

WON THE RHODES SCHOLARSHIP

HONOR FOR YEAR HAS GONE TO H. T. LOGAN

Distinguished Student is a Nephew of Resident of Victoria.

(From Tuesday's Daily.)
H. T. Logan, of Vancouver, is the new Rhodes scholar for the province of British Columbia, having been chosen at the test held last night at which three candidates presented themselves before the British Columbia committee under the Cecil Rhodes trust. Mr. Logan secures the grant of \$1,500 per annum for three years' residence at Oxford university to take up postgraduate work.
The new Rhodes scholar is a nephew of Mr. and Mrs. James Forman, of Victoria, and is the son of the Rev. John A. Logan, a Presbyterian minister of Eburne, formerly moderator for the synod of British Columbia. He was born twenty-one years ago in Nova Scotia, and came with his parents to British Columbia when five years of age. He last year graduated in arts at McGill university, with first rank honors in classics. As a member of

the arts class, '08 he was a prominent figure in athletics, to which under the terms of the Rhodes trust, as much consideration must be given as to the scholarship. Last year he was a member of the McGill university track team and competed at the intercollegiate meet at Kingston, in which he took part in the quarter and distance races. He was also identified with several undergraduate societies.
The board of examiners was composed of the Hon. Mr. Hunter and Inspectors Stewart and Gordon, and the body found the competition between the successful student and Arthur Yates, of Vancouver, who was also a member of the high honor very keen. Mr. Yates is a graduate of arts at McGill university and a gold medalist in English.
Mr. Logan left this morning for his home in Vancouver.

REAL ESTATE MEN'S PETITION TO COUNCIL
Explanations Made by Some of the Aldermen—Referred to Tourist Association.

The relations of Herbert Cuthbert and the Tourist association were made plain at the meeting of the city council last evening, the matter being brought up by the petition from the real estate agents of the city protesting against the city granting any money to the association so long as Mr. Cuthbert was secretary and also connected with the real estate firm of Herbert Cuthbert & Co.
After the petition had been read Ald. Hall remarked that this was a matter which had nothing to do with the council. They had given the Tourist association a grant of \$5,000 for the year and he knew the association would do the best it could with it. Even if they did something that was not right it was out of the council's hands to interfere.
Mayor Hall explained that he had already read the petition to the Tourist association. It had never been proposed to hire Mr. Cuthbert as secretary this year, as the real estate men took it for granted that they had. It was, however, proposed to have Mr. Cuthbert get out some literature for them but even this had been abandoned. A printing committee, with John Nelson, honorary secretary, at its head, was now in charge of this work.

Ald. Cameron said the real estate men had been unnecessarily alarmed in this matter. The Tourist association was doing the very best it could to carry on its work and meet the wishes of the people of the city. It had never been proposed to have Mr. Cuthbert as secretary again and as matters were arranged Mr. Cuthbert had nothing to do with the association. The work of the secretary was being performed by the young lady in the office. The wishes of the real estate men had therefore been anticipated in this matter. He could assure them that the members of the Tourist association were working entirely in the interests of the city and the council could trust them to the fullest extent.
It was finally decided to refer the petition to the Tourist association.

NOMINEE FOR TERREBONNE

Hon. Mr. Nantel Will Stand for Constituency so Many Able Men Have Represented.

Quebec, May 12.—Hon. Mr. Nantel, ex-minister of public works in the de Boucherville government, is a candidate for the county of Terrebonne in the provincial elections in Quebec. This county has been celebrated for its distinguished representatives. The famed Sir Adolphe Chapleau represented the county all through his political career. The constituency has also always been represented by the most talented men of the province and they have all been ministers of the crown, amongst them being two lieutenant-governors of the province of Quebec, namely, Sir Rodolphe Masson and Sir Adolphe Chapleau.

PRECAUTION AGAINST PLAGUE.
New York, May 12.—All vessels arriving at New York from any port in Venezuela are to be held at quarantine for special inspection and treatment, according to an announcement made to-day by Health Officer Doty. Dr. Doty said this decision was reached in view of the absence of reliable information regarding the existence and spread of bubonic plague in that country.

