

caused considerable damage, and the fatalities reported were quite unusual. The remainder of the month was cold, wet and dull, and at times autumn-like. Highest temperature 98 at Chatham, lowest 36.5 at Sussex.

AUGUST.—A month of most persistent unsettled, wet and unseasonably cold weather. Thunderstorms were very heavy and destructive throughout the Province. The continuous heavy rains hindered farming operations and considerable damage resulted from the flooded rivers and streams. For cold, gloomy and wet weather the past summer leaves a record seldom surpassed. Slight earth tremors were reported from Charlotte and Carleton Counties on the 19th. Highest temperature 85 at Chatham, lowest 36 at Moncton.

SEPTEMBER.—Fine weather prevailed throughout the month while the mean temperature was below average in all districts. Frosts were remarkably infrequent and almost the total amount of precipitation occurred on three days. Winds were light and no gales occurred. Light snow fell in Carleton County on the last day of the month. Highest temperature 79.5 at St. Stephen; lowest 28.5 at St. Stephen.

OCTOBER.—The weather of the month for the most part was fair and mild. Rainfall varied from double the average in some localities to about average in others. Temperatures below freezing were recorded on the 16th, 21st and 30th. A moderate gale from southeast to southwest prevailed on the 13th. A stormy period occurred between the 24th and 26th with heavy rains and a southeast gale, maximum velocity of 60 miles an hour being registered at Point Lepreaux. Rivers, streams and lakes much above seasonal height.

NOVEMBER.—Fine, mild, pleasant conditions typical of Indian Summer prevailed during the greater part of the month. The snowfall was everywhere light, but on the North Shore and in parts of the interior sleighing was fair during the last two weeks, elsewhere the ground was almost bare of snow. A southeast to southwest gale occurred on the 8th, and a northeast gale on the 14th with a maximum
