

# LISTERINE

The word Listerine assures to the Medical Profession a non-poisonous antiseptic of well proven efficacy; uniform and definite in preparation, and having a wide field of usefulness.

On account of its absolute safety, Listerine is well adapted to internal use and to the treatment of Catarrhal Conditions of the mucous surfaces.

LISTERINE in the Treatment of Diseases of the Respiratory System

will be mailed to your address upon application.

# LAMBERT'S LITHIATED HYDRANGEA !

RENAL ALTERATIVE—ANTILITHIC.

The ascertained value of Hydrangea in Calculous Complaints and Abnormal Conditions of the Kidneys, through the earlier reports of Dr. Atee, Horsley, Monkur, Butler and others, and the well-known utility of Lithia in diseases of the uric acid diathesis, at once justified the therapeutic claims of LAMBERT'S LITHIATED HYDRANGEA when first announced to the medical profession, whilst subsequent use and close clinical observation has caused it to be regarded by physicians generally as a very valuable Kidney Alterative and Antilithic agent in the treatment of

Urinary Calculus, Gout, Rheumatism, Cystitis

Diabetes Hematuria, Bright's Disease, Albuminuria, and Vesical Irritation Generally.

**LAMBERT PHARMACAL CO., ST. LOUIS**

## THE COD-LIVER OIL

in Scott's emulsion is just as it came from the cod: unimpaired: unchanged.

The taste is concealed by the coating of glycerine—even the taste is kept, though concealed.

The oil is a mist; the invisible drops are coated with glycerine; hence no taste of the oil—as quinine pills are coated with sugar or gelatine.

Cod-liver oil, in a mass, is a nasty mess, and a stomach-disturber; in Scott's emulsion, palatable and a stomach-restorer.

SCOTT & BOWNE,

Toronto, Canada.