LONDON'S UNDERGROUND.
London, May 12.—At a meeting held here yesterday of the shareholders of the Underground Electric Railway Company, under the presidency of Sir Edgar Speyer, the issue of various bonds, aggregating \$2,200,000, necessary for the re-adjustment of the company's finances, was unanimously approved.

LEAVES FRUIT UNSCATHED.
St. Catharines, Ont., May 11.—Severe hail storms passed over the Niagara fruit district on Saturday afternoon, but no damage was done to fruit.

BANDITS LOOT VANCOUVER TRAIN

EXPRESS MESSENGER BADLY INJURED ON G. N. R.

Robbers, After Brutal Attack, Bolt With \$5,000 Just Outside Seattle.

Vancouver, May 12.—The Great Northern train which left Seattle this morning at 8:30 o'clock for Vancouver was robbed by bandits within half an hour after leaving Seattle. Two robbers jumped off the express car and held up the train. The robbers took a street car back into Seattle and it was not till the train was seven or eight miles from Smith's Cove that the robbery became known.
Perrine says that when he was making ready to leave Seattle early this morning a man dressed in brass buttons and a top hat, who he recognized as a robber, ordered him to hold up his hands. Later he was struck on the head and rendered unconscious. A strong box was rifled and the registered mail taken while the train was going through a tunnel.

BOXING TOURNAMENT FOR CELEBRATION
Two Evenings Arranged When First-class Events Will Be Seen.

Encouraged by their success in the earlier part of the season the Victoria West Athletic Association proposes to take a hand in the celebration of Victoria Day by putting on two boxing tournaments, one on Saturday, the 23rd, and the other the following Tuesday.

On the first evening Billy Lauder will meet Kid Howell, of Seattle; Joe Bailey will box Kid Bright, of Vancouver, and the other brothers will probably give an exhibition.
On the second evening Vic McLaglen, of Tacoma, will probably meet George Paris, of Vancouver. This event has been under discussion for some time and the result will be interesting in the extreme. The whole affair is in the hands of an energetic committee with Alex. Monthett at their head. The Victoria theatre has been taken for each night.

FIGHTING FOR LIFE.
Quebec, May 12.—An effort will be made this week to secure a new trial for Omer Rochette, now in jail here awaiting execution on June 27th for poisoning his wife.

FINDLAY RIVER STRIKE PROMISING WELL

Claims Average \$20 Per Day Per Man—Whole Creek Has Been Staked.

Vancouver, May 12.—The first authentic news of the year from the new gold fields of Findlay river, reached Vancouver to-day. Early in February, a syndicate of Vancouver and Victoria mining men sent G. Rosenthal and George Barnes to the north to make a quick investigation of the discovery and to report. The two men went overland to the Ingenika river and yesterday returned to Hazelton. From their place of telegraphed to-day that the new field is very promising. Practically all the gold has been found on McConnell creek, a tributary of the Ingenika. Seventy men are working and nearly the whole creek has been staked. A net return on the best claims averaged twenty dollars per day per man in gold. A new expedition will be fitted out immediately.

PATROL OF ALASKAN WATERS.

All arrangements for a patrol of Alaska coast waters by vessels of the United States revenue cutter service have been completed by Capt. P. M. Munger, commanding the patrol, who is to leave Puget Sound on Friday for the North. The fleet covering the seal rookeries and fishing districts will consist of the cutters Perry, Rush, McGray and Bear. The last two sail from San Francisco, the Perry and Rush departing from Seattle. During the past year all the ships have been extensively repaired. Equipment has been added and that will increase facilities for a successful season. Capt. Munger will establish a headquarters office at Unalaska. From that port his command will cruise over the Southeastern Alaska coast section, making fortnightly calls and reports to the commanding officer.

DIRECTOR OF C. P. R.

Hon. James Dunsuair Is Elected to Board of Great Railway Corporation.

