

April 23, 1928.

R.E. Palmer, Esq.,
President, Institute of Mining & Metallurgy,
3 Lombard Street, London.

Dear Mr. Palmer:-

We should be very pleased indeed if you would represent McGill University at the Centenary Celebrations of the Institute of Civil Engineers in June next. We have advised them by this mail that we are asking you to do so.

You would have received this request over the signature of Sir Arthur Cuxrie had it not been that, owing to the very trying law suit in which he is engaged, he is not at all well.

It was a great pleasure to meet you again last summer. It will probably amuse you to know that this letter is being written in the room which was, when you were at McGill, the Museum of the Faculty of Applied Science.

We shall in due course send you the usual complimentary address to be presented at the Centenary Celebrations.

Yours faithfully,

Wilfrid Bovey,
Director, Department of Extra-
Mural Relations.
