proven successful, twenty-seven Italian queens of selected parentage having been mated by the drones that were brought with them.

By continuing the work it is hoped to develop a strain of Italian bees that will be heavy honey producers and disinclined to swarm. Meanwhile, plans are advanced to distribute to Canadian bee-keepers a limited number of daughters of the best of the queens mated on Duck Island, and a system has been worked out by which a bee-keeper will be able to mate a proportion of the same strain.—F. W. L. Sladen, Dominion Apiarist.

### IRRITATED AND ANNOYED

Are you irritated and annoyed by itches?—Just one or two doses of DR. MILES' NERVEINE—\$1.20 will soothe the irritated and over-strained nerves. Guaranteed Safe and Sure.

For Sale by Taylor Druze Co

### Alfalfa and Sweet Clovers.

There are many farms on which it is not practicable to haul lime. In such cases alfalfa may be used, alone if the land is low and poorly drained, or mixed with red clover on the average worn farm on which red clover often fails. Alfalfa will not yield as well as red clover.

Alfalfa is the King of Forage Crops. It will under favorable conditions but it will catch and make something on many soils on which red clover would fail. It will stand a "sour" soil better than red clover will.

Sweet clover will not thrive without lime. There is no use trying it. But given lime it will grow on poorer land than any other crop to improve such land. Sweet clover can be handled in a rotation the same as red, the seed is cheaper and in many places it may well take the place of red clover while the latter seed is so expensive.

### CASTORIA

For Infants and Children  
In Use For Over 30 Years

Always bears the Signature of *Dr. H. H. Fletcher*

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unopened stomach, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

### It Will Prevent Ulcerated Throat.

At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to be relieved except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has given relief to a generation of asthmatic victims of this scourge of the bronchial tubes. It is sold everywhere.

### FALL FAIR DATES 1921

(National Crop Improvement Service.)  
"The demand for gasoline is growing day by day and economists are always prophesying that the world's supply will soon become inadequate," says Mr. C. H. Chilton, editor of the County Agent and Farm Bureau.

"Science has already taught us, however, that almost every growing plant contains alcohol which can be distilled at a very low price per gallon, and which in many respects is superior in power to gasoline."  
"There is enough waste on every farm to furnish its heat, light and power. The machinery is all available, and it is time that we should give this matter the most careful consideration. The principal difficulty of this plan will be to accumulate enough farm refuse to make the project profitable. Therefore it would be wise to have the outfit owned by some farmers' organization which will first encourage all farmers to supply a proportionate share in order that there may be sufficient material to make the plan successful."

### Cow Consumes Bulky Feeds.

When it comes to marketing grain, hay, silage, green crops, etc., the dairy cow is almost indispensable for economy. She consumes these bulky feeds, converts them into finished products easily and economically marketed and at the same time saves much of the fertility in the manure. Where hay, corn, fodder, etc., must be hauled to market there is considerable expense. If most of this expense can be saved there is a wider margin for profit on the farm.

### Dairy Notes.

Milk cans should be washed as soon as emptied.  
Thoroughly clean all utensils which come in contact with milk.  
Calves ought to get acquainted with the feel of the comb and brush very early.  
Feed all the roughage a cow will eat. She will eat more if fed two or three times a day.  
There is no other disease known that causes the same number of deaths in dairy cattle as tuberculosis. Wedding Announcements and Invitations of the finest quality at The Guide-Advocate.