Montreal, May 12.—Lieutenant-Governor James Dunsuair, of British Columbia, has been elected a director of the Canadian Pacific Railway.

"IN GOD WE TRUST"

Washington, D. C., May 12.—The senate committee on finance to-day voted unanimously to report the bill already passed by the house providing for the permanent restoration of the words "In God We Trust" to the gold and silver coins of the United States.

EVA McDANIELS ON TRIAL FOR HER LIFE

Vancouver Woman Charged With Murder of Logger is Perfectly Composed.

Vancouver, May 11.—When Eva McDaniels stepped into the dock at the Assize court this morning before Mr. Justice Morrison to answer the charge of murdering George Black, logger, she was a testimony to regular hours and the regular hours and plain fare of a jail and the squalid quarters at Westminster, not the damp, dark cells of the city jail. The prisoner, who is well known to the regular inmates she well knew the life of the restricted district and the life of irregular hours, and the confinement at Westminster greatly improved her and she appeared as if she had been in the hands of a physician. She looked a well preserved woman of thirty-five or forty years. She was tastefully dressed in a grey costume with a dark stripe and her fine head of hair was covered with a handsome hat. She had her feelings perfectly under restraint and listened closely to the evidence. Before the proceedings commenced and while she was sitting in conversation with the judge, Joseph M. Huston, of Philadelphia, architect of the capitol and designer of its furniture; Wm. P. Snider, of Springfield, Pa., a former senator; and Wm. L. Mathews, of Media, Pa., a former state treasurer; J. M. Shumaker, of Johnstown, Pa., a former superintendent of public grounds and buildings; and Frank M. Irvine, a travelling auditor in the auditor general's department.

The deputy attorney-general, Mr. McLean, appeared for the defence. Mr. McLean, in his opening address to the jury, stated that the analysis of the contents of the man's stomach had been carried further than it was at the preliminary hearing and half a grain of morphine had been found. That amount, if given to a healthy man, would be sufficient for a fatal dose. He reviewed the evidence, of Black's visit to the house, his big build and apparent health, his intention to remain the night, his groans being heard early in the morning while the accused was away from the room, her return, the summoning of the groans and the medical help arrived.

The evidence of the landlady was that when she first saw Black in the morning he appeared to be in good health and was drinking. While in accused's rooms four bottles of champagne were sent up to them. She described the situation of the rooms.
The women of the house gave their evidence and all agreed who saw him before he had already been drinking before he had the champagne. The women were not subjected to any cross-examination. The housekeeper stated that she took two clean glasses up to the fourth bottle of wine. They had been used by the accused and had been rinsed and dried.
Mrs. Conklin and McTavish testified to their superficial examination of the body shortly after death. Mrs. Jackson gave the results of her examination of the room and a conversation with the accused who told him that she had found the man in distress when she became alarmed and called for a doctor. She told him that Black ought to have a \$10 bill upon him, his change, but they could not find it.

He was the last witness up to the midday interval.

ASSIZES WERE OPENED TO-DAY

ASSAULT AND STEALING CASE IS BEING TRIED

Court is Being Held With Chief Justice Hunter Presiding.

(From Tuesday's Daily.)
Accomplices in all the robberies and ceremonies of ancient days the court of assizes was this morning opened and twelve good men and true chosen to try the cases which have been sent up to this court for trial.

The grand jury was first called and sworn, after which Chief Justice Hunter addressed them complimenting them on the short list of cases to come before them and of the small import of those cases. The most serious he said was that of the prisoner Leach, who is up on a charge of attempted murder. There were but four cases in all, but they were of great importance. Amongst the baronous races of Africa and Oceania, which are constantly at war, the births show an overwhelming preponderance of boys.

This, he states, proves the law, for the best and strongest men are sent to the front or killed, and the weak remain behind or survive.

Nature's Purpose.
The purpose of nature is to maintain the balance, and to replace the weaker individual with another of the same sex before he or she disappears.

