WM. R. WARNER & CO.'S QUICKLY SOLUBLE COATED PILLS

—OF—

IODOFORM

CUM HOC SIGNO

COGNITUS EST

(CHI₃)

AN IMPORTANT THERAPEUTIC AGENT

—AND—

A POWERFUL ALTERATIVE AND GENERAL TONIC,

VALUABLE AS A REMEDY IN

SCROFULA, ANÆMIA, NEURALGIA, CHLOROSIS
AND RHEUMATISM.

Iodoform therapeutically is alterative, nervine, sorbefacient, antiperiodic and anæsthetic. As an alterative it acts with more rapidity than other medicines of that class, in doses of one, two or three grains, repeated thrice daily. As a nervine it is prompt and efficient; while it gives nervous strength, it calms speedily the most severe pains. Its sorbefacient properties are manifested with some degree of slowness. Five to seven grains, given in broken doses in rapid succession, produce a powerful antiperiodic effect.

PIL: IODOFORM ET FERRI.

DOSE—1 to 2 pills three times a day.

Philadelphia, January 10, 1880.

I have used and prescribed the Sugar-Coated Pills of Messrs. Warner & Co., and can testify to their solubility, as far as those which I have used may be mentioned. I find them as prompt and efficient as those prepared by the formula of the U. S. P. and uncoated.

B. HOWARD RAND, M. D., *Prof. Med. Dept. University, Pennsylvania.*
