## Aluminum-Lined Aerated Ovens Will be the Greatest Stove of the 20th Century

THE bread in the oven; the roast of beef; the delicious turkey; the toothsome pudding, are never spoiled in the cooking if the good wife has a Souvenir Range installed in the kitchen. These things are possible, because the Souvenir is the only range made with an **Aerated Oven**. Our illustration is suggestive of the advantages that come from this oven. It is just the opposite of an air-tight or old style oven, for the air circulates freely all through it. The impurities that gather in cooking food are made to pass out into the exit flues connecting with the chimney, and none are allowed to escape into the room. In a word, the aerated oven produces fresh, not foul or impure air—it forces a rapid circulation of fresh heated air in exactly the same manner as we airify our lungs. All the natural juices of the food are retained and only good cooking is possible.

Aerated ovens  
are lined with  
**Aluminum**.  
Like a new silver  
dollar, they never  
tarnish, and are  
always **clean**  
and **sweet**.

1. Where the fresh air enter.
2. Circulating fresh air flue (and where it becomes heated.)
3. Fresh heated air entering the oven.
4. Indicates the action of the air in passing through the oven.
5. Exit flue for impure air.
6. Back view of fire box.

Sold everywhere. One will last a lifetime.