Thus, when an old man marries a young wife, it is a well known fact that more boys than girls are born to such a union. The opposite is the case when the wife is much older than the husband. Sadler has collected the following statistics: For 1,000 girls born there are born:

865 boys when the father is younger than the mother.
984 boys when the father is of the same age as the mother.
1,037 boys when the father is one to six years older than the mother.
1,267 boys when the father is six or eleven years older than the mother.
1,474 boys when the father is eleven to sixteen years older than the mother.

Dr. Romme asserts that there are practically no instances where the strength of both parents is equal. Worry, a passing illness, mental depression—or, indeed, any slight trouble is sufficient to turn the scale and cause a temporary and relative weakness in one or other.

CHAP. II. IN CAPITOL CONSPIRACY SCANDAL

Six Appear at Harrisburg to Answer Charges Connected With Furnishings.

Harrisburg, Pa., May 12.—The second of the series of conspiracy cases growing out of the contracts for the furnishing and equipping of the new state capitol held for trial to-day in the capitol building. The case involves six men. They are Congressman H. Burd Cassell, of Marietta, Pa., head of the Pennsylvania Construction Company, which supplied about \$2,000,000 worth of furniture for the building; Joseph M. Huston, of Philadelphia, architect of the capitol and designer of its furniture; Wm. P. Snider, of Springfield, Pa., a former senator; and Wm. L. Mathews, of Media, Pa., a former state treasurer; J. M. Shumaker, of Johnstown, Pa., a former superintendent of public grounds and buildings; and Frank M. Irvine, a travelling auditor in the auditor general's department.

Snyder, Mathews and Shumaker were convicted in the first trial of defrauding the state out of about \$19,000 in a bill of \$17,783.70 for metallic filing cases and metallic furniture. Fourteen men have been indicted on various charges of fraud in connection with the capitol and the cases of those who have not already been tried will follow that called to-day.

YAGUI REVOLT.

Report of Indian Surrender is Doubtful by Mexican War Department.
Mexico City, May 12.—The war department last night announced that it has no information relative to the report from Sonora of the surrender of Yaqui Indians and is inclined to minimize the case. The Yaquis are regarded as outlaws and any prisoners taken will be treated judicially according to the depositions in which they have participated. Troops will be kept in the Yaqui country and the deportation policy of the government will be continued. A Yaqui guilty of offenses will be punished and transport to Yucatan and other southern regions.

HOW SEX OF INFANT IS DETERMINED

New Theories Result of Study of Statistics—Imperial Examples.

Dr. Romme, in a paper contributed to "La Revue," is propounding the theory that the sex of the infant has some relation to the strength of the parents. When the mother is the stronger nature favors boys and vice versa.

To illustrate his theory Dr. Romme cites examples among living sovereigns. The Kaiser, he says, had five sons in succession, while the Empress of Russia, on the other hand, has had four daughters in succession born to her.

"In my career," he concludes, "I have not met with a single instance which transgressed this rule."

This, he states, proves the statistical study, declares that by a law of nature the child resembles the weaker and not the stronger of the parents. He points out that in all countries, with mathematical regularity, 105 of 106 girls are born to every 100 boys.

There is only one condition under which this proportion is modified—after a great war. In the same way, among the barbarous races of Africa and Oceania, which are constantly at war, the births show an overwhelming preponderance of boys.

Dr. Romme asserts that there are practically no instances where the strength of both parents is equal.

Worry, a passing illness, mental depression—or, indeed, any slight trouble is sufficient to turn the scale and cause a temporary and relative weakness in one or other.

ALL GARBAGE WILL BE DUMPED INTO SEA

Council Adopts Report of Committee Presented at Previous Meeting.

Ald. Richard Hall is pushing along his plan for putting the work of scavenging the city on a better footing and last night the city council decided to call for tenders for a new tug and for the chartering of a tug with which to tow the garbage out to sea. Another resolution also introduced by Ald. Hall instructed the city engineer to prepare an estimate of the cost of wharves for the shipment of garbage in James Bay district and also in Victoria West. A third resolution was moved by Ald. Hall, providing for the diversion of money voted by the council last January for an incinerator to the fitting up of a plant for the disposal of garbage by dumping it into the sea, but it was held over as some of the council members were of the opinion that all cost of the removal of garbage should be provided for out of current revenue. This money does not necessarily require to be raised and if the by-law remains as it is a future council could realize on it.

