

SLIPP & FLEWELLING'S

SAUSAGE BACON, HAMS, Etc.

Have been manufactured in Saint John for nearly forty years. They need no introduction to most Saint John folks and Exhibition visitors are welcome to visit our plant and see our goods.

SLIPP & FLEWELLING, LTD.

SAINT JOHN, N. B.

Saint John Spring Works

The manufacture and repairing of carriage and automobile springs is an exceptionally important industry in Saint John, especially the automobile section of the business. The Saint John Spring Works have developed a highly efficient organization for this class of work, and have trade connections with practically every garage and many car owners throughout New Brunswick. They specialize in a rapid service, and under normal conditions can turn out work in a surprisingly short length of time, causing as little hold up as possible for their customers. Springs are made to order, old springs duplicated or repaired. The plant of the company is situated at 81-83 Thorne avenue.

J. & A. McMillan, Ltd.

When the late John McMillan established his stationery business in Saint John 103 years ago, he probably little thought that he was laying the foundation stone of what was to become one of Eastern Canada's leading business organizations in the printing and book-binding field. That "large oaks from small acorns grow" cannot be more ap-

propriately demonstrated than by the successful career enjoyed by Messrs. McMillan. From a small stationer's shop, during a century this business has developed to one of many departments, increasing activities and meeting demands as they arose, holding the goodwill of old patrons and gaining the confidence of new friends, and today it would be hard to find any institution more adequately equipped for carrying on a large business such as it is enjoyed by this company.

In addition to their printing and bookbinding plant, McMillan's are extensive dealers in office supplies and equipment, stationery and school supplies, toys and novelties. The president of the company is Lt.-Col. A. McMillan, D. S. O., great-grandson of the founder, and a veteran of the Great War. The managing director is William J. Simpson, who has been many years with the company. Albert L. Harding is manager of the wholesale department; Ira C. Rockwell, manager of the retail; Frank J. Alexander, superintendent of the Manufacturing department; Eugene McBride, manager of the printing department; and Grover Watts, manager of the bindery.

Cohen Clothing Mfg. Co.

The Cohen Clothing Manufacturing Co. have been 21 years in business in Saint John. A large staff of tailors are engaged on men's suits and overcoats of good quality, made to sell at medium price levels. They are able to meet outside competition because favored by direct importation of fabrics from the Old Country to the winter port, making lower production costs in Saint John as compared to elsewhere in Canada and location convenient to retailers in the Maritimes. Their trade slogan is "Less freight, less wait for Maritime retailers."

THE FOLEY POTTERY LIMITED

The only stoneware plant in Eastern Canada. Bring your exhibition visitors to see this interesting factory at East Saint John.

Maritime Cons. Co., Ltd.

The Maritime Construction Company, Limited, was organized four years ago, with J. L. O'Brien, president; Murray W. Long, vice-president and general manager; and H. B. Tiplett, secretary-treasurer. This company built the fine hydro lines from Musquash to Fairville, more than two-thirds of the line from Fairville to Moncton, N. B. Some of their work includes the South Bay bridge, the Fairville Fire Station, the concrete dock residence of J. L. O'Brien, the concrete block residence of Mrs. James Lowell on the Manawagonish road, and many other large and small jobs too numerous to mention.

They manufacture concrete bricks, blocks and drain pipes, which are finding much favor with the trade. The company is glad at all times to submit estimates and prices. It has built up a good reputation as an efficient and well organized concern. The head office of The Maritime Construction Company, Limited, is in Fairville, N. B.

Robinson's, Ltd.

From Yarmouth to Quebec, including Prince Edward Island, the public as a whole eat Saint John-made bread—largely from Robinson's Bakery. Actually this firm ships more bread abroad than it sells in the Saint John district, though it is far beyond doubt that a large amount of the local bread is baked by this firm.

The great expansion noted is now some years old, dating from the introduction of their famous loaf "Butternut Bread"—a bread noted for its extra quantity of milk, sugar and shortening. Of course they bake various other noted loaves—but Butter-Nut leads in popularity.

Foley Pottery, Ltd.

The potter's art has been known since the time our forefathers gave up carving from stone their food and eating utensils, but modern methods have displaced those of years ago, and any exhibition visitors interested in the manufacture of crockery would do well to pay a visit to the Foley Pottery at East Saint John, where the management will accord them a cordial welcome. This industry was established more than 60 years ago, and enjoys an enviable reputation in the manufacture of stoneware, Rockingham ware and flower pots. Some of their leading lines are bean crocks, teapots and butter crocks. Another well-known line produced by this company is a compound known as "Foley's Prepared Fire Clay," a clay specially prepared for the purpose of lining stoves, and which may be used by any handy person. This clay has been on the market for many years. The raw material used by the Messrs. Foley is obtained from their property at Musquodibit, Nova Scotia. In addition to the many departments devoted to the production of pottery, packing and crating, as might be expected, form an important section of the industry.

Slipp and Flewelling

For nearly 40 years the name of Slipp & Flewelling has stood for quality in pork products and their goods have always found a ready sale. The business was started in 1886 by the late Edward W. Slipp and Frank H. Flewelling and carried on as a limited partnership until 1923, in which year it was incorporated.

The firm manufacture all kinds of pork products and confine its activities to this class of goods exclusively. Hams, bacon, lard and sausage bearing the S & F brand are eagerly sought after by the public who have come to know the quality of the goods. Last year this firm inaugurated the policy of packing its sausage in individual cartons, thus preventing handling the goods from the time they left the establishment until taken from the package by the housewife to cook.

Emery's, Limited

Emery's, Limited, have for many years enjoyed a wide reputation as furniture makers, repairers and upholsterers. They employ a large staff of skilled workers, and turn out a good volume of work annually. They specialize in furniture made to order and reproduction work. Some samples of their work will be view at the "Made in Saint John" exhibit at the Saint John Exhibition, and are well worthy of looking over. Messrs. Emery can faithfully reproduce any antique furniture, and have special machinery for the manufacture of high-class furniture. Their upholstery department is well equipped and sample coverings are always on hand.

Standard Creamery

The Standard Creamery operate a busy plant at 159 Main street, under the direction of F. M. Logan. They are wholesale dealers in pasteurized milk and cream, butter, buttermilk, ice-cream and eggs, and enjoy a wide connection throughout the city. There are no fewer than 24 wagons distributing "Standard" milk and cream. The company's plant is modern and well equipped. Milk is pasteurized in glass-lined pasteurizers, scientifically carried out by experts thoroughly competent to handle the milk supply of the company's large clientele.

Energy Electric Co.

From daily manufacture of 200 lamps, or bulbs, a short time ago, to 1,600 now manufactured daily is the proud achievement of the Energy Electric Company, Limited. Organized last September the output has multiplied by eight, and the management expects by the end of the current year to have installed sufficient equipment to provide for the manufacture of 8,000 lamps a day. New quarters have recently been taken in Dock street for enlargement of the business.

are all manufactured in the United States. This corporation also manufactures and markets the "Daylight Blue" sign lamp. All sizes of lamps, from 10 to 800 watt, are made, and with the installation of another unit the company will be capable of producing lamps ranging from 75 to 1,000 watt as well as automobile lamps. Another feature of the product is the tipless lamp. Their product is guaranteed for 1,000 burning hours.

The Maritime Provinces take about 80 per cent. of the company's product, the other 10 per cent. going to Montreal, Quebec, Calgary and Edmonton. Charles E. Foss is manager.
