

Probably the first astronomical instrument used in Canada, the astrolabe of Samuel de Champlain, the father of New France and hence of Canada, was lost on a journey of exploration near Ottawa in 1613. Some 254 years later, in 1867, it was recovered and is commemorated in the statue represented on the cover, which stands in the shadow of Parliament Hill overlooking the Ottawa River.

The graphic on the cover page represents the ongoing dialogue on arms control and disarmament issues in Canada and between Canadians and the world community.

Arms Control Verification Studies

Arms Control Verification Studies are issued periodically by the Arms Control and Disarmament Division of the Department of External Affairs. Their purpose is to disseminate the results of independent research undertaken for the Department of External Affairs as part of ongoing work by the Department in this area.

The views expressed in these reports are those of the authors and do not necessarily represent those of the Department of External Affairs or of the Government of Canada.