Last week a committee which has spent some time going into the question of the disposal of garbage and reported in favor of the water method rather than to the expense of an incinerator, authorized by the ratepayers in January, which costs much more at the outset and the cost of operation is also several times greater. This report was referred to the streets, bridges and sewers committee last night and a permanent committee was appointed to look into the matter.

When Ald. Hall moved the following resolution, seconded by Ald. Mable: "That the report of the committee of May 4th be adopted and tenders as therein advised be forthwith called for, viz.: (a) For construction of the scow recommended. (b) For the chartering of a tug to tow once or oftener, as required, daily, the loaded scows from the city wharf to a given point in the channel beyond Brothie's Ledge."

In moving the resolution Ald. Hall said the cost of the proposed scow would be about \$2,000. He thought it would be cheaper to charter a tug than to buy one and had drawn his resolution in that way. The idea was to dump the garbage off Brothie's ledge where there could be no chance of it becoming a nuisance. The tenders for towing would only be for the balance of the year as next year's contract would have a better idea of the cost of the work and would therefore be in a better position to deal with the matter. The resolution carried unanimously.

Ald. Hall then moved the following resolution: "That the city engineer be instructed to advise the corporation as to the best point in James Bay and Victoria West districts for construction of a public wharf for corporate purposes, and to prepare an estimate for the construction and the making of the roadway to same."

In support of it he said that as the city was growing rapidly two more wharves would be necessary in order to avoid long hauls if this system of

garbage disposal were to be continued. This resolution also carried unanimously.

Ald. Hall then moved his third resolution which read as follows: "That the city council do place itself on record, that it is undesirable to proceed with the proposed construction of an incinerator plant and recommend to the citizens the establishment of an improved plant for garbage collection and removal, and that the money authorized to be raised for the incinerator plant should be utilized for the construction of a plant for garbage collection and removal, and every expenditure necessary to provide the system of collection and removal of garbage and dumping the same at sea."

In moving the adoption of this resolution Ald. Hall said that the question of establishing an incinerator had been gone into pretty thoroughly and it was plain that an incinerator was not deemed suitable to the city's needs. In the first place both the cost of installation and maintenance would be much greater than under the system he proposed. Then the incinerator could handle only a certain amount daily, while the other system was elastic. More than this no one would want the incinerator at their doors.

Ald. Pauline opposed this resolution. He did not believe in borrowing money for this purpose. Money for the disposal of garbage should be provided out of general revenue. If the incinerator by-law were left as it was it would be no addition to the city's indebtedness.

Mayor Hall pointed out that if the by-law was left as it was a future council could take advantage of it.

Ald. Cameron agreed with Ald. Pauline to a certain extent that the money for this purpose should be provided out of general revenue but it was doubtful whether they could afford to install a plant from this source of the city's finances.

Ald. Mable also saw much force in Ald. Pauline's remarks and asked that the matter be left over so that the members of the board might have full opportunity of considering it.

ELECTION BILL BEFORE HOUSE

GOVERNMENT'S OBJECT TO CORRECT ANOMALIES

Obstruction Tactics of Opposition Still Holding Up Business of Country.

Ottawa, May 12.—Sir Wilfrid Laurier, in the Commons this afternoon, speaking on the present deadlock between the opposition and the government with reference to the re-drafting of the election bill with respect to the preparation of the lists in Manitoba and British Columbia, pointed out that in view of the existing provincial conditions and the method of preparing lists, some such amendment to the act as the government was absolutely necessary. The government's whole object was only to secure correct lists and to remedy existing anomalies.

