FROM THE CAPE OF GOOD HOPE.—We have files of the Cape Monitor and Mervin's Gazette of the 26th February, later than previous arrivals. Some successes have been gained over the Caffers, but the war is far from being finished.—The most important news is the march of Col. MacIntosh, with 3000 men, through the Caffers' country, from King William's Town to Port Hope. On his return he was attacked by the Caffers' great force, but he was victorious, and the detachment proceeded, after killing the way—and was as often driven back by the 750, who formed the rear-guard. The loss of the column is officially reported at 8 killed and 17 severely wounded, besides several others slightly wounded.

While this engagement was going on, 100 Finzees from King William's Town crossed the Keianna, and captured 400 head of cattle belonging to Seyda and Johnston.

Gen. Somerset was preparing to move against the Blunkwater rebels immediately. His force would comprise about 1200 men, and would be seconded by about 1600 burghers, under Condit, Bowker.

A party of volunteers, raised and equipped by the merchants of Graham's Town, had left that town for the Cape, to attack the rebels of the Blunkwater rebels.

The Graham's Town "Mounted Rangers," the Albany Farmers' Mutual Association, and other bodies of volunteers, were displaying great spirit and activity in clearing the colony of marauders.

There has been desperate fighting on the side of the Cape, and the Cape has been held in readiness to embark for the Cape as soon as an opportunity offers for their services should be received from hence.

PROFESSOR MADRITT.—The Port Elizabeth Gazette gives the important intelligence, received by letter from the Cape, that 1000 men, of 5th Regt, and other corps in that Island, were held in readiness to embark for the Cape as soon as an opportunity offers for their services should be received from hence.

NEW PAINTING PATENT.—We learn that Mr. H. Marshall, of Cambridge, in this State, has invented a new and improved method of painting, and taken means to secure a patent for a new printing press, which is thought to be capable of throwing off sheets at the rate of 1000 per hour, employing only a man and a boy. It is supposed that one man alone can work 400 sheets an hour. It has been examined by several practical printers, who express their confidence that it will do as fine work as any press now in use. The construction is extremely simple for the advantages it possesses, and the whole, including roller mounds and all necessary appendages for the press, can be probably constructed for \$100.—[N. Y. Tribune.]

BORN BY SEA.—On the downward trip of the Emigrant train from Sandusky, one day last week, a fine male child was born in one of the cars. The mother, in return for the attention paid her by one of the conductors, named the child John Sibley, and John agreed to stand god-father to it in baptism. If the little fellow keeps up at the rate he began he will "get through the world" in short time.

SINGULAR TERMINATION OF A SUIT.—A day or two since, two cousins, male and female, recently from Germany, were charged before Alderman Freeman with the larceny of \$40,000, from the other side of the water. There was no evidence whatever to substantiate the accusation, and upon the Alderman dismissing the case, at the request of the gentleman defendant, and with the consent of the Alderman, the defendant, who had been arrested upon the spot, and who had the case highly gratified at the result.—[PHI. WEEK.]

MISS B.—A lady of considerable notoriety in the southwest, made her appearance lately in the Plaquemine Court of Louisiana, to argue her own suit. She was armed with a pistol and a dirk, and frightened the lawyers "out of their wits."
