NO NEED TO WORRY ABOUT WINTER'S COAL

According to the statement of Walter D. Rogers, manager, the Harris Coal Company, Danforth avenue, where the situation is somewhat serious, there is no need to worry, even though the next winter's coal supply. "Our own customers will all be supplied with seventy per cent of their needs, and we have an extra supply of wood for emergencies. The coal is coming along slowly, but surely, and we have 26 cars at present on order. I think if people would order now and not wait for cold weather the strain would be eased and a more equitable distribution would be the result all over the city. There should be no great shortage of fuel this winter in my opinion," said Mr. Rogers, and the wood cut by the Ontario Government at Algonquin Park should relieve in a great measure any possible shortage. As far as the coal is concerned we have an extra supply of Connell coal, and I feel certain we will not run out of pen or egg coal next winter," said Mr. Rogers.

CIVIC WORKERS' STRIKE STOPS VIADUCT WORK

Work was at a standstill on the Bloor street viaduct yesterday. The 50-odd men usually employed by the works department quit work in sympathy with their fellow civic employees throughout the city, leaving the big undertaking to the care of the watchmen. During the last few days every little progress was made, with the exception of the completion of tarring operations on the street car bed in the centre of the main viaduct, and some grading work on Castle Frank road. No ties or rails have yet been laid on the main viaduct, although apparently all material required for the work has been in readiness along the bridge for several days.

Barriers are still placed at all approaches on the Rosedale side against vehicular traffic.

FAVORS PRIVATE CONTROL East End Resident Gives Views on Civic Employment

"The strike of the civic employees is very regrettable at the present time when all energies should be directed to winning the war," said a prominent resident of the Danforth district yesterday. "It was very noticeable that the streets of the east end did not look too untidy a week after the last street cleaners' strike, and had the city's street cleaning been in the hands of a private contractor I venture to state that no strike would have taken place. A solution of the difficulty regarding the street cleaning is to make it a contract job, and a contractor, who would purchase and dispose of the garbage as is done successfully in other cities, would be able to handle the situation while it is practically run by political and other organizations," he said.

CLARKSON SOLDIER IS SENT TO HOLLAND

A letter received here this week from Pte. Alfred Thompson, formerly of Clarkson, says that he has been transferred from Germany, where he was a prisoner for three years, to Holland. He appreciates the difference, and has been treated like a human being instead of like an animal. He hopes to get back to the firing line, and will never allow the Germans to get him alive again. He says that he has three years at the front, and has been through a lot of hardships, but that seems cheap to what he has had to undergo in Germany as a prisoner.

Harvey Lloyd's songs were received with thorough enjoyment. The Walsh Sisters were given recognition of the splendid talent which they warranted. Mrs. Margorie Walsh, comedienne, created laughter galore. Gus Hill was splendid in his negro songs and impersonation of Al Johnson. TORONTO MEN INVENT MOVING MACHINE

Three Americans residing in Toronto, I. Berliner, A. Berliner and S. Berliner, have invented a telephone apparatus for telephoning to and from moving trains. This apparatus permits their voice to transmit automatically through the wheel and axle into the rails. Trains crossing at right angles, or any other moving position whether on the same track or a double track line, can transmit messages to each other at distance desired, and the same results are obtained whether traveling 60 miles an hour or scarcely moving. Information can be given by telephone and the necessary connection made by a central office or any city telephone that connects with a despatcher's office. This system also permits telephoning to be done from one end of the train. It is only connected with the rails by the wheels and no parts are subject to wear. It can be installed on any car within three hours and at a relatively low cost.

SHIP CARPENTERS' UNION On the Alien Situation

The Toronto locals of the ship carpenters' union at last night's session held at the Labor Temple discussed the alien situation. It was suggested that steps might be taken to approach the members of the Great War Veterans' Association, and to ask them to assist in the work of the union. John Cottam, district secretary of the district council of the United Brotherhood of Carpenters, stated that it was the general opinion among the members of his organization that cooperation between labor and the returned soldiers was essential to the best interests of all concerned. There could be no doubt that the majority of the returned soldiers were working men, and that if they did not recognize the fact and unite with labor in all matters pertaining to labor the result would be that the profiteers would thrive at the expense of labor. This he said, was the generally understood aim of the manufacturers of the country.