With a view to making it absolutely certain that no unfair advantage would be taken under the bill by the party in power, Sir Wilfrid proposed to give the opposition a chance to back down gracefully from the present obstructive tactics, which have been holding up the business of the country for weeks. Sir Wilfrid proposed the re-drafting of the contentious clause so as to guarantee ample time for the revision of the lists by the county court judges or by deputies appointed by them. This would place the revision in the hands of a non-partisan body instead of being under the control of the provincial government appointees. If the opposition were to back down, the government would then go into supply to pass a temporary supply bill. Unless the opposition consents to stop obstruction then the whole civil service will be left without pay after Friday next.

CLERGYMAN'S TRAGIC DEATH.

Toronto, May 12.—While calling on a parishioner, the Rev. Wm. O. Oppen, rector of St. Martin's church, died suddenly of heart failure. He was 73 years of age.

INDIAN EMPIRE SAFE AT AUSTRALIAN PORT

Rate on Barque Adela Raised to Fifty-five Per Cent.

Yesterday word was received of the safe arrival at Sydney, N. S. W., of the overdue British barque Indian Empire, which had been out 100 days on the voyage from Montevideo.

The rate on the overdue Chilean barque Larkins, now out 100 days from Tacoma for Valparaiso, has been advanced to 55 per cent. She is a three-masted wooden barque launched as an American vessel under the name of Carrie Reed. Later she was sold to a German company and by it to a Chilean concern. The latter vessel taking place three years ago. Before she sailed from Tacoma a survey showed her to be in a very seaworthy condition, and it is more than likely that Capt. Larkin, her commander, is the only navigator on board.

The rest of the crew being Chileans, that is causing anxiety. No grave fears are entertained for her, however, by those knowing the vessel, and the opinion is freely expressed that she is a "good play."

On the overdue American ship Bangor, now 200 days from Norfolk for Honolulu, the rate has also gone to 55 per cent. The British barque Falklandbank, 178 days from Port Talbot for Valparaiso, has reached 55 per cent, and only slight hope is entertained of her being safe. The Norwegian ship Bardowie, 159 days from Lisbon for Acapulco, is 10 per cent, and is expected to arrive shortly.

FIFTY YEARS A CLERGYMAN

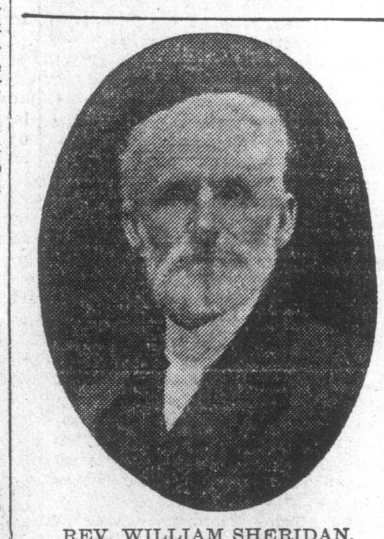

RESIDENT OF VICTORIA CELEBRATES HIS JUBILEE

Rev. William Sheridan Has Had Long Experience in the Ministry

After fifty years in the ministry of the Methodist church, William Sheridan is enjoying a well earned rest in the city of Victoria. Since 1884 owing to declining strength, he has been on the superannuated list of the church. In 1905 he came to Victoria to enjoy the better climate of the Pacific and has made his home in this city since that time.

Rev. Wm. Sheridan was born in Ireland, July 10, 1834. Reading Leigh Richmond's Memoir of Elizabeth Wallbridge, "The Dairyman's Daughter," he was enlightened as to the nature of true religion, and an intense desire for its experience was produced in him early in life.

He joined the Methodist church in 1851, near Toronto, and in 1858 went from the Cookville circuit, and was

REV. WILLIAM SHERIDAN.

recommended by the Toronto district meeting, as a candidate for the ministry, Richard James being chairman of the district. They met, and he was sent to Prince Albert, on the Whitby district, as his first charge. Cartwright, Bowmanville, and Merrickville were the other circuits traveled during probation. In 1862 Brother Sheridan was ordained, with thirty-one others, in the old Pinnacle Street church, Belleville, Rev. Enoch Wood being president, and Mr. Barnard, secretary of conference. On the fourteen circuits that Bro. Sheridan traveled he had the great satisfaction of seeing many souls converted. Those were the days of large circuits, protracted meetings, and almost continuous revivals, and salaries that kept the preacher humble.

