Wheat deliveries on the C. P. R. in Manitoba are beginning to increase. An average of 40 or 50 cars per day are now being shipped to Fort William. Interior elevators are well filled.

Moose Jaw has two flour mill propositions before it at present. D. McLean, of Calgary, is asking for a bonus of \$8,000 towards a 200-barrel mill of which \$4,000 has already been subscribed, while E. Simpson & Co. are also out with a proposition which has been endorsed by the local agricultural society.

The *Chicago Price Current* reviews the United States crop prospects last week as follows: "During the past week the weather in the western part of the winter wheat section has turned colder, but sufficient snow has fallen to maintain the prevalent fairly good condition of the plant. In the eastern part of the wheat section, however, including Ohio and Indiana, weather conditions have not been so favorable, and the outlook there is less promising than it was a few weeks ago. Taking the crop as a whole, it is moderately less promising than a month ago. An accurate estimate of the effects of recent weather conditions is impracticable at this time. There has been no material change in the interior marketing of wheat, which is still firmly held. The increased interior movement of corn, noted in our previous issue, has continued during the past week, but more prominently in Illinois than in other states. There continues a good feeding demand, and holders are still firm in their views."