The hard toll of those days told upon the bodily strength, and in 1884 Bro. Sheridan had to accept superannuation. Though passing through more than the average of physical suffering since that time, Bro. Sheridan is today living out a beautiful old age in contentment and happiness.

In 1905 Bro. Sheridan was transferred to the British Columbia conference, and now lives in Victoria.

DOG POUND GIVES COUNCIL TROUBLE

Spring Ridge Resident Threatens Legal Action Unless it is Removed.

Once again is the city council face to face with the problem of where to place the city pound in order that the howling of dogs held there in duranceville may not disturb the peaceful slumbers of nearby residents. This matter has now been up a couple of times, and the people of Spring Ridge appear determined to get rid of what they consider an unbearable nuisance. While the subject was under discussion last night one alderman advised placing it beside the proposed new public abattoir, to which another responded to the effect that this would be handy for the sausage maker.

The matter was brought before the council by a letter from James Lyon, who wrote that the howling and noise of the dogs in the city pound had become unbearable, keeping people awake both day and night. He threatened legal action if something were not done in the matter by the city.

Mayor Hall said that the sanitary inspector had presented a written report that the dogs kept quiet at night, and that so far as sanitary arrangements were concerned it was clean and in good condition.

Ald. Pauline—The problem is to make the dogs keep quiet at night.
Mayor Hall suggested a house with deadened walls.
Ald. Gleason said that if any of the aldermen lived near this place they would soon realize what a nuisance it was.
Ald. Fullerton—Put it down near the iron works.
Ald. Norman—There's no room for it there.
Ald. Pauline suggested placing it near the proposed public abattoir.
Ald. Hall—Handy for the sausage maker, eh?
Ald. Mable—Surely you are not casting aspersions on the city butchers?
Ald. McKeown was of the opinion that something should be done to abate the nuisance, and eventually the letter was referred to the pound keeper to see if he could suggest a remedy.

LEACH FOUND GUILTY

SENTENCE DEFERRED BY CHIEF

Dondero Case Opened day Afternoon—of Jurors

(From Thursday's Daily.)
In the assize court yesterday when it became known that the jury in the Leach case had returned a verdict of guilty, a shortage of jurymen. Accordingly sent a policeman to the door behind the speaker and took the speaker into the court room, summoned these special jurors, and put the rule in force. Leach was found to be guilty of the crime of murder, and the jury appended a recommendation for mercy.

The witness did not expect that he would be sent to the hospital, and he went back into the box examined by G. H. Barnard. The witness did not expect that he would be sent to the hospital, and he went back into the box examined by G. H. Barnard. The witness did not expect that he would be sent to the hospital, and he went back into the box examined by G. H. Barnard.

In answer to a juror he had never been convicted of a crime before, not even when he came to the province he had been steamboating. J. A. Aikman, in summing up, stated that the evidence of the prisoner of intent to kill. They did the shot had been fired, and the evidence of intent to kill. They did the shot had been fired, and the evidence of intent to kill.

It stood to reason that the shot was at it was an assault. The evidence showed that the prisoner was a man of good character, and that he had been convicted of a crime before. The evidence showed that the prisoner was a man of good character, and that he had been convicted of a crime before.

The jury then retired to the jury box, and after some time returned with a verdict of guilty. The judge then sentenced the prisoner to the penitentiary for a term of years. The prisoner was then taken to the prison, and the trial was over.

The trial of Louis Dondero, charged with the murder of a man, was opened yesterday afternoon. The jury was sworn, and the trial proceeded.

The trial of Louis Dondero, charged with the murder of a man, was opened yesterday afternoon. The jury was sworn, and the trial proceeded. The evidence was heard, and the jury returned a verdict of guilty. The judge then sentenced the prisoner to the penitentiary for a term of years.
